Disclaimer
This catalog is neither a contract nor an offer of a contract. The information it contains was accurate when it was printed and/or placed on the Internet. Fees, deadlines, academic requirements, courses, degree programs, academic policies and other matters described in this catalog may change without notice. Not all courses are offered each academic year, and faculty assignments may change. This catalog is updated annually.
California University of Pennsylvania has been a place of opportunity for more than 165 years. Since the institution was founded in 1852, students have come to California to build a strong academic foundation, fulfill their personal potential and prepare for successful careers.

Today, Cal U offers a high-quality academic experience, whether students are on campus or online. Undergraduates choose from among more than 100 programs of study, while graduate-level degree, certificate and professional certification programs offer opportunities for advanced study and professional growth.

Cal U faculty members are experts in their fields. Although many professors are involved in research or other scholarly pursuits, their passion is teaching. Working side by side with a team of student support professionals, our faculty members are committed to empowering students to become confident, successful learners.

Many academic programs include hands-on components, and students are encouraged to extend their learning beyond the classroom. Through practical, applied learning activities, Cal U students engage with and serve the community, putting their education to work as they address real-world issues. Both the Career and Professional Development Center and the Internship Center give our students a competitive advantage as they prepare to enter the workplace.

Cal U is a student-centered university, and we understand the importance of a vibrant and inclusive campus environment. University housing is second to none. Students may choose to live in one of the secure, comfortable residence halls on our main campus, or enjoy apartment-style living in Vulcan Village, just over a mile away on our upper campus.

More than 100 student clubs and organizations offer leadership opportunities and a broad range of activities. The Herron Recreation and Fitness Center is open daily for individual workouts, group fitness classes and intramural sports. On the upper campus, Roadman Park and the Student Association's SAI Farm host athletic contests and outdoor recreation, as well as academic projects and fieldwork. Renowned speakers, performers and entertainers visit our campus regularly, creating an atmosphere rich in culture and creativity.

Cal U is proud to be a diverse, caring and scholarly learning community, dedicated to academic excellence. We strive to support each student and to graduate knowledgeable, confident, career-ready professionals. Inspired by our core values of integrity, civility and responsibility, we give our students the tools and teaching they need to rise up and achieve.

As University President and a proud alumna of this great University, I invite you to build your future at Cal U.

Sincerely,

Geraldine M. Jones
About California University

California University of Pennsylvania lies within the borough of California, a community of approximately 6,800 residents located on the banks of the Monongahela River, less than an hour's drive south of Pittsburgh. It is accessible via Interstate 70 Exits 15 (PA 43), 16 (Speers) or 17 (PA 88, Charleroi) or via U.S. 40 (PA 43 or 88). The Mon Valley Fayette Expressway (PA 43) links California to the federal Interstate Highway System. The University is approximately 30 minutes from Exit 8 (New Stanton) of the Pennsylvania Turnpike, and an hour from Pittsburgh International Airport.

The main campus consists of 98 acres, including the Phillipsburg annex. The 98-acre recreation complex, George H. Roadman University Park, is located just over a mile from campus. This complex includes a football stadium, an all-weather track, tennis courts, a baseball diamond, a softball diamond, soccer and rugby fields, a cross country course, areas for intramural sports and picnic facilities.

Adjoining Roadman Park is the 98-acre SAI Farm, purchased in 2010. The parcel includes a cross country course, recreation space and a farmhouse that has been renovated for student meetings. Together, Roadman Park and the SAI Farm comprise the University's upper campus.

In the University's award-winning residence halls, students enjoy the comfort and convenience of on-campus living, usually sharing a bathroom with no more than one other person. All residence halls are air-conditioned and have state-of-the-art sprinkler and security systems.

Roadman Park is the site of an upper-campus University housing complex, Vulcan Village, whose residents live in attractive, furnished garden-style apartments. Most have individual baths, living room, dining area, completely furnished kitchen (including dishwasher and microwave) and full-size washer and dryer. Vulcan Flyer shuttles make it easy for Vulcan Village residents to ride to and from the main campus.

The geographic location of the University gives the resident student opportunities to explore and pursue a wide variety of activities. The University is a short drive from scenic locations for camping, hiking, fishing, hunting, white-water rafting, canoeing and skiing. In addition to varied cultural activities on campus, students have easy access to the Pittsburgh metropolitan area, located only 35 miles north of the campus. This provides an opportunity to enjoy the Pittsburgh Symphony Orchestra; the Pittsburgh Ballet; the Civic Light Opera; the David L. Lawrence Convention Center; the Pittsburgh Steelers, Penguins and Pirates; various museums; and all of the excitement and attractions of a major metropolitan area.

History

The institution that is now California University of Pennsylvania began as an academy in 1852. It has evolved over the years into a comprehensive university, one of the 14 state-owned institutions that comprise Pennsylvania's State System of Higher Education.

1852: A two-story academy, offering education from kindergarten through college, is established in the recently founded community of California, Pa.

1865: The academy obtains a charter as a normal school for its district and becomes a teacher-preparatory institution.

1874: The institution is renamed the South-Western Normal School.

1914: The commonwealth acquires the institution and renames it the California State Normal School. The curriculum becomes exclusively a two-year preparatory course for elementary school teachers.

1928: The institution becomes California State Teachers College, returning to its previous status as a four-year-degree-granting institution, concentrating on industrial arts and special education.

1959: Liberal arts curricula are introduced and the college becomes California State College.

1962: A graduate program is introduced.
Graduate Catalog

1974: The college develops a special mission in science and technology.

1983: On July 1, 1983, the college becomes part of the Pennsylvania State System of Higher Education and changes its name to California University of Pennsylvania.

1983: The College of Science and Technology becomes fully operational.

1996: The College of Science and Technology is renamed the Eberly College of Science and Technology, honoring the Eberly Foundation for its philanthropic generosity.

1998: The University formally adopts three core values: integrity, civility and responsibility.

2002: The University Council of Trustees formally adopts a list of rights and responsibilities.

2004-2007: The University responds to student needs and completely redesigns the concept of residence life. Six suite-style residence halls are constructed on the main campus, and an apartment complex now known as Vulcan Village is constructed on the upper campus.

2009: After a major renovation and expansion project, Herron Recreation and Fitness Center is re-dedicated.

2010: The Student Association Inc. purchases SAI Farm and begins developing the location as a site for student recreation, learning and meetings.

2011: The Phillipsburg Soccer Facility is dedicated.

2012: Geraldine M. Jones is named acting President of the University; she is named interim President the following year.

2013: In May, the former Residence Hall A is renamed the G. Ralph Smith II Honors Hall in recognition of a former English professor whose bequest to the University is the largest in its modern history. In October, the former Residence Hall C is renamed Ivan ’41 and Adelaide Ivill ’38 Guesman Hall in honor of the philanthropic alumni couple.

2015: Natali Student Center is re-dedicated after a two-year renovation and expansion project.

2016: Geraldine M. Jones is inaugurated as California’s seventh President.

2017: Renovations begin at Coover Hall, which houses the Department of Applied Engineering and Technology, plus courses in art and graphic design. It is scheduled to reopen in fall 2019.

2018: The largest gift in the institution’s history establishes the Rutledge Institute for Early Childhood Education, named for donors Karen and Tom ’77 Rutledge.

(Additional information about the University and its history may be found in the book California University of Pennsylvania: The People’s College in the Monongahela Valley, by Regis J. Serinko, published in 1992.)
Academic Organization
Under the direction of the provost, three undergraduate colleges and the School of Graduate Studies and Research administer the academic affairs of the University. Each of these divisions is administered by a dean who is responsible for the operation of the college or school.

- College of Education and Human Services
- College of Liberal Arts
- Eberly College of Science and Technology
- School of Graduate Studies and Research
Identity and Mission

Identity
California University of Pennsylvania, a comprehensive regional institution of higher education and a member of Pennsylvania’s State System of Higher Education, is a diverse, caring and scholarly learning community dedicated to excellence in the liberal arts, science and technology, and professional studies that is devoted to building character and careers, broadly defined. The University is inspired by its core values of Integrity, Civility and Responsibility and is guided by its Bill of Rights and Responsibilities:

- We have the right to safety and security;
- We have the responsibility to ensure the safety and security of others;
- We have the right to be treated with respect;
- We have the responsibility to treat others with respect;
- We have the right to expect the best;
- We have the responsibility to give our best;
- We have the right to be treated fairly;
- We have the responsibility to treat others fairly.

Vision
Supporting the vision of Pennsylvania's State System of Higher Education, California University of Pennsylvania will exemplify academic excellence, innovation, service, personal growth and social justice for all.

Mission
The mission of California University of Pennsylvania is to provide a high-quality, student-centered education that prepares an increasingly diverse community of lifelong learners to contribute responsibly and creatively to the regional, national and global society, while serving as a resource to advance the region’s cultural, social and economic development. Accordingly, the Cal U Strategic Plan 2015-2020 looks to our mission for inspiration and guidance.

This strategic plan is designed to empower the University to serve as a resource in the region and the Commonwealth. The strategic plan consists of five goals, with 17 objectives (strategies) that are designed to enable the strategic plan to be a "living document" that will lead California University of Pennsylvania into the future.

The strategic plan focuses the University on three key initiatives to assure the success of the University in the coming years. Those initiatives are:

- Enhancing the academic excellence and experience of our students.
- Operating with sound and efficient fiscal and governance practices.
- Achieving optimal enrollment in these challenging times.

Legacy
Founded in 1852, and now in its second 150 years of service, the University is committed above all to academic excellence and intellectual rigor in the context of personal and institutional Integrity, Civility and Responsibility.

Adopted by the Council of Trustees of California University of Pennsylvania on June 4, 2003.

Program Requirements

Foundation Courses: Applicants who do not possess an undergraduate degree with an accounting major may also be required to take one or more of the three foundation courses:

- ACC 200  Financial Accounting (3 credits)
- ACC 301  Intermediate Accounting I (3 credits)
Academic Programs

- **ACC 302** Intermediate Accounting II (3 credits)

Program Notes

- ACC 200 (Financial Accounting) is a prerequisite for Intermediate Accounting I.
- ACC 301 (Intermediate Accounting) is a prerequisite for Intermediate Accounting II.

Administrative Program for Principals

Master of Education: Administrative Program for Principals - Credits: 30 (program code: 0971)

Certification: Administrative Program for Principals - Credits: 24 (program code: 0977)

Program Description

Cal U's administrative program for principals (ADP) is an ideal program for working professionals who want to make a difference in education. This part-time, online program is practice-centered, performance-based and designed to provide a personalized approach in meeting the needs of all students, whether they are seeking a principal's certificate or a master's degree in education or simply wish to continue to enhance their teaching and leadership skills. The program has two tracks: K-12 principal certification only (24 credits) and the Master of Education with K-12 principal certification (30 credits). At Cal U, K-12 principal certification can be pursued as an integrated part of the master's degree or as a separate certification-only track for people who have previously obtained a master's degree. The K-12 principal certification and master's degree require the same core courses, but an additional two prescribed courses (6 credits) are required of those candidates pursuing the master's degree.

Completion of an approved certification program is one requirement for certification in Pennsylvania. In the certification process, the University informs the state that a student has completed the University's state-approved program. The state then reviews the student's credentials and determines eligibility for certification. We encourage all students to review the Pennsylvania Department of Education certification requirements before beginning Cal U's program for further information about certification requirements in Pennsylvania. The endorsement for certification process must be initiated by the student once they have met all state requirements.

Students seeking certification in a state other than Pennsylvania must check their respective state Department of Education requirements and whether completing the principal program at Cal U will be accepted. Out-of-state students seeking Pennsylvania certification are required to notify the department of that intent in order to meet the Pennsylvania certification expectations. Additional information related to Pennsylvania certification can be found on the Pennsylvania Department of Education website: www.education.state.pa.us/portal/server.pt/community/pennsylvania_department_of_education/7237.

Delivery Mode

Global Online (100 percent online delivery)

Classes are conducted online with field experiences and internships taking place at the student's school site.

Program Accreditation

Approved by the Pennsylvania Department of Education, this online program meets state educational requirements for certification as a principal. The program complies with Interstate School Leaders Licensure
Academic Programs

Consortium (ISLLC) and Educational Leadership Constituent Council (ELCC) standards, and may be used to meet certification and professional development requirements in other states.

Academic Programs

Transfer Credits
Requests for transfer credit must occur once a student is officially accepted into the program and prior to beginning any coursework. At that time, contact the program coordinator for information on the transfer credit review process.

Advisement
Candidates in the ADP program receive academic and professional advisement throughout their enrollment in the program. Each candidate is assigned to an academic adviser from the time they are accepted into the program of study. Advisers work with candidates to discuss, monitor and provide counseling as it relates to their program of study.

Advanced Studies in Secondary Education and Teacher Leadership

Master of Education: Advanced Studies in Secondary Education and Teacher Leadership - Credits: 30 (program code: 0972)

Program Description

Advanced studies in secondary education and teacher leadership is a graduate program for middle and high school teachers. The 30-credit Master of Education degree program is aligned with the National Board for Professional Teaching Standards (NBPTS) and the national board certification process. In less than two years, students can earn a master's degree while becoming well informed about the national board certification process. The courses and activities use data from teachers’ own practices to reflect on their work and the work of their students to develop a deeper understanding of student learning. At the completion of this program, graduates will have a "jump start" if they decide to apply for national board teaching certification.

Delivery Mode

Global Online (100 percent online delivery)

Accreditation

Applied Behavior Analysis
Master of Education: Applied Behavior Analysis: Autism track - Credits: 33 or 39 (program code: 0744)

Master of Education: Applied Behavior Analysis: General track - Credits 33 or 39 (program code: 0759)

Certificate: Board Certified Behavior Analyst Preparation - Credits 18 or 27 (program code: 0758)

Program Description
Board certified behavior analysts address the behavioral and instructional needs of individuals in a wide variety of settings. Applied Behavior Analysis is recognized as a best practice for the instruction and behavioral management for individuals with exceptionalities.

Delivery Mode
Global Online (100 percent online delivery)

Practicum
California University of Pennsylvania has designed an Intensive Practicum for the Applied Behavior Analysis program to give students a wide range of potential placement options upon completion. Students will have the opportunity to study under Board Certified Behavior Analysts while applying the content they have covered during their coursework.

Practicum Placement Sites:

- Public and private school settings.
Academic Programs

- Individualized home programming sites.
- Other mental health-related settings throughout Allegheny, Fayette and Washington counties.

Practicum Placement Site Tasks:

- Conducting behavioral assessments.
- Designing education and behavioral programs.
- Conducting preference assessments.
- Developing behavior support plans.
- Creating data collection procedures.

Please Note: Students must first complete ESP 701 prior to being permitted to enroll in intensive practicum.

* Students have the option of taking ESP 639 or ESP 754, depending on whether or not Cal U is supervising their practicum hours needed to sit for the BCBA exam or they are being supervised privately.

For students who are being supervised by Cal U, they can take up to nine hours of ESP 754 in order to accumulate enough supervised hours to sit for the BCBA exam. These students can graduate with up to 39 credits.

Students who are being supervised privately will not take ESP 754 but instead will take ESP 639. These students will graduate with 33 credits.

**Experiential Component**
In the capstone course experience, students in the PSM in Applied Mathematics program apply what they have learned in the classroom to real-world situations, gaining experience and confidence in the workplace. Students will effectively manage a project, design a solution and effectively communicate results to business partners and to faculty.

