

	08/22/2022 - 12/02/2022 - Deadline for acceptance is August 17, 2022			
AHSC	Current Health Issues	30103	115	Current Health Issues is a course designed to convey information concerning the individuals role in establishing a healthful lifestyle as well as encouraging prevention of disease and a focus on healthful living. The basic themes from the text include personal responsibility, a commitment to prevention, practical applications of knowledge, and a focus on behavioral change.
AHSC	Medical Terminology	30113	225	The study of medical terminology introduces students to the language of medicine. Students will gain an understanding of basic elements, rules of building and analyzing medical words, and medical terms associated with the body as a whole. Using a systems-approach, the student will define, interpret, and pronounce medical terms relating to structure and function, pathology, diagnosis, and clinical procedures, oncology, and pharmacology. In addition to medical terms, common abbreviations applicable to each system will be interpreted.
AHSC	Human Anatomy & Physiology I	30101	110	This course entails the study of the structures and functions of the human body. The course takes a systematic, level of complexity approach, beginning on the sub-cellular level and progressing to the study of entire organ systems. Specific systems that are studied include the integumentary, cardiovascular, lymphatic, gastrointestinal, respiratory, urinary, endocrine, and reproductive.
AHSC	Human Anatomy & Physiology II	30104	120	This course, a continuation of Human Anatomy and Physiology I, entails the study of the structures and neuromuscular functions of the human body. The course takes a systematic approach to the study of the anatomy and physiology of the bones, joints, muscles and nerves. Laboratory experiences reinforce the didactic portion with prosected human cadavers, human skeletons, and a variety of anatomical models.

CART	Intro to Graphic Design	30752	250	Introduces graphic design, typography, and computer graphic modes and functions. Focuses on state-of-the-art industry software and creativity. Each semester.
ECRI	Intro to Criminal Justice	32108	100	This course provides a broad overview of the theory, structure, development, and performance of the American system of criminal justice. Topics include, among others, the concept of crime; criminal behavior; American criminal law; constitutional limits on government power related to crime and justice; and the theory structure, and practice of policing, adjudication, and corrections.
ACDC	Public Speaking	32578	113	This course is designed to develop the knowledge and skill necessary for preparing and presenting extemporaneous speeches to accomplish informative and persuasive goals on issues of civil, political, or cultural importance. Course topics include audience analysis, research, organization, language use, and delivery that facilitate effective communication with audiences.
ACSC	Personal Productivity Software	30780	101	This course provides a structured laboratory experience designed to develop and enhance a student's proficiency in using selected Windows microcomputer application software packages.
ACSC	Internet Concepts	30338	201	This primarily hands-on course will review computer system concepts, will introduce the student to all facets of the Internet, and will develop a student's proficiency in Web page design and publishing.
AENG	English Composition I	31322	101	Composition I is a sequel to English Language Skills. It provides guided practice in writing, with emphasis on thoughtful analysis of subject matter, clear understanding of the writing situation, flexible use of rhetorical strategies and development of stylistic options, particularly those related to an understanding of a variety of purposes and voices. ENG 101 continues the development of the essential writing, reading and thinking skills stressed in ENG 100.

CFIN	Intro to Finance	30475	170	Fundamentals of personal and small business finance. Calculation of time value of money, growth rates, discount rates, bond values, and net worth. Analysis of credit and computation of business cost of capital. Elementary risk and insurance analysis. Introduction to investments. Application of calculation skills to solve for loan payments, amount of savings for future purchases, what to pay for an annuity or other investment, amount of and savings needed to retire on a fixed income.
EECO	Principles of Macroeconomics	30461	225	This course is an introduction to the study of the economy as a whole. Important topics include the determination of national income, the problems of inflation and unemployment, international trade, and economic growth. Simple models used to study the macroeconomy will be introduced and used to study changes in key variables. Emphasis is placed on the roles of monetary and fiscal policy in the conduct of macroeconomic policy.
CGEG	Intro World Geography	30943	100	Provides an overview of important human and physical characteristics of the world's cultural realms. Examines issues of economic and social development, and religions and cultures found around the world in a regional or systematic context. Explores contemporary environmental, political, and ethnic/racial problems.
ASPN	Elementary Spanish I	30973	101	This course is designed for the student without previous knowledge of Spanish who wishes to achieve a command of language fundamentals. Acquisition of speech skills in the classroom is reinforced in the language laboratory. Progressively greater emphasis is placed on reading and writing.
AHIS	US History Since 1877	30986	102	American history from the Pilgrims to the age of modern industry: the Colonial heritage, American Revolution, the emergence of a new nation, westward expansion, Civil War and postwar Reconstruction.

AMAT	College Algebra	31722	181	Fundamental operations; factoring and algebraic fractions; exponents and radicals; functions and graphs; equations and inequalities; properties of graphs; systems of linear equations; synthetic division; rational zeros of polynomials; and logarithmic and exponential functions. *Must meet prerequisite requirement
APSY	General Psychology	31128	100	This course is an introduction to the scientific study of behavior and mental processes. It explores topics such as the biological basis of behavior, research methods, learning, emotions, cognitive processes, perception, personality, abnormal behavior and the treatment of mental disorders. Research as well as practical application is stressed.
ASOC	Principles of Sociology	30163	100	This survey course permits students to explore the rich variety of topics studied by sociologists. Central to all the topics are the structures and processes of human interaction. Emphasis is placed on the relationship of natural and social factors in human behavior. Attention also is given to topics such as the meaning and function of culture; the origin, function and characteristics of social institutions; and the genesis and nature of social pathology. Sociologists investigate groups, organizations, and societies, and how people interact within these contexts. It is an expanding field whose potential is increasingly tapped by those who craft policies and create and evaluate programs. Sociology is an active science: The concepts, theories, and research methods of sociology can be used in practical, concrete ways to create a better world, or simply a better corner of the world.
