We have been doing so many exciting activities during preschool. Each Week, the teachers provide new and fun ways for your child to receive the best learning experience possible.

Group Activities:
Our group activities give the children an opportunity to work with their peers, and provide them with time to socialize and help others.

Shared Book Learning:
Every Morning we share a book to introduce the theme of the day and to promote literacy.

- How do you Measure Length and Distance?
- Thomas K. & Heather Adamson
- ABC
- Dr. Seuss

Shared Book Learning Continued:
- Hop on Pop
- Dr. Seuss
- What Makes a Rainbow
- Betty Ann Schwartz

Forward Thinking:

Easter Party: March 27, 2013
Preschool Graduation: May 08, 2013

Letters that will be worked on during the week of March 25 is M. The following week the letter that will be worked on will be O.

Lessons We have Learned:

- We learned about important road signs.
- We learned how to measure using an inch, a foot, and a yard.
- We learned about rhyming.
- We learned what a city versus the country is.
- We learned our Primary & Secondary Colors.

We also are working on Dolch sight words. We have these words up on the walls for the children to practice in the area you wait to come into the preschool in the morning. It you would like to quiz your child on these sight words and make it a game with them in the morning, they are available to your use while waiting for preschool to start.

We would like to give thanks to all of the parents, grandparents, and loved ones for the delicious snacks that you have been providing, along with additional supplies you all have been bringing in to make our Easter party so special for the kids.