**Advisement**
Students in the applied mathematics program receive academic and professional advisement from the program coordinator and program faculty. Each student is assigned to an academic adviser from the time they are accepted into the program of study. Advisers work with students to discuss, monitor and provide advisement as it relates to their program of study.

**Autism Spectrum Disorders**

**Master of Education:** Special Education: Autism Spectrum Disorder - Credits: 30 (program code: 0749)

**Certification Preparation:** Autism Spectrum Disorders (currently certified in Special Education) - Credits: 12 (program code: 0752)

**Certificate:** Autism Spectrum Disorder - Credits: 12 (program code: 0751)

**Program Description**
The autism spectrum disorders program directly addresses the needs of today's educators and professionals who are working with individuals with autism spectrum disorders throughout the lifespan. This program will prepare candidates to add ASD certification to existing certification in special education or to receive a certificate for students with the desire to obtain knowledge in autism awareness, as well as personal and professional development.

This program provides specialized preparation in ASD through an innovative 12-credit-hour graduate program endorsement in ASD that has the provision of socialization opportunities for individuals with ASD and educational outreach materials and resources for parents and community members at its core.

Students can begin this program any term and complete within one year. Courses are offered one in the fall, two in the spring (eight weeks each) and one in the summer, and are completed all online.

**Autism Spectrum Disorders (currently certified in special education):** This 100 percent online program is specialized to extend the professional development of applicants who have earned a graduate degree or certificate in special education and would like to add the ASD endorsement to their current certification. Upon completion, the student will be eligible to add ASD endorsement to his/her current teaching certificate in special education.

**Autism Spectrum Disorders Certificate (not certified in special education):** Students who do not currently hold special education certification, including educators with certification in any area, other education professionals, family members of individuals with ASD and others, can complete the four-course, 12-credit online program for professional development, but will not be able to apply for ASD endorsement.

**Delivery Mode**
Online (100 percent online delivery)
**Academic Programs**

**Accreditation**
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)

Approved by the Pennsylvania Department of Education

### Advisement

Students in the autism spectrum disorders program receive academic and professional advisement from the program coordinator and program faculty. Each student is assigned to an academic adviser from the time they are accepted into the program of study. Advisers work with students to discuss, monitor and provide advisement as it relates to their program of study.

Business Administration  
Master of Business Administration (MBA) - Credits: 36 (program code: 0328)

Master of Business Administration (MBA) Business Analytics - Credits: 36 (program code: 0829)

Master of Business Administration (MBA) Entrepreneurship - Credits: 36 (program code: 0827)

Master of Business Administration in Healthcare Management - Credits: 36 (program code: 0821)

Master of Business Administration in Nursing Administration and Leadership - Credits: 36 (program code: 0828)

Certificate - Business Analytics - Credits: 15 (program code: 0329)

Mission  
It is the mission of the Department of Business and Economics to provide high quality undergraduate and graduate education in the business disciplines that actively engages students in the learning process, combines contemporary academic theory with relevant applications and experiential learning and offers the global perspective necessary for today's business professionals.

We achieve our mission through our distinctive programs, a high level of student-faculty interaction, highly qualified faculty committed to scholarly activity and professional development and with the assistance of a network of alumni and community partners. We prepare students with the skills needed for today and for a future that will require life-long learning.

Vision  
The Department of Business and Economics will be a leader in business education, engaging pedagogy, applied research and community engagement by building on our strengths and leveraging partnerships with students; alumni; faculty from other disciplines; and industry and community leaders.

Program Description  
The Master of Business Administration (MBA) program provides advanced study in business theory and practice designed for those who want to advance their careers in management. Courses in the MBA program integrate information and theories from across the business disciplines, including accounting, economics, finance, marketing, management and quantitative methods. The goal of the program is to develop business professionals who are equipped with modern decision-making tools to achieve an organization’s strategic goals.

Prerequisites  
Applicants who do not possess an undergraduate degree with a business major may also be required to take one or more of these foundation courses:

- ACC 200: Financial Accounting
- ECO 201: Principles of Microeconomics OR ECO 100: Elements of Economics
- MAT 225: Business Statistics OR MAT 215: Statistics
**Academic Programs**

Students in the Nursing Administration and Leadership concentration may use MAT 205: Statistics for the Health and Social Sciences to fulfill the Statistics foundation requirement.

**Delivery Mode**
Two options are offered:

- Traditional (a combination of face-to-face delivery and online courses) - MBA
- Global Online (100 percent online delivery) - Four options: MBA Business Analytics, MBA Entrepreneurship, MBA in Nursing Administration and Leadership, MBA in Healthcare Management

**Awards**
Achievement is recognized in several ways. Membership is open to qualified successful students in Omicron Delta Epsilon, the International Honor Society for Economics; and Sigma Beta Delta, the International Honor Society for Business, Management and Administration and the Student Accounting Association.

The M. Arshad Chawdhry Memorial Leadership Award is given each year to a student completing the Master of Business Administration (MBA) degree who has demonstrated exceptional leadership qualities and scholarly accomplishment in the MBA program.

**Accreditation**
Programs in the Department of Business and Economics are accredited by ACBSP.

The Accreditation Council for Business Schools and Programs (ACBSP) is a leading specialized accreditation body for business education supporting, celebrating, and rewarding teaching excellence. The association embraces the virtues of teaching excellence and emphasizes to students that it is essential to learn.

**Additional Requirements**
All students entering the program are required to satisfactorily pass a department-approved academic writing tutorial within their first semester of graduate study.

To successfully complete the program, students are required to pass a comprehensive exam.

Communication Disorders
Master of Science: Communication Disorders - Credits: 56 (program code: 0303)

Program Description
The Master of Science degree provides specialized training in all areas of communication disorders. Graduates are qualified to provide clinical services to individuals of all ages in a variety of settings, including public and private schools, hospitals, rehabilitation centers, government agencies, private practice, etc. The University has excellent facilities, including a large clinic and a Learning and Language Center located within the department, along with a technologically advanced Communication Science Laboratory. This academic program can be completed in two years (five consecutive terms).

Delivery Mode
Traditional (face-to-face delivery with some online/distance elements)

Accreditation
The master's program in communication disorders (speech-language pathology) at California University of Pennsylvania is accredited by:

Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association
2200 Research Blvd.
Rockville, MD 20850-3289
Phone: 800-498-2071
Fax: 301-296-8580
www.asha.org

Criteria for Continuing in the Program
Students move through the program as a cohort. Each cohort completes an identical core of required courses that are critical to successful functioning as a speech-language pathologist (SLP). In addition to those courses, each cohort completes a unique combination of additional courses, guaranteeing that there are SLPs throughout the nation to provide the many areas of specialized service needed by very diverse patient populations. Students must maintain a minimum 3.00 GPA while in the program. Students who fail to maintain a 3.00 GPA will not be permitted to complete the candidacy interview or register for an externship placement. Failure to reacquire a 3.00 during the single probationary semester may result in dismissal from the program.

Counseling - Addictions Counseling
Certificate: Addictive Disorders - Credits: 9 (program code: 0863)

Program Description
Addictions counselors work with clients to determine addictions and mental health issues and lead them on a path to recovery and eliminating triggers. Add the Addictive Disorders graduate certificate to a master’s degree in Clinical Mental Health Counseling or School Counseling. Professionals in the addictions counseling field work as counselors, addictions experts, group support leaders and educators.

This certificate is appropriate for anyone interested in learning more about addiction. It is beneficial to individuals in education, mental and behavioral health, criminal justice, medical professions, employee assistance programs and other fields that work with individuals affected by addiction.
Academic Programs

Counseling - Clinical Mental Health Counseling

Master of Science: Clinical Mental Health Counseling - Credits: 60 (program code 0720)

Post-Master’s Certification: Counselor Education - Credits: Variable (program code: 0701)

Program Description
The Master of Science in Clinical Mental Health Counseling prepares students to work as professional counselors in a variety of behavioral health and social service settings.
Academic Programs

The program fulfills the degree requirements necessary to become a National Certified Counselor (NCC) and a Licensed Professional Counselor (LPC), as well as being able to take the National Counselor Examination (NCE). Students completing the 60-credit master's degree program will meet the educational requirements required to become Licensed Professional Counselors in Pennsylvania (Pennsylvania Licensure Act 136 of 1998). Students will need two or more additional years of supervised work experience after graduation to complete the requirements for LPC.

Delivery Mode
Traditional (on-ground, face-to-face delivery with some online/distance elements)

Accreditation
Council for the Accreditation of Counseling and Related Educational Programs (CACREP)

This program fulfills the master's degree requirements for:

- National Certified Counselor (NCC)
- Licensed Professional Counselor (LPC) in Pennsylvania

Curriculum - Master of Science: Clinical Mental Health Counseling

### Curriculum - Post-Master's Certification: Counselor Education

<table>
<thead>
<tr>
<th>Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>The curriculum for this program varies by student. Courses taken will assist students in fulfilling the requirements necessary to become a Licensed Professional Counselor (LPC).</td>
</tr>
</tbody>
</table>

---

#### Practicum/Clinical Field Experience

Practicum and clinical field experience are taken near the end of the student's program. Practicum requires a minimum of 150 hours on-site. The student will be supervised by a professional in their area of interest. The clinical field experience requires a minimum of 600 hours under the supervision of a professional in the student's area of interest. This will be arranged in consultation with the field site coordinator.

#### Post-Master's Preparation for Licensure Application

After completion of a master's in counseling or a related field, students are often required to complete additional credits in order to obtain their LPC (Licensed Professional Counselor) licensure. The counselor education post-master's program is a non-degree program designed to provide the opportunity for students to complete courses after their master's degree to total 60 credits, as required to become an LPC in Pennsylvania (Pennsylvania Licensure Act 136 of 1998). Two or more additional years of supervised work experience after graduation is also required to complete the LPC. LPC or individuals with a master's degree can apply for post-master's to meet ACT 48 or continuing education requirements.

The department will evaluate your transcripts and advise which courses are required. Students should contact their licensure board to verify their eligibility and requirements for licensure.

Admission requirements are the same as above for entrance into the master's degree program.
Academic Programs

Advisement
Students in the clinical mental health program receive academic and professional advisement from the program coordinator and program faculty. Each student is assigned to an academic adviser from the time they are accepted into the program of study. Advisers work with students to discuss, monitor and provide advisement as it relates to their program of study.

Counseling - School Counseling
Master of Education: School Counseling - Credits: 48 (program code: 0151)

Certification Only: School Counseling - Credits: 48 (program code: 0157)

Program Description
School counseling programs at California University of Pennsylvania are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Through the University, the Middle States Association of Colleges and Post-Secondary Schools accredits the Department of Counselor Education. The Council for the Accreditation of Educator Preparation (CAEP) accredits the school counseling programs (elementary and secondary school guidance). Courses offered by the Department of Counselor Education have been approved by both the National Board for Certified Counselors and by the Pennsylvania Department of Education for certification and continuing education credits (Act 48). The department is authorized by the Commonwealth of Pennsylvania Department of Education to offer certification programs in PK-12 School Counseling.

Our Master of Education program in school counseling fulfills the degree requirements needed for the National Counselor Examination (NCE), required to become a National Certified Counselor (NCC) and Licensed Professional Counselor (LPC). Students also have the option of taking an additional 12 credits before or after graduation to total 60 credits, also required to become an LPC in Pennsylvania (Pennsylvania Licensure Act
Academic Programs

136 of 1998). Students will need two or more additional years of supervised work experience after graduation to complete the requirements for LPC.

Students who hold a master's degree in another discipline may decide to seek certification. The department will evaluate their transcripts to determine which courses are required.

Counseling - Spiritual, Ethical, and Religious Counseling
Certificate: Spiritual, Ethical, and Religious Counseling - Credits: 9 (program code: 0861)

Program Description
The Spiritual, Ethical, and Religious Counseling program is a 9-credit Certificate that prepares students and practitioners to better serve populations in a variety of counseling and ministry settings, including hospitals, private practice, community agencies, churches, rescue missions, shelters or faith-based counseling centers. This certificate program is also well-suited for individuals serving unique populations, such as military, hospital or sports chaplains. This program will provide competencies in four core areas of study:

1. Self-awareness and knowledge of applied theory to practical contextual settings of spiritual, ethical and religious counseling;
2. Ethics in spiritual and religious counseling;
3. Grief and loss counseling and care, and/or contemporary spiritual, ethical and religious perspectives in counseling;
4. The integration and application of spiritual, ethical and religious counseling skills into the counseling and ministry process.

Delivery Mode
Global Online (100% online delivery)

Counseling - Sports Counseling and Student Athlete Mental Wellness
Certificate: Sports Counseling and Student Athlete Mental Wellness Certificate - Credits:12 (program code: 0935)

Program Description
Sports counseling is a process that assists individuals in maximizing their personal, academic and athletic potential. Sports counseling is accomplished through a proactive, growth-oriented approach that incorporates the principles of counseling, career development, movement science, psychology and lifespan human development. Counselors, educators and other helping professionals should have specialized awareness, knowledge and skills beyond the basic counselor preparation as well as the ability to develop effective therapeutic relationships.

The sports counseling certificate program meets the particular interests and needs of a significant subsector of counselors, educators and other helping professionals who work with the athlete population in a variety of settings, including youth sports programs, interscholastic programs, colleges and universities, community and social agencies, professional sporting agencies, and recreational settings.

Note: The graduate certificate in sports counseling will not certify you as a professional counselor. However, it may be possible for the courses to be utilized for additional credits toward licensure or for continuing education credits. You may want to check your state's licensure laws for more information.

Criminal Justice Studies - MA Concentrations and Certificates

Master of Arts: Criminal Justice Studies: Applied Criminology - Credits: 30 (program code: 0964)

Master of Arts: Criminal Justice Studies: Forensic Linguistics - Credits: 36 (program code: 0965)

Certificate: Applied Criminology - Credits: 12 (program code: 0740)

Certificate: Behavioral Crime Analysis - Credits: 12 (program code: 0741)

Program Description

Cal U's 100 percent online Master of Arts in Criminal Justice Studies: Applied Criminology degree is on the forefront of presenting advanced criminological theories and examining the behavioral manifestations of violent offenders. By combining the best of criminal justice and applied criminology study, the program enables students to build a strong foundation of theoretical and research knowledge and skills. This provides students with the sophisticated techniques needed to apply this analytical framework to real-world situations. Students also learn to apply this theoretical framework to real-world situations involving criminal investigative analysis, equivocal death analysis and geographical crime analysis.

The program is taught by professors who blend scholarship with unmatched experience undertaking complex criminal investigations.
Academic Programs

Cal U's forensic linguistics master's degree concentration builds knowledge, skills and abilities in a specialized field. Forensic linguists primarily work as consultants, bringing their expertise to criminal and civil investigations, corporate and national security matters, legal proceedings, and analysis of evidence such as emergency phone calls, suicide notes, ransom demands and fraudulent documents.

Students may select to pursue the master's degree and two certificates. The two certificates may be completed separately or as part of the master's degree.

Cybersecurity
Professional Science Masters: Cybersecurity - Credits: 30 (program code: 0850)
Certificate: Cybersecurity - Credits: 12 (program code: 0851)

Program Description
The Professional Science Master's in Cybersecurity provides professionals with specialized knowledge in cybersecurity and related skillsets to meet the demands and challenges of economic and infrastructure security in a high-technology society. The curriculum emphasizes both fundamental knowledge in current cybersecurity practices and management/leadership abilities.

