Parking Permits

The University has a managed parking system that requires anyone who will have a vehicle on campus to register it and purchase a parking permit. The exception is for those individuals who are on campus for only a few hours each week who may elect to pay hourly in the parking garage.

New students, who have registered for classes and received their Cal U email login and password may access parking account information located under “Quick Links” on the Cal U main webpage. Once there, a student may register a primary vehicle and up to two additional vehicles such as a parent’s car or motorcycle. Doing so provides flexibility for moving a permit hang tag to another vehicle if necessary. The additional vehicles must be registered to a student’s permit.

When purchasing a permit, new students may elect to purchase a LOT 24 Roadman Park permit online via the University website. The permit is mailed in advance of the start of the semester. At this time students may also place themselves on a waitlist for other lots on campus, if or when any become available.

Students living at Vulcan Village will be issued a permit as part of their lease, which is valid only for Vulcan Village parking. Vulcan Village residents who wish to park on campus have the option to purchase an on-campus permit.

During the first week of the semester the Parking and Transportation Department may have permits that have not been assigned and are made available to those students who want to switch from LOT 24 to another campus location. These are sold during the open sale that occurs that first week in the Parking and Transportation Office located in Manderino Library, Room 123.

Students should watch campus-wide announcements for important reminders about permit renewal periods and other transportation information. Note: Permits are the property of the University and must be returned once the student is no longer paying to park on campus.