Delivery Mode
Global Online (100 percent online delivery)
Classes are conducted online with field experiences and internships taking place at the student's site.

Early Childhood Education
Master of Education: Teacher Education: Early Childhood Education without certification - Credits: 30 minimum (program code: 0913)
Academic Programs

Program Description
Early childhood education is a completely online graduate program for teachers who are certified in elementary, early childhood or special education and are interested in pursuing a Master of Education without certification. Graduate students in the early childhood education program apply knowledge of child development, families and best teaching practices to a variety of educational settings, including public schools Pre-K to grade 4 primary programs, preschool programs, Head Start, child care, and parenting and family support programs. This program is open to students with a bachelor’s, master’s or doctorate degree from an accredited program and teaching certification in N-3, K-6 and/or special education Pre-K-12.

Delivery Mode
Global Online (100 percent online delivery)

Accreditation
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)

Approved by the Pennsylvania Department of Education

Clearances
Pennsylvania Act 24, 34, 114, and 151 clearances (or appropriate clearances for non-Pennsylvania residents) are required for field-based course registration but not admission. Applicants may be admitted to the program but will not be able to register for field-based courses until all of the up-to-date clearances are submitted.

Education Administration and Leadership & Superintendent Letter of Eligibility
Doctor of Education: Education Administration and Leadership

• Ed.D. only - Credits: 39 (program code: 0451)
• Ed.D. + SLE - Credits: 57 credits (program code: 0450)

Superintendent Letter of Eligibility - Credits: 18-27 (program code: 0455)

Program Description
Education Administration and Leadership
The Doctor of Education in Education Administration and Leadership (EdD) with Superintendent Letter of Eligibility certification option is designed for individuals seeking their Superintendent Letter of Eligibility certification and doctorate. The program of study is comprised of three areas:

• Leadership and Research Courses
• Certification and Concentration Courses
• Capstone Project Courses

The online doctoral degree program provides education administrators with the knowledge and applied skills required to manage a school district or other academic enterprise.
**Academic Programs**

*Note: The Doctor of Education in Education Administration and Leadership (EdD Only) option is designed for individuals already holding their Superintendent Letter of Eligibility (SLE) certification. Students who have already completed the superintendent certification (and meet the admission requirements) will be granted advanced standing in the doctoral program.

**Superintendent Letter of Eligibility (SLE)**
The SLE program provides an opportunity for a graduate student to obtain certification in the Commonwealth of Pennsylvania as a superintendent. Although not required for admission to the program, certification by the state of Pennsylvania requires a minimum of six years of professional certified service in the basic schools, three years of which shall have been in administration or supervision. The three years of administrative or supervision experience must be completed before certification endorsement will be granted by the University.

Cal U's professional and knowledgeable faculty is drawn from the ranks of practicing school superintendents that represent the best of school leadership in southwestern Pennsylvania. All faculty members have extensive experience as teachers and administrators in area public schools.

**Delivery Mode**
Global Online (100 percent online delivery)

Classes are conducted online with field experiences and internships taking place at the student's site.

**Accreditation**
Approved by the Pennsylvania Department of Education, the Superintendent Letter of Eligibility certification program meets state educational requirements for certification as a superintendent. The program complies with Interstate School Leader Licensure Consortium (ISLLC) standards and Educational Leadership Constituent Council Standards (ELCC), and may be used to meet certification and professional development requirements in other states. The coursework has also been approved by the Pennsylvania Inspired Leadership Program (PIL).

**Curriculum - Doctor of Education: Education Administration and Leadership**
**Doctor of Education: Administration and Leadership (Ed.D. Only)**

</table>
Completion of an approved certification program is one requirement for certification in Pennsylvania. In the certification process, the University informs the state that a student has completed the University's state-approved program. The state then reviews the student's credentials and determines eligibility for certification. We encourage all students to review the Pennsylvania Department of Education certification requirements before beginning Cal U's program. The endorsement for certification process must be initiated by the student once they have met all state requirements.

Students seeking certification in a state other than Pennsylvania must check their respective state Department of Education requirements and whether completing the superintendent letter of eligibility at Cal U will be accepted. Out-of-state students seeking Pennsylvania certification are required to notify the department of that intent in order to meet the Pennsylvania certification expectations. Additional information related to Pennsylvania certification can be found on the Pennsylvania Department of Education website: www.education.state.pa.us/portal/server.pt/community/pennsylvania_department_of_education/7237.

**Special Program Requirements**

Although not required for admission, certification by the state of Pennsylvania requires a minimum of six years of professional certified service in the basic schools, three of which shall have been in supervisory/administrative position as defined by PDE. These three years must be completed before certification endorsement will be granted by the University. These can be obtained before, after or during participation in the program.

**Transfer Credits**

Request for transfer credit must occur once a student is officially accepted into the program and prior to beginning any coursework. At that time, contact the program coordinator for information on the transfer credit review process.

**Advisement**

Candidates in the SLE program receive academic and professional counseling throughout their enrollment in the program. Each candidate is assigned to an academic adviser from the time he/she is accepted into the program of study. Advisers work with candidates to discuss, monitor and provide counseling as it relates to their program of study.

Educational Leadership: Educational Studies
Master of Education: Educational Leadership: Educational Studies - Credits: 30 (program code: 0973)

Program Description
The educational studies program is a concentration in the Master's of Education in Educational Leadership degree. The 30-credit program, which is designed to be a master's degree-completion program, includes two required core courses, a 12-credit focus area, and a 12-credit cognate area. Applicants must have completed at least 12 credits of prior graduate courses from a single graduate education program with a grade of B or better. Upon entry into the program, the student must identify their focus area, which includes at least 12 credits in a single graduate education program. The student will provide a philosophy statement and rationale to be approved by the coordinator. Students prepare a portfolio in the focus area for faculty review related to accreditation and program review. The cognate courses are graduate courses that may be in several different disciplines related to the student's interests or their chosen focus. The program does not lead to teacher certification.

Delivery Mode
Global Online (100 percent online delivery)

Elementary Education Pre-K-Grade 4
Master of Education - Teacher Education: Elementary Education (Pre-K - Grade 4) with certification - Credits: 54 (program code: 0906)

Master of Education - Teacher Education: Elementary Education (Pre-K - Grade 4) without certification - Credits: 45 (program code: 0908)

Program Description
The elementary education program is designed for students who have a baccalaureate degree and are seeking a master's degree and Pennsylvania elementary education certification (grades Pre-K-4). This program is appropriate for students who wish to broaden their knowledge of elementary/early childhood education and teachers certified in other areas, and for those with an undergraduate degree outside of education.

Students who are not certified in Pennsylvania must pass the PECT test. It is possible to earn the master's degree and Pre-K-4 certification in the same program.

Students who hold Pennsylvania teacher certification may also satisfy Act 48 requirements by successfully completing graduate courses.

Candidates for Pennsylvania certification must have completed undergraduate or graduate coursework that includes the following:

- College-level mathematics (6 credits)
- English composition and American/British literature (3 credits/3 credits)
- Health and wellness (3 credits)
- Citizen: Geography, political or economy (3 credits)
- English language learners (3 credits)
- Instructional technology (3 credits)
- U.S. history (3 credits)
- Physical science (3 credits)
- Environmental/earth science (3 credits)
Academic Programs

- Biology (3 credits)

The courses listed above apply only to the Master of Education with certification program. Students entering the program without all, or part, of the undergraduate requirements may meet them with additional coursework or by competency tests while they are taking the graduate classes.

Delivery Mode
Traditional (on-ground, face-to-face delivery with some online/distance elements)

Accreditation
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)

### Advisement

Students in the Pre-K-4 education program receive academic and professional advisement from the program coordinator and program faculty. Each student is assigned to an academic adviser from the time they are accepted into the program of study. Advisers work with students to discuss, monitor and provide advisement as it relates to their program of study.

English as a Second Language (ESL)

Master of Education: Teacher Education: English as a Second Language with certification- Credits: 30 (program code: 0904)

Master of Education: Teacher Education: English as a Second Language without certification - Credits: 30 minimum (program code: 0914)

Certificate: English as a Second Language - Credits: 18 (program code: 0926)

Program Description
This online program is for certified teachers interested in English as a second language (ESL). The program offers three options:

- Master's degree with certification
- Master's degree without certification
- Certificate

The curriculum is aligned with the Pennsylvania Department of Education ESL Program Specialist Standards and Teachers of English to Speakers of Other Languages (TESOL) Standards. Graduate students in the ESL program apply knowledge in the following domains: language, culture, instruction, assessment and professionalism. In each domain, educators are challenged to develop professionalism in language education, promote individual language rights, provide accessible and high-quality education, develop collaboration in a global community, engage in research and reflective practice for educational improvement, and cultivate a respect for diversity and multiculturalism.

Delivery Mode
Global Online (100 percent online delivery)

Accreditation
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)
Approved by the Pennsylvania Department of Education

#### Exercise Science and Health Promotion

**Master of Science:** Exercise Science and Health Promotion 36-credit Concentrations:

- Group Fitness Leadership (program code: 0978)
- Nutrition (program code: 0984)
- Performance Enhancement and Injury Prevention (program code: 0954)
- Rehabilitation Science (program code: 0956)
- Sport Psychology (program code: 0958)
- Wellness and Fitness (program code: 0952)
- Wellness Coaching (program code: 0959)
Academic Programs

**Master of Science**: Exercise Science and Health Promotion: Applied Sport Science - 42 credits (program code: 0969)

**Post-Bachelor's 12-credit Certificate** options:

- Group Fitness Leadership (program code: 0979)
- Nutrition (program code: 0985)
- Performance Enhancement and Injury Prevention (program code: 0994)
- Rehabilitation Science (program code: 0996)
- Sport Psychology (program code: 0998)
- Wellness and Fitness (program code: 0992)
- Wellness Coaching (program code: 0983)

**Program Description**
The Master of Science in Exercise Science and Health Promotion is designed for working professionals and recent bachelor's degree graduates in the health and fitness industry, including certified athletic trainers, physical therapists, health and physical education teachers, coaches, chiropractors, personal trainers, business owners, wellness counselors, military personnel and other health/fitness professionals as well as individuals looking to change careers and enter the broad field of fitness and wellness. The University has worked closely with the National Academy of Sports Medicine (NASM) to develop outstanding course content. NASM was founded in 1987 by physicians, physical therapists and fitness professionals. Since its inception, the organization has expanded throughout the United States, Asia and Europe and has always focused on the development, refinement and implementation of superior educational programs for fitness, performance and sports medicine professionals.

**Note**: For the master's degree, one of the concentrations listed above must be selected. Seven 12-credit certificates are also available for applicants who possess a bachelor's degree.

Each option involves specific coursework preparing the student for one of three NASM certification examinations or the Wellness Coaches USA certification:

1. Certified Personal Trainer (CPT) (wellness and fitness concentration)
2. Performance Enhancement Specialist (PES) (performance enhancement concentration)
3. Corrective Exercise Specialist (CES) (rehabilitation science concentration)
4. Certified Wellness Coach (wellness coaching concentration)

Program length is 12 consecutive months (full time) or 18 months (part time) with a summer or winter start. Thirty-five students per class work, learn and communicate online and function as a group of interactive peers. This virtual community, or cohort, creates a lively, dynamic educational experience that enriches the collaborative skills essential in the contemporary health care and fitness workplace.

Advisement
Students in the exercise science and health promotion program receive academic and professional advisement from the program coordinator and program faculty. Each student is assigned to an academic adviser from the time they are accepted into the program of study. Advisers work with students to discuss, monitor and provide advisement as it relates to their program of study.

Program Website
https://www.calu.edu/academics/graduate/masters/exercise-science/index.aspx

For Additional Information
Email: calugo@calu.edu
Phone: 866-595-6348

Program Coordinator
Barry E. McGlumphy, Ed.D. (University of Pittsburgh), M.S. (University of Arizona), B.S. (Lock Haven University), Professor, Full-Time Faculty

Specializations: online education, sports medicine, athletic training
Webpage: https://www.calu.edu/inside/faculty-staff/profiles/barry-mcglumphy.aspx
Email: mcglumphy@calu.edu
Phone: 724-938-4356

Program Faculty
Carol M. Biddington, Ed.D., M.S., B.S. (West Virginia University), Associate Professor; Specializations: curriculum and instruction, health, physical education and safety, elementary education, gerontology; Research Interests: health promotion, diversity awareness, fitness
Academic Programs

William B. Biddington, Ed.D., M.S., B.S.P.E. (West Virginia University), Professor, Faculty Athletics Representative; Specializations: athletic training, health and wellness, sport management, curriculum development

Marc S. Federico, D.P.T., M.P.T. (Slippery Rock University), B.S. (University of Pittsburgh), Associate Professor; Specializations: corrective exercise, postural awareness/correction, muscular imbalance; Research Interests: spine, hip, shoulder rehabilitation/function/stabilization

Jeffrey R. Hatton, O.T.D. (Chatham University), M.S. (California University), B.S.O.T. (College Misericordia), B.S.Ed. (Lock Haven University), Assistant Professor; Specializations: business of fitness, fitness for special populations; Research Interests: meaningful activity to increase health-related quality of life

Linda P. Meyer, Ed.D. (Duquesne University), M.S. (West Virginia University), B.S. (Lock Haven State College), LAT (Licensed Athletic Trainer in Pennsylvania), ATC, Professor; Specializations: leadership, professional development, athletic training, exercise science; Research Interests: leadership, athletic training related subject matter, exercise science related subject matter

Laura L. Miller, Ph.D., M.S. (University of Southern Mississippi), B.S. (Pennsylvania State University - Behrend College), Associate Professor; Specializations: sport marketing, sport psychology, sport sales; Research Interests: consumer behavior in sport, marketing and sales techniques, disability in sport

Ben Reuter, Ph.D. (Auburn University), M.S.Ed. (Old Dominion University), B.A. (Gettysburg College), Associate Professor; Expertise and Research Interests: exercise science - training age group/masters athletes, injury prevention, strength and conditioning, endurance training.

Joni Lee Cramer Roh, Ed.D., B.S. (West Virginia University), M.A.T. (University of North Carolina at Chapel Hill), Professor; Specializations: athletic training/sports medicine, sport psychology, psychophysiology of injury and rehabilitation; Research Interests: psychophysiology of injury and rehabilitation, psychology of injury, psychology of rehabilitation, sport psychology performance enhancement and interventions; Memberships: NATA, PATS, MAATA, APA, AASP, KON; Professional Services: Second Vice Chair of the KON Executive Committee, KON Adviser at Cal U (Nu Omicron chapter); Ad hoc CAATE PPE Annual Review Team.

Christine Romani-Ruby, PT, MPT, ATC, PMA CPT; M.P.T. (Slippery Rock University), B.S. Exercise Science (Indiana University of Pennsylvania), B.S. Natural Science (Indiana University of Pennsylvania), Certificate in Athletic Training (West Chester University), Doctoral Candidate (Indiana University of Pennsylvania), Associate Professor; Licenses: Athletic Training, Physical Therapy and Direct Access Physical Therapy; Certifications: Certified Pilates Teacher by Pilates Method Alliance; Interests: wellness, injury prevention, posture, Pilates, body weight training, business

Ronald W. Wagner, Ph.D. (University of Arkansas), M.S. (Eastern Kentucky University), M.S. (Bloomsburg University), B.S. (Southeast Missouri State University), Associate Professor; Specializations: kinesiology, athletic training, instructional design, educational technology; Research Interests: sports performance training, cultural competence in athletic health care, functional movement screening

Ellen J. West, Ed.D., M.S. (West Virginia University), B.S. (California University of Pennsylvania), Associate Professor; Specializations: education leadership, chemical dependency counselor education, health education, athletic training, elementary education; Research Interests: acute care of injury and illness, wellness and fitness, worksite health programming, student-centered learning (constructivist approach), learning styles, psychology of sport, community-based approaches to promoting physical activity

Gifted Education Endorsement
Certificate: Gifted Education Endorsement - Credits: 12 minimum (program code: 0919)
Academic Programs

Program Description
This 12-credit PDE-approved endorsement program is designed to prepare certified instructors in the content, pedagogy and dispositions necessary for teaching gifted learners. This endorsement program documents knowledge in a new and emerging area where formal teaching certification does not exist. The endorsement is intended to improve a teacher’s skills in dealing with complex classroom settings. It is added to existing Level I or Level II certificates but is not required to perform service in these areas.

Students in the gifted endorsement program receive academic and professional advisement from the program coordinator and program faculty. The adviser works with students to discuss, monitor and provide advisement as it related to their endorsement program studies.

Delivery Mode
Global Online (100 percent online delivery)

Clearances
Pennsylvania Act 24, 34, 114, 131 and 151 clearances (or appropriate clearances for non-Pennsylvania residents) are required for field-based course registration but not admission. Applicants may be admitted to the program but will not be able to register for field-based courses until all of the up-to-date clearances are submitted.

** Total of 12 credits for capstone courses.

Program Requirements

PA certification requires the following at the undergraduate or graduate level:

- College-level Mathematics (6 credits)
- English Composition and English/American literature (3 credits/3 credits)
- Health and Wellness (3 credits)
- Citizen: Geography, Political or Economy (3 credits)
- English Language Learners (3 credits)
- Instructional Technology (3 credits)
- U.S. History (3 credits)
- Physical Science (3 credits)
- Environmental/Earth Science (3 credits)
- Biology (3 credits)

Students must take the Graduate Comprehensive Exam.

Program Website

Health Science and Exercise Leadership

**Doctor of Health Science**: Health Science and Exercise Leadership - 48-53 credits (program code: 0650)

Program Description

The Doctor of Health Science (DHSc) degree in Health Science and Exercise Leadership addresses the education and workforce needs resulting from continued growth in the aging population and the shift from treating disease to promoting health and wellness. The DHSc is a post-professional academic degree designed for individuals working in clinical, educational, professional, managerial and research roles within healthcare-related fields who wish to pursue an advanced professional degree that will provide opportunities for career enhancement or career advancement.
Academic Programs

Delivery Mode
Global Online (100 percent online delivery)

Doctoral candidates are required to be on campus to present and defend their evidence-based professional portfolio and/or optional dissertation research as part of the Department of Exercise Science and Sport Studies Graduation Workshop. The workshop is held annually on the Friday of (and prior to) the December graduation ceremonies.

Academic Programs

Integrative STEM Education K-12

Master of Education: Teacher Education: Integrative STEM Education K-12 - Credits: 30 (program code: 0920)

Certificate: Integrative STEM Education Endorsement K-12 - Credits: 12 (program code: 0760)

Program Description
The Integrative STEM Education K-12 is a completely online graduate program for certified teachers and other educators interested in learning how to develop rigorous, relevant, innovative and engaging integrative practices for incorporating STEM principles across disciplines. This program develops competent STEM educators and leaders who are prepared to develop innovative and engaging integrative practices for incorporating STEM principles across disciplines while ensuring that learners are able to apply STEM content, concepts and skills in both academic and real-world contexts. The program strengthens candidates’ knowledge of student-centered learning approaches and will prepare candidates to plan, design and implement hands-on project-based learning approaches that will empower learners to become technologically proficient problem solvers, collaborators and innovators prepared to function in and contribute to the globally competitive science and technology-rich society of the twenty-first century.

Program Goals
The Integrative STEM Education program seeks to prepare STEM educators who:

1. Are cognizant of the continually evolving approaches to integrative STEM education and are effectively prepared to implement a range of innovative, constructivist, integrative/interdisciplinary practices that emphasize active engagement, interaction, participation and collaborative learning;

2. Can provide competent, inclusive, developmentally appropriate interdisciplinary, transdisciplinary or multidisciplinary approaches to problem-solving, inquiry-based learning that utilizes the design process to facilitate learners’ ability to answer complex questions, engage in critical thinking, investigate societal issues and develop solutions for challenges and real-world problems;

3. Embrace a growth mindset and can design, implement and assess lessons and units that incorporate an integrative STEM learning cycle approach in a physically and emotionally safe learning environment that encourages and supports innovation, design thinking and intellectual risk taking while helping learners understand the relevance of STEM to their lives and to see the value of STEM in addressing issues that are important to their communities;

4. Understand how rapidly evolving state-of-the-art technologies can be leveraged to connect and empower students, educators, businesses and communities in flexible and inclusive learning spaces that foster learners’ imaginations as they endeavor to explore innovative concepts such as computer science, technology integration, robotics, virtual reality, fabrication, the maker movement and other continually evolving approaches that connect STEM and non-STEM disciplines; and

5. Serve as teacher leaders who possess strong collaboration skills along with the knowledge, skills and dispositions needed to support a STEM education vision and plan and are effectively prepared to guide school-wide implementation of STEM initiatives that develop and deliver high-quality STEM education to all students.

Delivery Mode
Global Online (100 percent online delivery)

Accreditation
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)

Approved by the Pennsylvania Department of Education

Legal Studies: Criminal Justice
Master of Science: Legal Studies: Criminal Justice - Credits: 30 (program code: 0957)
Certificate: Criminal Justice - Credits: 15 (program code: 0714)

Program Description
The Legal Studies: Criminal Justice master's and certificate programs focus on aspects of criminal justice related to critical facets of investigations and structural/operational dynamics of criminal justice organizations, critical issues of criminal justice accountability and civil liability. In these programs, students:

• Engage in advanced study of the functions and processes of the American criminal justice system.
• Research and analyze criminal justice policy relating to contemporary justice issues.
• Examine critical issues of police accountability, including police practices frequently triggering civil liability and police risk management for reducing criminal and civil liability.
• Study contemporary investigative practices for financial crimes and sexual offenses.

M.S. in Legal Studies: Criminal Justice
The Criminal Justice concentration of the Legal Studies master's degree uniquely creates a wide-ranging educational opportunity for both working professionals and serious students seeking graduate education in the practical application of law and policy in the criminal justice system. This concentration is an excellent option for law enforcement professionals seeking to:

• Advance their careers.
• Move into executive leadership positions.
• Prepare for a second career after law enforcement.
• Open the door to new career opportunities.

This is not a typical academic curriculum filled with courses on psychology and social issues. Rather, the curriculum focuses more on the day-to-day work of the criminal justice executive or professional.

This degree can be completed in one year of full-time or two years of part-time study.
Academic Programs

Certificate in Criminal Justice
The Criminal Justice certificate program is designed for students who are seeking an academic credential as preparation for careers in federal, state and local criminal justice agencies or in corporate security in the private sector.

This post-baccalaureate certificate program includes graduate courses from the M.S. in Legal Studies: Criminal Justice program. Students can complete the five courses within one year.

Delivery Mode
Global Online (100 percent online delivery)

Legal Studies: Homeland Security
Master of Science: Legal Studies: Homeland Security Concentration - Credits: 30 (Program Code: 0953)

Program Description
The Legal Studies: Homeland Security master's and certificate programs provide a comprehensive study of various aspects of homeland security and national security of the United States. Special emphasis is placed on a full range of legal and policy issues, including:

• Developing strategies, plans and programs to prevent terrorist attacks within the United States.
Academic Programs

- Reducing America’s vulnerability to terrorism.
- Analyzing the organizational arrangements needed to strengthen homeland security, including local/state/federal, civil-military and interagency cooperation.
- Engaging in critical analysis to seek improvements in homeland security preparedness through policy development using real-world, actionable opportunities for progress.

M.S. in Legal Studies: Homeland Security
The Homeland Security concentration of the Legal Studies master’s degree uniquely creates a wide-ranging educational opportunity for both working professionals and serious students seeking graduate education in the practical application of law and policy in the context of homeland and national security in the United States. This concentration prepares you for a wide range of homeland security roles. Coursework is relevant (but not limited) to:

- Law enforcement professionals monitoring our nation’s borders.
- Executives crafting policies related to preparedness and resilience in the face of homeland security threats.
- Cybersecurity personnel.
- Human resources professionals.

It is an excellent option for professionals seeking to advance their careers or move into executive leadership positions, as well as those preparing for a second career after law enforcement or open the door to new career opportunities.

This degree can be completed in one year of full-time or two years of part-time study.

Certificate in Homeland Security
The Homeland Security certificate program is designed for students who are seeking an academic credential as preparation for careers in federal, state or local homeland security and emergency management agencies, and in corporate security.

This post-baccalaureate certificate program includes graduate homeland security courses from the M.S. in Legal Studies: Homeland Security program.

Students can complete the five courses within one year.

Legal Studies: Law and Public Policy
Master of Science: Legal Studies: Law and Public Policy Concentration - Credits: 30 (program code: 0955)

Certificate: Law and Public Policy - Credits: 15 (program code: 0716)

Program Description
M.S. in Legal Studies: Law and Public Policy
The Law and Public Policy concentration of the Legal Studies master's degree uniquely creates a wide-ranging educational opportunity for both working professionals and serious students seeking graduate education in the analysis and application of law in a multitude of contexts. Students address, analyze and critique the law and its public policy implications from social, administrative, juridical, ethical, operational and managerial perspectives. Special emphasis is given to the practical ramifications of how law and public policy intersect, influencing the culture, the community and the individual. Coursework will challenge students to develop further research, writing and analytical skills as students engage with case law, statutory law and administrative regulations and learn to support arguments with reputable sources.

This concentration is an excellent option for:

- Paralegals or law enforcement professionals seeking to advance their careers or move into executive leadership positions.
- Justice system professionals looking to build on their knowledge and skills or who need a master’s degree for promotion.
- Anyone who needs specialized knowledge and understanding of the law.

The master’s degree can be completed in one year of full-time or two years of part-time study.

Certificate in Law and Public Policy
This Law and Public Policy post-baccalaureate certificate program provides students with the opportunity to address, analyze and critique the law and its public policy implications from social, administrative, juridical, ethical, operational and managerial perspectives. Special emphasis is given to the practical ramifications of how law and public policy intersect, influencing the culture, the community and the individual. Coursework challenges students to develop further research, writing and analytical skills as students engage with case law, statutory law and administrative regulations and learn to support arguments with reputable sources.
Academic Programs

The Law and Public Policy certificate program is designed for students who are seeking an academic credential as preparation for careers in government agencies, legal support positions, criminal justice agencies and nonprofit associations and in the private sector.

This certificate program includes graduate courses from the M.S. in Legal Studies: Law and Public Policy program. Students can complete the five courses within one year.

**Master of Arts Teaching**

**Master of Arts Teaching:** Secondary Education - Credits: 45

- Concentration: Art Certification (program code: 0521)
- Concentration: Biology Certification (program code: 0560)
- Concentration: Chemistry Certification (program code: 0590)
- Concentration: Communications Certification (program code: 0525)
- Concentration: Earth Science Certification (program code: 0563)
- Concentration: English Certification (program code: 0501)
- Concentration: Mathematics Certification (program code: 0548)
- Concentration: Physics Certification (program code: 0530)
- Concentration: Social Studies Certification (program code: 0580)
- Concentration: Spanish Certification (program code: 0540)
Academic Programs

Program Description
This program prepares individuals to apply for initial certification in the following areas: art, biology, chemistry, communications, earth science, English, mathematics, physics and social studies. It is designed for individuals with a background in each area or those individuals wishing to make a career change into secondary teaching. However, anyone can be admitted regardless of previous degree. This program is designed for practicing professionals who wish to become certified teachers in their chosen fields of study, such as a chemist becoming a chemistry teacher, or a history major becoming a social studies teacher. However, many of the students enrolled in the program are becoming certified in areas not related to their undergraduate work. In this program, you may apply for your Pennsylvania teacher certification at the completion of student teaching. During the program, you may apply for a Pennsylvania intern certificate if you have a school district willing to hire you full time. Contact the program coordinator for more information about the intern certification.

Delivery Mode
Online with two-day on-campus residency component (during the summer semester only)

Field observations/experiences and student teaching are conducted in public school settings.

Program Accreditation
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)

Approved by the Pennsylvania Department of Education

## Advisement

Students in the Master of Arts Teaching program receive academic and professional advisement from the program coordinator and program faculty. Each student is assigned to an academic adviser from the time they are accepted into the program of study. Advisers work with students to discuss, monitor and provide advisement as it relates to their program of study.

Master of Science in Nursing

Master of Science in Nursing: Nursing Administration and Leadership - Credits: 30 (program code: 0934)

Master of Science in Nursing: Nursing Education - Credits: 36 (program code: 0931)

MSN - MBA Dual Degree: Nursing Administration and Leadership / MBA - Credits: 54 (program code: 0930-0826)

Master of Business Administration: Nursing Administration and Leadership - Credits: 36 (program code: 0828)

Certificate: Nursing Administration and Leadership - Credits: 21 (program code: 0932)

Certificate: Nursing Education - Credits: 21 (program code: 0933)

Program Description
The Master of Science in Nursing (MSN degree) is designed for nurses who already have a Bachelor of Science in Nursing (BSN) and is designed to prepare nurses to advance in their careers, either in nursing administration and leadership or nursing education roles.

MSN: Nursing Administration and Leadership
The Master of Science in Nursing (MSN degree) in Nursing Administration and Leadership is designed for those who have already obtained a baccalaureate degree in nursing. The MSN program is intended for nurses who:

1. Currently hold administrative or leadership positions and wish to complement their experience through advancing their education formally, and
2. Wish to gain knowledge and skills needed to expand their career options in the area of nursing administration and leadership in a variety of healthcare settings.

The Nursing Administration and Leadership courses blend theory and practice in administration, leadership, organization, quality of care, delivery systems of patient care, human resource management, legal and ethical concepts, practice, and health care finance, and incorporate healthcare informatics. The Nursing Administration and Leadership program culminates with a practicum in nursing administration and/or leadership where the student works with a nurse administrator/leader in their area of interest.

Upon completion of the MSN in Nursing Administration and Leadership program, graduates will be eligible academically to take one of the national certification exams for nurse administration offered by the American Organization of Nurse Executives (AONE) or the American Nurses Credentialing Center (ANCC).
Academic Programs

**MSN: Nursing Education**
The MSN in Nursing Education prepares graduates to develop, implement and evaluate nursing education programs and curricula as a nurse educator. The curriculum is composed of core master’s level, advanced clinical practice and specialty courses that include curriculum design, teaching and instructional strategies, and assessment and evaluation methods. A preceptor based role practicum provides experiential application of nurse educator competencies. Competencies for the academic nurse educator provide a foundation for education specialty courses.

Upon completion of the MSN in Nursing Education program, graduates will be eligible academically to take the Certified Nurse Educator (CNE) Examination offered by the National League for Nursing.

**MSN-MBA**
The Master of Science-Master of Business Administration degree option is designed for working nurse professionals who want to gain a broad perspective on the business issues that are critical in a medical setting and gain the highly desired MBA credential. This dual degree can be completed with only 54 credit hours, plus 6 credit hours for business foundation courses if needed.

**MBA in Nursing Administration and Leadership**
Graduates from the MSN program in Nursing Administration and Leadership at California University of Pennsylvania may complete the MBA for Nursing Administration and Leadership program. Graduates from other MSN programs in nursing administration can also apply but may have additional coursework to complete based upon their MSN degree evaluation.

**Delivery Mode**
Global Online (100 percent online delivery)

**Accreditation**

The baccalaureate degree program in nursing and master's degree program in nursing at California University of Pennsylvania are accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org).

**Pennsylvania Teaching Certification**
Individuals who possess a Pennsylvania Instructional I teaching certification may be able to use the credits earned in a graduate program at California University of Pennsylvania (Cal U) toward the post-baccalaureate requirements for the Instructional II certification.

**Instructional I Certification**
Some of our graduate programs lead to specialized initial teaching certification. Review the program requirements in this catalog.

**Act 48 Continuing Education**
Cal U is a Pennsylvania Department of Education-approved provider for Act 48 continuing professional education. All of California University's graduate education programs may be applied to Act 48 continuing education.

For more information on Pennsylvania Instructional II certification teaching certifications and professional education requirements, please visit the Pennsylvania Department of Education website at [www.education.state.pa.us/portal/server.pt/community/pennsylvania_department_of_education/7237](http://www.education.state.pa.us/portal/server.pt/community/pennsylvania_department_of_education/7237).

**Police Executive Law and Policy Certificate**

**Certificate:** Police Executive Law and Policy - Credits: 15 (program code: 0718)

**Program Description**
This post-baccalaureate Police Executive Law and Policy certificate program emphasizes a set of necessary skills for current or future executive level police leaders, specifically related to inter-connected issues of law and policy. Police executives must have a significant understanding of the legal, policy and human resources issues to lead agencies through the legal minefield that poses an ever-present threat of civil litigation. This certificate program provides students who anticipate a police career culminating with positions in upper-level executive leadership with an essential understanding of the risk management issues required to more effectively design organizational policy in a police organization.

The Police Executive Law and Policy certificate program is designed for students who are seeking an academic credential as preparation for executive level leadership in law enforcement agencies. This certificate program combines graduate courses from the M.S. in Legal Studies: Criminal Justice and Law and Public Policy concentrations.

Students can complete the five courses within one year.

Reading Specialist
Master of Education: Reading Specialist - Credits: 30 (program code: 0150)
Certificate: Reading Specialist Certificate - Credits: 24 (program code: 0910)
Academic Programs

Program Description
The reading specialist program at California University of Pennsylvania prepares competent literacy leaders by developing and enhancing the knowledge, professional practices and professionalism of certified classroom teachers and educators for work in all educational settings. The reading specialist must be prepared to develop and implement instructional practices and interventions designed to meet the needs of all learners, including struggling readers from diverse cultural, social and linguistic backgrounds. The reading specialist program strengthens candidates’ knowledge of research and theories, pedagogical skills, and expertise in implementing effective classroom and remedial reading instruction and school-wide literacy programs, as they become effective literacy leaders and literacy coaches who engage in collaborative decision-making with and advocate on behalf of teachers, students, families and communities.

The mission of the graduate reading specialist program is to encourage the development of reading specialists who serve schools and communities with integrity, civility and responsibility and who demonstrate superior knowledge and skill identified in the International Literacy Association Standards for Reading Specialists.

The reading specialist program offers two options:

• **Master's Degree**: This plan is appropriate for students who wish to earn a Master of Education degree and reading specialist certification on their Pennsylvania teaching certificate. In this option, students are required to complete 30 credits of graduate coursework. To graduate from the program, candidates must successfully complete a PracticumFolio during the reading practicum experience. To have the reading specialist certification added to a Pennsylvania teaching certificate, candidates must pass the Reading Specialist Praxis test. Candidates interested in certification outside Pennsylvania are required to secure and follow regulations from the other states or entities.

• **Certificate (Certification Preparation)**: This plan is appropriate for students who are seeking reading specialist certification only. In this option, students are required to complete 24 graduate credits. California University of Pennsylvania does not award certification. Those completing this program will be awarded a certificate from California University of Pennsylvania. This certificate does not relate to certification or licensure. To earn certification, those completing this program must apply to the Pennsylvania Department of Education, which grants certification.

The Pennsylvania Department of Education requires all reading specialists to have 9 credits of special education and 3 credits of English as a second language. Therefore, if a student entering the reading specialist program does not have those courses in their undergraduate transcript, those credits must be earned prior to applying for the reading specialist certification through the Pennsylvania Department of Education.

Delivery Mode
All courses are delivered online, except for the clinical practicum experience, which takes place on campus during a five-and-a-half week summer reading practicum.

Accreditation
The reading specialist program is accredited by the Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE) and approved by the Pennsylvania Department of Education; the reading specialist program is nationally recognized by the International Literacy Association (ILA).

School Psychology

Master of Science: School Psychology - Credits: 36 (program code: 0310)

Post-Master Certificate: School Psychology - Credits: 33 (program code: 0410)

Program Description

School psychology brings together the knowledge base of several disciplines, including child psychology, human development and education with an emphasis on special education. While school psychologists work with all children, their first responsibility is to the population of students at risk for failure and who have identified disabilities. With these populations, school psychologists' roles include assessment (comprehensive evaluations of disability and risk), consultation with parents and teachers regarding instructional and behavioral interventions, direct interventions, including crisis prevention/intervention, individual and group counseling, skill training, and training staff, parents and students to be more effective problem-solvers and to better understand disability and risk issues.

School psychologists typically work in public school settings, but can also be found in private schools, mental health centers, hospitals, state education agencies, private practice and universities. There is currently a nationwide shortage of school psychologists; hence the job market is very promising.

In order to practice as a school psychologist, candidates must earn a master's degree (36 credits) plus state certification (33 additional credits of certification preparation coursework) in school psychology. Full-time school psychology candidates typically complete the master's plus certification program in three years. The first year begins by taking three courses in the summer. At the end of the second summer, successful candidates are awarded a Master of Science in School Psychology. Candidates interested in pursuing certification in school psychology continue with full-time coursework through the following summer, then complete a 1,200 clock hour internship in the third year of study. Once the internship requirements have been fulfilled, candidates may then apply for state certification in school psychology. Courses are offered in the evenings, although a small number of master's-level course are offered online. Full-time school psychology candidates can expect to enroll in three courses each semester. Part-time students are also encouraged to apply; individual programs of part-time study are developed together with the program coordinator.
Academic Programs

Delivery Mode
Traditional (on-campus, face-to-face delivery with some online/distance elements). Face-to-face courses are offered exclusively in the evenings.

Minimum of 350 clock hours of practicum, typically obtained within the first two years of coursework via course assignments

Minimum of 1,200 clock hours of internship, typically completed in the third year of study, in a public school setting and in our on-site school psychology clinic

Accreditation
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)

National Association of School Psychologists (NASP) (SLFull, 2006)

Sexual Assault Investigation and Victimization

Certificate: Sexual Assault Investigation and Victimization - Credits: 15 (program code: 0719)

Program Description
This post-baccalaureate certificate program addresses a set of skills for the investigation of a wide array of sexual-based crimes. The skills taught in this program are necessary for the legally sustainable identification of defendants in accordance with the demands of high-profile prosecutions.

In addition, the program focuses on the legal issues related to victims of sex crimes, so investigators can meet the legal standards for prosecutions, while maintaining a level of compassion for the victims. The legal standards for forensic investigations of sex crimes require both a scientific understanding of the investigation and sensitivity to the increasing demands for a higher level of scrutiny of the techniques used by investigators, medical examiners and forensic technicians. This program stresses the compassionate understanding of sex crime victimization necessary for investigators to effectively work with victims.

The Sexual Assault Investigations and Victimization certificate program is designed for students who are seeking specialized courses in sexual assault investigations and sex crime victim advocacy.

This certificate program combines graduate courses from the M.S. in Legal Studies: Criminal Justice and Law and Public Policy concentrations. Students can complete the five courses within one year.

Delivery Mode
Global Online (100 percent online delivery)

Social Work
Master of Social Work (program code: 0350)

• Advanced Standing Program - Credits: 39
• Regular Program - Credits: 57

Program Description
The Master of Social Work (MSW) program is committed to:

• Developing students' personal and professional growth.
• Appreciating diversity.
• Using an advanced generalist perspective to make a difference in underserved environments.
• Preparing graduates to be highly competent, effective and well regarded social work practitioners.

Our MSW program prepares students to respond professionally and creatively to the increasingly complex matrix of human needs and strengths in a changing society. It also provides students with a theoretical and professional practice focused curriculum in social work that promotes an understanding and appreciation of cultural diversity and its importance to competent advanced generalist practice. Built on a professional advanced generalist curriculum model, the program prepares students to work in direct and indirect practice and develops their leadership capacities to address and meet needs that affect people in southwestern Pennsylvania, including urban environments, and is designed for students with bachelor's degrees in psychology, social sciences, sociology, liberal arts and other disciplines.

The 57-credit regular MSW program requires two years (four semesters). The part-time regular program takes three years; students must register for at least 6 credits each semester, are required to follow the plan for appropriate course sequencing and must complete degree requirements within six years. The advanced standing
Academic Programs

Program has 39 credits and is designed for students with bachelor's degrees in social work from Council on Social Work Education accredited programs. It takes three semesters of full-time study. Part-time advanced standing students follow requirements for part-time students and normally finish in two years (four semesters).

Delivery Mode
Traditional (on-ground, face-to-face delivery, with some online/distance elements)

Accreditation
Council on Social Work Education (CSWE)

Special Education
M.Ed. with Pre-K-8 Certification (currently certified in Elementary Education) - Credits: 30 (program code: 0746)

M.Ed. with Dual Pre-K-4/K-8 Certification (no current teaching certification) - Credits: 63 (program code: 0148)

M.Ed. with 7-12 Certification (currently certified in Secondary Content Area) - Credits: 30 (program code: 0747)

M.Ed. with Autism Spectrum Disorders (currently certified in Special Education) - Credits: 30 (program code: 0749)

Certification - Autism Spectrum Disorders - Credits: 12 (program code: 0752)

Certificate - Autism Spectrum Disorders - Credits: 12 (program code: 0751)

(Two concentrations are also offered in Applied Behavior Analysis.)
Program Description

Master of Education

The Master of Education in Special Education program is available to students seeking a master's degree along with coursework making the student eligible for Pennsylvania teaching certification. There are several different program options that are dependent upon an applicant's undergraduate degrees. These options are as follows:

M.Ed. with Pre-K-8 Certification (currently certified in Elementary Education): This program is intended for applicants who already hold Pennsylvania teaching certification in elementary education, Pre-K to grade 4 or grade 4 to grade 8. Upon completion, the student will hold a master's degree in special education and will be eligible to add Pre-K to grade 8 special education endorsement to their current teaching certificate.

M.Ed. with Dual Pre-K-4/K-8 Certification (no current teaching certificate): This program is intended for applicants who do not already hold Pennsylvania teaching certification. Upon completion, the student will hold a master's degree in special education and will be eligible for dual certification in Pre-K to grade 4 and Pre-K to grade 8 special education.

M.Ed. with 7-12 Certification (currently certified in Secondary Content Area): This program is intended for applicants who already hold Pennsylvania teaching certification in a secondary education content area. Upon completion, the student will hold a master's degree in special education and will be eligible to add grade 7-12 special education endorsement to their current teaching certificate.

M.Ed. with Autism Spectrum Disorders (currently certified in Special Education): This program is intended for applicants who already hold Pennsylvania teaching certification in special education. Upon completion, the student will hold a master's degree in special education and will be eligible to add autism spectrum disorders (ASD) endorsement to his/her current teaching certificate.

Candidates for Pennsylvania certification must have completed undergraduate or graduate coursework that includes the following:

- College-level mathematics (6 credits)
- English composition and English/American literature (3 credits/3 credits)
- Health and wellness (3 credits)
- Citizen: Geography, political or economy (3 credits)
- English language learners (3 credits)
- Instructional technology (3 credits)
- U.S. history (3 credits)
- Physical science (3 credits)
- Environmental/earth science (3 credits)

Students entering the program without all, or part, of the undergraduate requirements may meet them with additional coursework or by competency tests while they are taking the graduate classes.

Certification

The certification-only programs in special education are available to students seeking to be eligible to add special education endorsement to a current Pennsylvania teaching certification. These options do not lead to a master's degree. There are several different program options that are dependent upon an applicant's undergraduate degrees and prior certification. These options include:

- Certification - Autism spectrum disorders (not certified in special education): Students who do not currently hold special education certification, including educators with certification in any area, other education professionals, family members of individuals with ASD and others, can complete the four-course, 12-credit online program for professional development, but will not be able to apply for ASD certification.
Academic Programs

Certificate
The certificate program in autism spectrum disorders is available to students seeking to gain knowledge in the subject area without a desire to secure teaching certification.

- **Certificate - Autism spectrum disorders**: Students, including teachers, other education professionals, family members of individuals with ASD, and others, can complete the four-course, 12-credit online program for professional development.

**Delivery Mode**
Traditional (on-ground, face-to-face delivery, with some online/distance elements)

**Accreditation**
Council for the Accreditation of Educator Preparation (CAEP, formerly NCATE)

Approved by the Pennsylvania Department of Education

**Curriculum - Master of Education: Special Education Pre-K - 8 Certification**

Sport Management Studies
Master of Science: Sport Management Studies:

- Generalist Concentration - Credits: 36 (program code: 0963)
- Intercollegiate Athletic Administration Concentration - Credits: 36 (program code: 0962)
- Strategic Sport Analysis Concentration - Credits: 36 (program code: 0965)
Academic Programs

Certificate - Intercollegiate Athletic Administration - Credits: 12 (program code: 0981)

Program Description
The sport management studies curriculum was created especially for presentation via the Internet. Sport management theory and principles are presented with streaming video, narrated PowerPoint presentations and online forums. Threaded discussion groups, chat rooms and email allow the cohorts to communicate and interact, adding unique insight into the discussion. Students have the option of completing the generalist concentration, the intercollegiate athletic administration concentration, or the strategic sport analysis concentration. Program length is approximately 13 consecutive months, with new cohorts beginning in January and July. Cohorts of approximately 35 students each learn and communicate online and regularly function as a group of interactive peers. This virtual community creates a lively and dynamic educational experience that enriches the collaborative skills essential for success in the sport industry. Students are eligible for a graduate certificate of 12 credits in intercollegiate athletic administration. The intercollegiate athletic administration track has been developed in consultation with the NCAA.

Delivery Mode
Global Online (100 percent online delivery)

Teacher Education
The following teacher education-related graduate programs are offered:

- Administrative Program for Principals
- Advanced Studies in Secondary Education
- Early Childhood Education
- Education Administration and Leadership (Ed.D.)
- Educational Studies
- Elementary Education PreK - 4
- Elementary / Special Education
- English as a Second Language (ESL)
- Integrative STEM Education K-12
Academic Programs

- Master of Arts in Teaching
- Reading Specialist
- School Counseling
- School Psychology
- Special Education
- Superintendent Letter of Eligibility
- Technology Education

Technology Education

**Master of Education:** Technology Education - Credits: 30 (program code: 0915)

**Certificate:** STEM Secondary Education - Credits: 9 (program code: 0917)

Program Description

The Technology Education program offers a master's of education in technology education and a certificate in STEM for Secondary Education. Students are encouraged to apply for admission to both programs at the same time since the courses required for the certificate are also required for the master's degree. Upon completion, students would earn both the master's degree and the certificate.

The mission of the master's degree is to provide professional development to teachers and other educators in the field of technology education, providing a broad-based understanding of the field and its direction. The certificate provides educators with a fundamental understanding of STEM subject matter in secondary schools.

Technology education is a vital aspect of education and promotes the development of technologically literate citizens by studying the broad spectrum of technology. In contrast, educational technology focuses on using computer technology to enhance instruction. The degree and certificate are not intended for individuals interested in educational or instructional technology.

*It is important to note that this program does not lead to certification. Students interested in Pennsylvania certification in technology education should contact global online at calugo@calu.edu.*

Delivery Mode

Global Online (100 percent online delivery)

Accreditation

Admissions
Application Process
Individuals may apply online at www.calu.edu and pay the non-refundable application fee.

Submit official transcripts of the degree required for admission to the School of Graduate Studies and Research, California University of Pennsylvania, 250 University Ave., California, PA 15419. The degree must have been awarded from a regionally accredited college or university. It is not necessary to send a transcript of coursework completed at California University.

Admission Decisions
Generally, the minimum requirement for admission to the School of Graduate Studies and Research is a 3.00 undergraduate GPA. Some programs have other GPA requirements. Applicants who have less than a 3.00 undergraduate GPA may be able to seek conditional admission based on established criteria. Review program requirements in this catalog.

In addition to GPA, some programs require additional documentation such as letters of recommendation, references, specified entrance exams (Praxis/PAPA, GRE, MAT) and/or other supporting material. See program requirements in this catalog.

When Graduate Admissions has received all of the required application materials, the materials are reviewed for the admission decision.

An admission decision is valid for one academic year (two semesters and one summer term, i.e., the semester/term the student applied for and the following two semesters/terms). If a student does not register for classes during that time, the acceptance is no longer valid and the applicant must reapply for admission, repay the application fee and resubmit all materials.

Residency is determined at the time of admission. A Pennsylvania resident is defined as one who is a bonafide resident of and domiciled within the State of Pennsylvania for a reasonable period, typically not less than one year, immediately preceding the student's registration for a term. Individuals who have been adjudged not to be a resident of Pennsylvania and would like to appeal the decision must petition after admission to the Residency Appeals Committee through the office of the Vice-President for Academic Affairs. A student who is dissatisfied with the university's determination of his classification may challenge it by filing a written petition with the university officer or committee designated by the university president to consider challenges within 30 days after issuance of the determination. The petition shall contain a statement of reasons in support of the student's claim of Pennsylvania domicile and supporting documentation the student may wish to submit. Untimely petitions may not be considered.

Admission Policy
Several types of admission to the graduate school are available. Please consult the Admission to the Graduate School policy on the University Policies webpage for more details.

Application Deadlines
Application deadlines vary by program, and students are advised to apply for admission to the School of Graduate Studies and Research as early as possible. Most programs have rolling deadlines and applications may be submitted at any time. However, the programs listed below have strict application deadlines that must be met in order to be considered for admission:

Master's Programs
Clinical Mental Health Counseling

- Spring Admission: Sept. 15
- Summer or Fall Admission: Feb. 15

Communication Disorders
Graduate Catalog

- Feb. 15

Counselor Education

- Spring Admission: Sept. 15
- Summer or Fall Admission: Feb. 15

School Counseling

- Spring Admission: Sept. 15
- Summer or Fall Admission: Feb. 15

School Psychology

- Feb. 28

Doctoral Programs

Education and Administrative Leadership (Ed.D.)

- Fall Admission: Apr. 30

Health Science and Exercise Leadership (D.H.Sc.)

- Oct. 1

Admission for Other Programs
In addition to degree programs, the University offers certification programs, certificates and options for non-degree and visiting students.

Certification Programs
Certification programs prepare individuals to apply for a certification or licensure from a third party, which normally imposes experiences and requirements beyond university credits. These additional program requirements develop appropriate competencies in specific areas of specialization.

Certificates
A certificate is not a certification but rather a formal, credit-based credential that indicates completion of a program of study that does not culminate in a degree or qualify the individual for certification.

Non-degree
Although most graduate students at California University of Pennsylvania are enrolled in degree programs, there are opportunities to take some graduate classes as a non-degree student for personal or professional growth without pursuing a graduate degree.

Admitted non-degree students may take only six credits before they are required to apply as a degree-seeking student. Completion of these courses does not automatically lead to admission to a degree or certification program. Applicants interested in further exploration must reapply (fee waived).

Visiting Students
Graduate students from other universities (sometimes known as “visiting students”) may take courses at California University of Pennsylvania. Visiting students are responsible for knowing and adhering to the transfer policies of their home institutions.

California University welcomes applications from students from countries other than the United States. All international applicants studying on campus must follow the procedures and guidelines, which are available via: https://www.calu.edu/international-students/.
Graduate Assistantships
All applicants who are interested may contact the School of Graduate Studies and Research regarding graduate assistantships and the Financial Aid Office regarding financial options. Admission into the University does not imply receipt of a graduate assistantship.
ACC-Accounting
ACC710 - Financial Accounting
This class covers theoretical, conceptual and practical issues in financial accounting and how those issues impact decision making. Special emphasis will be placed on conducting research of authoritative accounting pronouncements, as well as current topical literature.

ACC711 - Managerial Accounting
This course focuses on the use of accounting data for corporate financial planning and control. Topics include organization for control, profit planning, budgeting, relevant costing, return on investment and administration of controllership functions in business organizations.

ACC715 - Advanced Federal Income Tax
This course offers the student an introduction to tax planning and tax research, while also incorporating the financial accounting treatment of income taxes. Topics covered include C Corporations, S Corporations, partnerships, exempt organizations and the impacts of international transactions. The emphasis on each topic is on tax research, planning and implementation of strategies, as well as the financial accounting implications of those strategies.

ACC720 - Advanced Financial Accounting
Investigates selected financial reporting topics and issues. Selected topics include: Accounting concepts and standards; financial statements; income statement items; financial statement disclosures; business combinations; derivatives, hedging and related topics.

ACC725 - Controllership
This course is designed to explore tools and techniques for understanding and analyzing problems related to the overall strategic financial management of a firm as well as day to day financial decisions to maximize firm value. The case study/project analysis approach is used and students are encouraged to relate their own applications where possible.

ACC730 - Advanced Auditing
This class will prepare the student to conduct an audit in accordance with generally accepted auditing standards in the United States of America. Emphasis will be placed on understanding, documenting and assessing internal controls and modifying the scope of the audit work to be performed based upon the internal controls assessment. Students will also have the opportunity to utilize electronic data analysis tools common in the auditing profession.

ACC735 - Emerging Issues in Accounting
This class integrates accounting theory with the current practices being conducted in the field. This class will provide the student with the opportunity to witness how accounting professionals today are responding to the foundational issues in the field.

ADP-Professional Education
ADP621 - Curriculum Leadership Using a Standards-Aligned System
Among the many leadership roles and responsibilities in the principalship, none is more important than educational program development, administration and evaluation. The purpose of this course is to develop the student's understanding of a standards-aligned system curriculum development process and the leadership necessary for the process, and the structure needed to provide appropriate professional development.

ADP626 - Instructional Leadership and Strategies for Inclusive Classrooms
This course is designed to provide principal candidates with a framework for effective, practical use of a variety of instructional strategies to promote best inclusive practices. These strategies are used with teachers to improve curriculum and instruction. Through various learning experiences, you will develop your knowledge, skills and professional dispositions that will help you to lead your school. The course is designed to help you develop a foundation for leadership by understanding what differentiated instruction is, why it is appropriate for all learners, and how to serve as an instructional leader in this area. Principal candidates will explore and analyze Standards-Based Instruction, Bloom's Taxonomy of the Cognitive Development, Writing Across the Curriculum, Multiple
Course Descriptions

Intelligences, Response to Intervention, Inclusion, Multiple Measures of Data to inform Decision-Making, and Leadership and Differentiated Instruction to support a diverse student body at all grade levels.

ADP631 - School Law and Ethics
This course helps students acquire a practical working knowledge of school law. Education operates within a complex legal framework of law. Local school board policy, administrative regulations, state and federal statutes, and the constitution all impact the daily operation of our schools. Hence, every person involved in the educational process should be aware of the laws that govern his or her daily activities in order to be fair, efficient, and effective. Students completing this course should have the knowledge base necessary to make informed decisions and the research skills necessary to find additional information concerning points of law if needed.

ADP641 - School Community Relations
This course is for educators who hope to become principals or teachers who wish to assume a greater leadership role in the school where they teach. The purpose of this seminar is twofold: (1) to help school administrators and leaders develop an understanding of the conditions, diversity and changes that affect school-community interaction and its impact on student achievement, and (2) to help administrators and school leaders have an understanding of the strategic planning process, board policy on community relations and research on community partnerships and then apply this information to develop a five-year plan on the importance of school and community partnerships in relation to student achievement.

ADP647 - Orientation & Assessment
The Orientation and Assessment Seminar is required of all principal candidates at the beginning of their program in order to explain program philosophy and ongoing assessment activities. It provides students with the opportunity to become familiar with the program mission, philosophy, goals and competencies. "Orientation" indicates an introduction to the parameters and style of the course. "Assessment" indicates the self-assessment that transpires by the very nature of the course activities. By completing the required assignments, students come to understand the specific areas in which they are most familiar as well as those in which they need to place the most individual emphasis. Through a review of their personal values, dispositions toward leadership and actual leadership skills, as well as their knowledge and understanding of educational leadership, students will develop deeper understandings with which to guide their personal and professional development as school leaders. This process that promotes self-understanding and professional growth, within the context of educational leadership, is a focus of the Orientation and Assessment Seminar.

ADP661 - Educational Leadership
This course provides an introduction to the theory and practice of educational administration. The course progresses from an overview of leadership and leadership style to a review of the structures and management systems that can make good educational leadership possible and, finally, focuses on leadership skills needed by administrators to be effective leaders in education today. Included are such topics as organizational culture, power in and around schools, and the resolution of conflict, motivation, and ethics and moral leadership.

ADP664 - Field Project/Leadership
In this course, problem-solving activities and field projects planned cooperatively with University and school district personnel are designed in the area of education leadership or school leadership and special education. This practice-centered approach requires students to apply their knowledge, and demonstrate proficiency in those skills that contribute to effective performance as a leader.

ADP670 - Internship
The internship is a leadership standards-based experience designed to put theory into practice. It is where formal coursework is applied in a field setting. It provides significant opportunities in the workplace to synthesize and apply the knowledge and to practice and develop skills identified in the program competency areas. An internship with a trained mentor is an important and highly valued part of the program. Each placement will be made in cooperation with the Administrative Program for Principals faculty, the participating school district, and the intern. The internship involves an in school year field placement with a carefully chosen and certified principal/mentor (field supervisor) in a K-12 school, who shares the Administrative Program for Principals program philosophy that the principal should function as a standards-driven change agent and facilitator of the reform process as well as
a strong instructional leader. The intern is both a participant and observer under the direction of the principal who should provide the intern with as many standards based supervisory and administrative experiences as possible. The intern gains valuable work-related experience and is given the opportunity to learn how academic knowledge and skills can be applied at the worksite with real people, problems and events.

ADP673 - Supervised Field Project/Research and Evaluation
Problem solving activities and field experiences planned cooperatively with university and school district personnel are designed in the area of Research and Evaluation. This practice-centered approach requires students to apply their knowledge, and demonstrate proficiency in those skills that contribute to effective performance as an administrator or teacher leader.

ARB-Arabic
ARB610 - Arabic Linguistics
Students will be introduced to the aspects of Arabic language that are of interest to linguists who focus on the linguistic aspects of the language. This course will focus on the study of Arabic as “a language system” in terms of modern linguistic analysis. Students will study the language’s sound system (phonology), word structure (morphology), phrase and sentence structure (syntax), and meaning at the word and sentential level (semantics). The Arabic rhetoric, the history of Arabic and the issue of diglossia in Arabic-speaking countries will also be discussed in this course.

ARB620 - Arabic-English Translation
This course is meant to raise the awareness of the students to the importance of translation and interpretation from Arabic to English and vise versa. Students will work on stylistic, syntactic, technical, and cultural problems encountered in the Arabic-English translation process. Exercises will provide translation practice with different types of texts and documents. Texts and Documents will include, but not be limited to, legal, medical, business, media, etc.

ARB630 - Arabic Literature & Cultural Aspects
This course surveys selected Arabic literary works including the biography, poetry, prose, the tale, the fiction, the novel, the play, the song and the film. It will also discuss the language used in such works, and research how the culture of the community was reflected in that literary work. It will also examine how culture plays an important role in literature.

ARB640 - Arabic Dialect Acquisition & Variation
This course helps students to gain knowledge about Arabic dialectology and its geographical variation. Also, the students will be exposed to different examples from the very different types of Arabic dialects and accents which are spoken in the Arab Homeland.

ARB650 - Images of Islam: From Spain to Iran
This course discusses the influence of Islam on art and architecture from select countries from Spain to Iran, including North Africa and the Greater Middle East. It provides an accessible and appealing examination of the significant artistic, architectural, and cultural dimensions of the Islamic World, with special attention to developments during the Islamic Golden Age, and their influences on the West.

ARB810 - Special Topics in Arabic
This course provides students the opportunity to explore and research graduate-level topics of interest that are not available as regular course offerings of the University.

AST-Advanced Security Studies
AST700 - U.S. Homeland Security
The goal of this course is to provide students with a thorough understanding of the strategic, political, legal and organizational challenges associated with the defense of the U.S. homeland, the efforts that are under way to meet these challenges and possible policy options. The course starts by examining the range of potential threats to the U.S. homeland, focusing on potential terrorist acts. The course then examines strategies and means for addressing these threats, including both military and non-military options. The course goes on to
analyze organizational issues and impediments to effective policy coordination. Finally, the course addresses
the implications of homeland security challenges and policies for constitutional rights, legal protections and civil
liberties.

**AST710 - Emergency Management Principles, Law, and Policy**
This course examines the theory and practice of emergency management. The interaction of government
emergency management and the private sector will be reviewed. The principles of emergency management
disciplines will be addressed in the context of law and policy issues.

**AST720 - Domestic Extremism in the United States**
In-depth study of US-based domestic extremism presented and taught within a legal studies framework. This
course aims to present the growth of the domestic extremism threat in the United States within the legal context of
the challenges and difficulties inherent in counterterrorism efforts directed at US persons. Topics include: domestic
extremist ideologies, history and current state of domestic extremism, Constitutional law protections and civil
liberties impacting counterterrorism efforts, intelligence and law enforcement techniques to combat domestic
extremism, evolution of domestic extremism.

**AST740 - Terrorism, Threats & Vulnerability**
The course will help "bound the problem" of Homeland Security by examining how terrorism has spurred sharp
changes in US strategy, policy and governmental design, and how those changes should continue over the
near and longer term. Elements of Threat and Vulnerability Assessments will be thoroughly discussed, as well
as various procedures for assessments and the method of tailoring the assessment to the facility/area under
study. Manners of protecting the facility/area in question will then be addressed as well as evacuation plans and
emergency plans.

**AST760 - Biological, Chemical, Nuclear and WMD Threats in Homeland Security**
This course gives a thorough overview of the different types of biological, chemical and nuclear weapons and
weapons of mass destruction in existence today. The intelligence preparation for vulnerability analyses from
nuclear, biological and chemical weapons employment, including low-level radiation, depleted uranium and
toxic industrial chemical concerns are addressed. Vulnerability reduction measures that can be implemented for
protection are also discussed. Formats for conducting risk assessments and vulnerability analyses are covered.

**AST780 - Intelligence Practice in Homeland Security**
This course examines threats, vulnerabilities, objectives, strategy, instruments of national power, resources, and
risks associated with ensuring homeland defense. Students will have the opportunity to fully address and create
policy, and discuss organizational and substantive issues regarding Homeland Security intelligence support.
An overview of diverse intelligence disciplines and how the Intelligence Community operates will be discussed.
Course emphasis will be on issues affecting policy, oversight and intelligence support to Homeland Security and
national decision-making.

**ATE-Athletic Training**
**ATE600 - Cadaver Anatomy Dissection**
This course will entail dissection of a human cadaver including musculature, nerve innervation, and vascular
supply of the extremities as well as the pectoral and pelvic girdles.

**ATE603 - Foundations in Athletic Training**
This course provides an overview of the profession of athletic training by describing the scope of practice,
employment settings, and professional regulations. Additional information will include an introduction into the
injury process, medical terminology, and documentation.

**ATE610 - Clinical Skills in Athletic Training with LAB**
Introduction to patient-based athletic training skills, including, but not limited to; goniometry, crutch fitting, taping/wrapping, vital sign assessment etc.
Course Descriptions

ATE615 - Emergency Care with Lab
The course focuses on the knowledge and skills necessary for the immediate management of musculoskeletal, cardiovascular, and neurological trauma. Students will develop the knowledge and skills necessary to differentiate between - and provide proper care for - pathologies ranging from minor to potentially catastrophic.

ATE630 - Therapeutic Interventions II with Lab
The course contains the knowledge and skills necessary for an athletic trainer to plan, implement, document and evaluate the efficacy of a therapeutic intervention program for the rehabilitation of an injured patient. This course will contain therapeutic exercise techniques for the whole body focusing on mobilizations, pain-free range of motion, flexibility, muscle strength, neuromuscular control, speed, endurance, power, agility, and cardiovascular fitness.

ATE635 - Examination of the Lower Extremity with Lab
In this course, students will study the pathology, etiology, and diagnostic principles of common musculoskeletal disorders and orthopedic injuries of the lower extremity.

ATE650 - Head & Spine Cadaver Anatomy Dissection
This course will entail focused human cadaver dissection of the head, neck, and spine including detailed study of the osteology, musculature, innervation and vascular supply of these regions.

ATE655 - Examination of the Head & Spine with Lab
In this course, students will study the pathology, etiology, and diagnostic principles of common musculoskeletal disorders and orthopedic injuries of the head and spine.

ATE660 - Principles of Research
This course will introduce and explore scientific inquiry and interpretation of research in athletic training. Students will gain familiarity with the concepts of evidence-based practice, critically appraised topics, institutional review board processes and various fundamentals of experimental research. Additionally, students will become skilled at using library resources to conduct literature reviews. Students will create a research topic of their own and begin to outline their research interests and focus in educational and applied athletic training. Students will be introduced to current library research resources and methodology through interaction with librarian assigned to work with this discipline.

ATE661 - Research Project I
This course is designed to facilitate the development of a research thesis or project from their research question created in ATE 660. Students will write an introduction, methods, literature review, and IRB application. Students will be required to propose their research to the course instructor, research committee, and campus community through a formal presentation. Students will be introduced to current library research resources and methodology through interaction with librarian assigned to work with this discipline.

ATE665 - Examination of the Upper Extremity with Lab
In this course, students will study the pathology, etiology, and diagnostic principles of common musculoskeletal disorders and orthopedic injuries of the upper extremity.

ATE670 - Practicum I
This course is the first in a series of athletic training clinical education experiences with the purpose to develop, refine, and integrate classroom/lab knowledge and skills with the delivery of evidence-based patient care. The student will work under the direct supervision of their assigned preceptor in a variety of clinical settings and populations to gain and refine introductory clinical and administrative skills. Athletic training skills and concepts introduced in other AT courses will be reinforced in the classroom setting and evaluated in both the classroom and/or clinical setting.

ATE671 - Elective Practicum
This course is designed to allow students to gain additional clinical education experiences. This course, if elected to enroll, students will continue the development of clinical skills progressing from ATE 670. Under the guidance
Course Descriptions

of the Clinical Coordinator/Program Director, a Clinical Affiliation Agreement will be set up with the desired clinical site the student would like to be engaged (or a site can be selected that the program already has an established agreement with). The student will complete hands-on clinical experiences, under the direct supervision of a preceptor.

**ATE673 - Practicum II**
This course is the second in a series of athletic training clinical education experiences with the purpose to develop, refine, and integrate classroom/lab knowledge and skills with the delivery of evidence-based patient care. The student will work under the direct supervision of their assigned preceptor in a variety of clinical settings and populations to gain and refine introductory clinical and administrative skills. Athletic training skills and concepts introduced in other AT courses will be reinforced in the classroom setting and evaluated in both the classroom and/or clinical setting.

**ATE690 - Therapeutic Interventions I with Lab**
The course entails the study of mechanisms of pain management and mediation, and the theory and practice of therapeutic interventions/modalities including, but not limited to, thermotherapy, cryotherapy, electrotherapy, compression, traction and manual therapy. Student will be able to explain the theory behind the use of electromagnetic and acoustic modalities and demonstrate the proper application of therapeutic modalities.

**ATE700 - Gross Anatomy of the Extremities**
This course will entail a detailed and thorough study of human upper and lower extremities, including their musculature, nerve supply and associated vasculature.

**ATE701 - Technology in Athletic Training**
The purpose of this course is to explore how technology can be utilized in the profession of athletic training. Athletic trainers perform in the following five practice domains: Injury/Illness Prevention and Wellness Protection, Clinical Evaluation and Diagnosis, Immediate and Emergency Care, Treatment and Rehabilitation, and Organizational and Professional Health and Well-being. Technology can be applied in each of these areas to enhance the capabilities of the athletic trainer. This course will focus on hardware and software technologies including the use of mobile devices in the practice of athletic training.

**ATE705 - Evidence based Practice in Athletic Training**
This course provides students with an understanding of evidence based practice as it relates to the practice of athletic training. Students will examine how practice guidelines are created from systematic reviews of the literature and outcomes studies. The course will also provide students with an appreciation of the importance of evidence based practice in maximizing quality of patient care, seeking out and obtaining reimbursement, and enhancing clinical competence.

**ATE715 - Clinical Pathologies**
Concepts and skills for the evaluation of general medical conditions are the focus of this course. Pathological conditions of the respiratory, cardiovascular, gastrointestinal, genitourinary, integumentary, and neurological systems are examined with emphasis on recognition and determination of plan of care and the need for physician referral.

**ATE723 - Administration in Athletic Training**
This course provides an overview of the administrative issues in athletic training. Administration topics will include management of personnel, financial resources, legal concerns, risk management, facility design, emergency action plans, delivery of health care services, and insurance. The course will examine professional and governing organizations, various issues, policies, and procedures surrounding the healthcare profession of athletic training. Current issues in athletic training related to professional conduct and practice will also be discussed will also be discussed.
Course Descriptions

ATE740 - Advanced Nutrition for Sport & Exercise
This course entails the study of concepts of nutrition and the effects of nutritional practices on everyday life and activity/sports. The course is designed to allow students to apply nutritional concepts to various types of athletes to support health and enhance performance.

ATE744 - Pharmacology
This course provides an overview of the management and administration of over the counter and prescription drugs. This course also looks at the pharmacokinetics and pharmacodynamics of drugs, performance enhancing substances, and drugs affecting the musculoskeletal, cardiovascular, nervous, endocrine, and gastrointestinal systems.

ATE745 - Contemporary Issues in Athletic Training
• To provide the graduate student the opportunity to research topics of interest to the student, present an oral report and to interact at a high level of knowledge with their fellow students enrolled in the class. • To provide the graduate student the knowledge involved in administering, developing and organizing all aspects of an athletic training education program. • To provide the graduate student the knowledge in developing and organizing an athletic training facility. • To provide the graduate student the opportunity to research and write on current issues, topics and problems in sports medicine and athletic training. • To provide the graduate student the knowledge and information on the administrative responsibilities of a certified athletic trainer.

ATE750 - Orthopedic Appliances: Casting & Bracing
This course provides students with the knowledge and skillset of orthopedic casting and necessary training to become a Registered Orthopedic Technologist.

ATE760 - Research Project II
This course is designed to allow continued work toward the completion of student’s research thesis/project. Data collection and analysis will be at the core of this course. Students will be allowed time outside of the classroom for data collection while working in the classroom on statistical analysis of their findings.

ATE761 - Research Project Capstone
This course will serve as the capstone to the athletic training research sequence. Students will synthesize their research findings through a discussion of results allowing for dissemination. Students will defend their research through a formal presentation, prepare a manuscript suitable for publication to a professional journal and create an abstract and professional poster.

ATE770 - Athletic Training Practicum
This course provides students with the opportunity to apply entry-level athletic training knowledge and skills to their practice of athletic training. Students will be expected to apply evidence based techniques to their clinical decision making and appraise the effectiveness of their treatments and interventions. Professionalism and ethical behavior in the practice of athletic training will also be discussed.

ATE772 - Clinical Immersion
This course is the third in a series of athletic training clinical education experiences with the purpose to develop, refine, and integrate classroom/lab knowledge and skills with the delivery of evidence-based patient care. The student will work under the direct supervision of their assigned preceptor in a variety of clinical settings and populations to gain and refine introductory clinical and administrative skills. Athletic training skills and concepts introduced in other AT courses will be reinforced in the classroom setting and evaluated in both the classroom and/or clinical setting.

ATE774 - Practicum III
This course is the fourth in a series of athletic training clinical education experiences with the purpose to develop, refine, and integrate classroom/lab knowledge and skills with the delivery of evidence-based patient care. The student will work under the direct supervision of their assigned preceptor in a variety of clinical settings and populations to gain and refine introductory clinical and administrative skills. Athletic training skills and concepts
Course Descriptions

introduced in other AT courses will be reinforced in the classroom setting and evaluated in both the classroom and/or clinical setting.

**ATE775 - Athletic Healthcare for Special Populations**
This course provides an overview of unique issues as they relate to athletic healthcare in special populations. Anatomical and physiological differences of a variety of special populations will be explored. Challenges to athletic healthcare for special population including evaluation, treatment and rehabilitation of special population athletes will be addressed as well as injuries and illnesses unique to the population.

**ATE776 - Practicum IV**
This course is the fifth and final course in a series of athletic training clinical education experiences with the purpose to develop, refine, and integrate classroom/lab knowledge and skills with the delivery of evidence-based patient care. The student will work under the direct supervision of their assigned preceptor in a variety of clinical settings and populations to gain and refine introductory clinical and administrative skills. Athletic training skills and concepts introduced in other AT courses will be reinforced in the classroom setting and evaluated in both the classroom and/or clinical setting.

**ATE780 - Research Applications in Athletic Training**
This course provides students with an understanding of research and its value in the profession of athletic training. Additionally, this course will provide students with an understanding of evidence-based practice as it relates to the practice of athletic training. Students will examine how practice guidelines are created from systematic reviews of the literature and outcomes studies. The course will also provide students with an appreciation of the importance of evidence-based practice in maximizing quality of patient care, seeking out and obtaining reimbursement, and enhancing clinical competence. Research will also be applied to non-patient care problems and issues facing the athletic training profession.

**ATE781 - Complementary & Alternative Therapies with Lab**
This course focuses on the treatment of musculoskeletal conditions through the use of manual rehabilitative techniques and complementary and alternative therapies to assist a patient in treatment and recovery.

**ATE800 - Methods of Research in the Allied Health Sciences**
The course studies the basic tenets of scientific research as they apply to the allied health fields. Topical discussions include development and limitation of a research problem, research methodology, basic principles of tests and measurements, the review of the literature and library utilization, and writing the research document.

**ATE810 - Thesis Seminar**
This course is designed to assist the graduate level student in the development of the first three chapters of their Master's Thesis. Students will defend their thesis proposal in a mock prospectus meeting.

**ATE820 - Athletic Training Research Project**
Students will produce a major culminating piece of academic work that synthesizes athletic training coursework and research in peer-reviewed literature. This will take the form of a research activity including original research, creation of an educational resource, a novel application of technology, a novel performance enhancement program or other extensive produced work that is approved by the course instructor.

**BUS-Business**
**BUS741 - Business Law**
This course is designed to introduce students to the American legal system, increase their understanding of legal issues and potential liabilities in business contexts, and equip them to meet their legal obligations with ethical integrity in a competitive marketplace. Topics will include the structure and function of the American legal system, contracts, torts, white-collar crime, business organizations, and intellectual property law, with emphasis on legal reasoning and policy implications. It differs from undergraduate business law courses in that it will cover more material and at a greater depth, including a substantive group project where the students will explore a particular aspect of business law in an in-depth manner.
Course Descriptions

**BUS743 - Business, Government, and Society**
From management perspective, this course seeks to explore the interactions among business, government, and society in general. In doing so, it focuses on, among other issues, corporate social responsibility, ethics, globalization, the importance of law and regulation in the business environment, and historical background.

**BUS745 - Business Ethics**
The graduate course provides a framework to identify, analyze and understand how business people make ethical decisions and deal with ethical issues. Using a case method approach, students will analyze real-life business situations and gain insight into the realities and complexity of making decisions in a business environment.

**BUS771 - Quantitative Methods**
This course is designed to provide students with an introduction to the field of management science and a conceptual understanding of the role that quantitative methods play in the decision-making process. The focus of the course is the application of the scientific method to problem solving. Whenever possible, concrete examples, real-world applications and case studies are used to practice concepts. Through the course, students will learn a number of mathematical and statistical tools that can be used by the decision maker and learn to recognize the appropriate technique for the situation.

**BUS782 - Forecasting and Predictive Modeling**
This course will cover various topics used in developing predictive modeling and applying statistical forecasting methods used throughout business and academic. Topics in the course will assist business professionals in leveraging historical data to build models for predicting future results. Additionally, the course will utilize these topics in conjunction with data, integration, and information deployment to provide improved planning and better predictive decision making. Forecasting techniques will be covered to evaluate complex business scenarios to make better decisions in Finance, Marketing, Production Scheduling, Process Control, and Strategic Planning.

**BUS797 - Research Studies in Business**
A special tutorial arrangement between a graduate student and a faculty member that permits guided reading and research in management. The graduate student must submit a proposal to the program coordinator containing an outline and a brief discussion of the planned work and the name of the professor under whom the graduate student wishes to work. The proposal must be approved by the program coordinator and the department chair before the graduate student may register for the course. At the end of the term, the supervising professor will submit the graduate student's grade and research paper to the program coordinator.

**BUS799 - Strategic Management**
This course is designed as an integrated course that provides a theoretical and practitioner-oriented approach to the understanding of strategic management in organizations. An integrative strategic management model is used to follow the flow from vision/mission to internal/external environmental scanning to strategy development, selection, implementation, and evaluation. Cohesive case studies are used to detail the strategic circumstances of an actual company and to provide hands-on experience in applying the strategic management concepts and techniques to a real organization.

**CED-Counselor Education**
**CED700 - Foundations of School Counseling**
The role of school counselors is explored in relation to counseling history, philosophy, theory, technology and trends. Counseling within the elementary and secondary school settings, consultation, and coordination are core components. Professional development, documentation, and ethical and legal standards are addressed. This course also focuses on the development of instructional programs as part of a comprehensive K-12 school counseling curriculum, including teaching methods, lesson planning and participation in multidisciplinary teams. Computer technology is explored and used as a resource for school counselors.

**CED702 - Counseling Theory**
This course reviews theories, objectives, principles and practices of counseling individuals, including children and the family. These theories are applicable in schools and other human service institutions.
Course Descriptions

CED703 - Consulting Theory
This course is an advanced-level course and has theoretical and practical components. In the theoretical component, process consultation is highlighted as an applied behavioral science. Emphasis is placed on levels of environmental quality within an organization. Specific human processes of inclusion, membership, leadership, control, communication and problem-solving are stressed. The practical component deals with initial contact, organizational diagnosis, process intervention, evaluating progress and closure.

CED705 - Developmental Group Process
This course includes the meaning, function, types and principles of the group approach to counseling; the dynamics of group interaction; leadership; role playing; personal development in groups; and the influence of the group processes on individual development.

CED708 - Substance Abuse and Addiction
The focus of this course is prevention and rehabilitation in drug and alcohol abuse. Since substance abuse and addiction are present in all sectors of society, it is important for human service professionals to understand the process of addiction and the special problems experienced by affected individuals and their significant others.

CED710 - Counseling Skills and Techniques
Graduate students develop counseling skills by learning and practicing therapeutic techniques that facilitate the counseling process. In a laboratory setting, students practice basic counseling skills such as attending to nonverbal behavior, focusing, reflection of feeling, etc. Students will audiotape and videotape practice sessions.

CED711 - Clinical Field Experience (Practicum)
The student implements effective helping skills and techniques using one or more recognized counseling theories. Students must see individual clients, and group experiences are required. Students spend 150 hours on site under the supervision of an experienced counselor, receive individual and/or triadic supervision from the site supervisor and faculty supervisor, and attend a regularly scheduled group supervision seminar. Students must be able to audiotape or videotape counseling sessions.

CED712 - Clinical Field Experience in Counselor Education
The purpose of this course is threefold: to help students practice the skills they have learned and apply them in a real-world setting; for students to learn to present cases to peers and offer constructive criticism and ideas in a "treatment team" or "case conference" format; and for students to actively participate in the supervision group experience in order to develop as counselors, supervisees and members of a "team" dedicated to their own and their peers' growth as professionals.

CED717 - Diagnosis and Treatment in Mental Health
Students will learn to make accurate child and adult diagnosis according to the Diagnostic and Statistical Manual of Mental Disorders (DSM IV-TR). Basic psychopathology and treatment strategies will be explored. Limitations inherent in the use of DSM and other diagnostic classifications are discussed.

CED720 - Cross-Cultural Counseling
Students will explore the cognitive, affective and behavioral considerations of culturally diverse client groups. Accordingly, counseling theories and programmatic approaches relevant to the mental health needs and concerns of these groups will be introduced. This will include an examination of how cultural attributes, strategies and coping skills can be effectively synthesized into the counseling process.

CED721 - Diagnosis and Counseling Children and Adolescents
This is a master's-level course in the diagnosis and counseling of children and adolescents in the school setting. Students will be able to interpret diagnostic criteria of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV) specifically related to children and adolescents in the school setting. Treatment and counseling considerations for psychopathologies most likely encountered by school counselors will be introduced in depth and students will be able to apply this knowledge.
Course Descriptions

CED722 - Assessment Procedures for Professional Counselors
This course is designed to assist school counselors, clinical mental health counselors, marriage and family therapists, career counselors, addictions counselors, and other specialized professional counselors in becoming better consumers of the diverse methods and procedures used in the process of assessment. The premise of this course is that assessment involves collecting and integrating information about an individual or group from multiple methods and multiple sources. This course introduces studies that provide an understanding of individual and group approaches to assessment and evaluation in a multicultural society. This course also provides an understanding of assessment in counseling through an overview of basic counseling assessment concepts, an understanding of test construction, familiarity with instruments, and an overview of test interpretation. The course provides an overview of assessment of intelligence and general ability, achievement, aptitude, career and employment and personality as well as assessment in school and mental health settings. The course will also cover ethical and legal issues in the use of counseling assessment instruments, communicating assessment results and computer-based assessment. These methods will be studied in relation to a variety of institutions and facilities, including schools, mental health clinics, career counseling centers, substance abuse treatment centers, private practices, psychiatric hospitals and vocational rehabilitation centers. This course has clearly described implications specific for the field of professional counseling, including school counselors, clinical mental health counselors, and other counseling specialties (http://www.counseling.org/aca-community/learn-about-counseling/what-is-counseling/overview).

CED724 - Experiential Group Process
This course requires that students participate in a personal growth group with other graduate counseling students. The purpose of the group is to have students develop an increased understanding of their thoughts, feelings and behaviors. The department feels that openness to understanding oneself is very important for counselors. In order to maintain confidentiality, an adjunct faculty member teaches this course. Grading is pass/fail.

CED732 - Current Issues in School Counseling: Evidence Based Practices and Inclusion
The focus of this course is to provide an overview of the roles and responsibilities of the school counselor in working with exceptional children. For the purpose of this course, exceptional children will include the following areas: special educational, alternative and at-risk, and gifted and talented. Through the use of journal articles, research papers, course products and class activities and discussions, the course will highlight how school counselors work with the regular education teachers, learning support staff, families and outside therapists in serving as advocates for and addressing the needs of exceptional students.

CED735 - Introduction to Family Therapy
This course provides an introduction to family counseling. A systems perspective is emphasized. This course covers the history of the field and provides an introduction to the theories, processes and techniques of family therapy. Professional issues, such as ethical, legal and multicultural issues, will be addressed.

CED755 - Counseling Across the Life Span: Prevention and Treatment in Schools and the Community
The practice of counseling involves working effectively with unique and diverse individuals representing a wide range of abilities, ages and life circumstances. This course examines the lifelong process of human growth and development as experienced by counseling clients, viewed through the eyes of a practicing counselor. The developmental tasks of children, teens and adults as represented by Eric Erickson, Carl Jung, Abraham Maslow, and others will serve as the framework for a deeper understanding of the role counselors’ play as they assist their clients throughout their lives.

CED760 - Gambling Addiction
This course is designed for graduate students interested in working in community based human service systems and school counseling positions. Although directly applicable for those interested in the field of Problem Gambling/Gambling Addiction, alcohol and other drug rehabilitation treatment, the course material is also important for training professionals dealing with any target population. Since Problem Gambling/Gambling Addiction is inherent in all sectors of our society, it is important for human service professionals to understand Gambling Addiction and other Impulse Control Disorders, the dynamics of addiction and the special problems experienced by affected individuals.
Course Descriptions

CED761 - Addiction and the Family
This course is designed for graduate students interested in working in community based human service systems and school counseling positions. Although directly applicable for those interested in the field of alcohol and other drug rehabilitation treatment, the course material is also important for training professionals dealing with any target population. Characteristics are features discussed in this course are not limited to those individuals that have grown up in dysfunctional families associated to substance abuse or dependence but familial dysfunction in general. Characteristics of this type of role development can be found in any family with dysfunction and are precursors for multiple mental health diagnoses ranging from mood and affective disorders as well as axis to involvement or disorders or personality. Additionally, since substance abuse and addiction is inherent in all sectors of our society, it is imperative for human service professionals to develop a comprehensive understanding of the pertinent assessment and evaluation procedures relevant to working with the substance abuse population.

CED762 - Assessment and Evaluation of Substance Use Disorders and Advanced Skills
This course is designed for graduate students interested in working in community based human service systems and school counseling positions. Although directly applicable for those interested in the field of alcohol and other drug rehabilitation treatment, the course material is also important for training professionals dealing with any target population. This course integrates advanced group leadership practices and or interventions for the purpose of preparing counselors to appropriately facilitate/manage a process/psychoeducational group with a substance abuse focus. Additionally, since substance abuse and addiction is inherent in all sectors of our society, it is imperative for human service professionals to develop a comprehensive understanding of the pertinent assessment and evaluation procedures relevant to working with the substance abuse population.

CED770 - Spiritual, Ethical, and Religious Values in Counseling
This is an advanced level course, the purpose of which is to increase students’ understanding of contemporary topics, practices and problems relevant to counselors who work in school and agency settings. Students in this class can expect to be proactive in researching, and sharing information as well as evaluating practices and policies for their efficacy in various settings. They will demonstrate their integration of this new knowledge into their prior learning as it relates to the counseling field through writing, discussion and presentations.

CED771 - Applied Spiritual, Ethical, and Religious Counseling Theory
This course is designed to introduce students to the theories, techniques, and treatment modalities needed by spiritual counseling professionals to best meet the needs of clients in hospitals, pastoral care & counseling, and religious settings. This class will focus on the diverse theoretical applications available in the field of spiritual counseling.

CED772 - Grief and Loss Counseling
This course is designed to introduce students to the theories, techniques, and treatment modalities needed by school and community counseling professionals to best meet the needs of bereaved clients and others affected by grief, loss, and death anxiety. This class will focus on the diverse interventions used by counselors applied therapeutically to the psychological, cultural, spiritual, and somatic aspects of grief.

CED774 - Advanced Issues and Techniques in Spiritual, Ethical and Religious Values in Counseling
This course is twofold. One, the course is designed to prepare students for the roles as professionals in the field of spiritual and religious counseling. Areas of study include professional ethics and legal issues, record keeping, and working as part of an interdisciplinary team or as a consultant with individuals, families, groups and organizations who want to integrate spiritual and religious values in counseling. Additionally, this course is designed for students to improve their counseling awareness, knowledge and skills as well as career development techniques individuals, families, groups and organizations who want to integrate spiritual and religious values in counseling. Participants have an opportunity to develop and practice strategies to enhance their effectiveness in spiritual and religious counseling. This course includes field experiences with individuals, families, groups and organizations of their choice.

CED777 - Student Affairs Services in Higher Education
This course is a survey of theoretical and applied information for counselors working in student affairs settings. Course content includes an introduction to the philosophical, legal and ethical foundations of the field of student
affairs work; an overview of the functional areas within student affairs divisions; and current issues in the field. The basics of program planning and evaluation are also introduced.

CED778 - The College Student and Higher Education Environment
This course examines the characteristics, learning and developmental needs of college students and the impact of the higher education environment on both traditional and nontraditional students. Issues that might affect the development and functioning of college students are explored in depth.

CED779 - Administration of Student Services in Higher Education
This course is intended to introduce students to the administration of student affairs programs in higher education. This course will focus primarily on the purpose of student affairs, its functions and how they can be effectively managed, coordinated and integrated as part of the broad educational purposes of the institution. It also examines institutional strategies for organizing, staffing and funding student affairs programs and services.

CED780 - Issues and Techniques in Counseling Athletes
This course examines current counseling strategies used with members of sport teams at the youth, high school, college and professional levels. Participants will explore current research in three main areas: motivation and life skill development, psychosocial development, and career maturity.

CED781 - Sports Counseling Programming
This course offers students an overview of various life skills, including career development, study skills, goal setting, time management, health and wellness, values clarification, problem-solving, and decision-making, to name a few. Students will develop a teaching philosophy that includes methods for teaching life skills to the athlete population. They will be given opportunities to make presentations on topics of their interest so that they may teach or offer workshops on life skills to the athlete population.

CED782 - Advanced Issues and Techniques in Counseling Athletes
This course is twofold. One, the course is designed to prepare students for the roles as professionals in the field. Areas of study include professional ethics and legal issues, record keeping, NCAA guidelines, and working as part of an interdisciplinary team or as a consultant with individual athletes, teams and athletic organizations. Additionally, this course is designed for students to improve their career development, counseling, and skill building techniques with youth, adolescents, young adult and the adult athlete population. Participants have an opportunity to develop and practice strategies to enhance their effectiveness in counseling this unique cultural group. This course includes supervised fieldwork related to sports counseling, consultation, and/or sports counseling programming with the athlete population of your choice. Students will be on site for a minimum of 25 hours (if registered for 3 credits) or 50 hours (if registered for 6 credits). Students will receive a minimum of one-hour supervision per week by the on-site supervisor. In addition, students will be required to attend group supervision, via the use of technology, once a week where students will present cases.

CED783 - Counseling and Advising Athletes with Death, Loss and Grief
This is an advanced level course, the purpose of which is to increase students’ understanding of contemporary topics, practices and problems relevant to counselors who work in school and agency settings. Students in this class can expect to be proactive in researching, and sharing information as well as evaluating practices and policies for their efficacy in various settings. They will demonstrate their integration of this new knowledge into their prior learning as it relates to the counseling field through writing, discussion and presentations. More specifically, the purpose of this course is to prepare you for dealing with death, loss and grief situations you may encounter working with the athlete population. We will spend time reflecting on how people deal with death, loss and grief and start to develop your skills in grief counseling and intervention. You will also examine some of the relevant research on grief counseling and intervention as well as the relevant research on death, loss and grief in sports. However, your major focus throughout the course will be on learning the practical skills of helping people who are dealing with death, grief and loss issues and learning assessment and treatment strategies used by counselors, educators, and other helping professionals who work with the athlete population to assist individuals, groups, and/or organizations (e.g., athletes, teams, athletic programs, schools, etc.).
Course Descriptions

CED784 - Student Athlete Mental Wellness
This course offers students a comprehensive understanding of student athlete mental wellness, mental health concerns, and emergencies. Mental health issues can affect the ability of student athletes to function effectively in their daily life and this includes their athletic performance. Thus, it is imperative that individuals providing mental health care to student athletes be able to identify (mental health issues and emergencies), intervene (with appropriate techniques), and refer (as needed to the appropriate entities). This course will address the previously mentioned issues in detail while promoting cultural competency in working with a diverse population of student athletes.

CED785 - Research Methods in Counselor Education
This is an introductory course in behavioral research techniques. The emphasis will be on the design, evaluation, and interpretation of basis human research. The main goal will be for students to be able to read, understand, and evaluate basic behavioral research.

CED786 - Career Counseling
This course reviews the theory and process of giving career information and of counseling in school and agency settings. Topics include sources of career information, appraisal, classification of careers, career resources, career and vocational education, systems of career guidance, and theories of career development.

CED787 - Ethics, Integration, Consultation, and Collaboration
This course is intended for students who are near the end of their School Counseling and Clinical Mental Health programs. The purpose is to integrate the materials learned and to discuss the professional topics, practices, and applications of mental health and school counselors. This is done by focusing on the counselor as an ethical practitioner. Guidelines for ethical behavior and decision-making are applied to case studies. The Code of Ethics for counselors, as well as legal issues, relevant to school and professional counseling are taught in this course. This course will address the role of collaboration and consultation for counselors in various settings.

CED788 - Contemporary Topics in Counselor Education
This is an advanced-level course, the purpose of which is to increase students’ understanding of contemporary topics, practices and problems relevant to counselors who work in school and agency settings. Students can expect to be proactive in researching and sharing information, as well as evaluating practices and policies for their efficacy in various settings. They will demonstrate their integration of this new knowledge into their prior learning as it relates to the counseling field through writing, discussion and presentations.

CED789 - Introduction to Clinical Mental Health Counseling
This course is a survey of theoretical and applied information for counselors working in mental health settings. Course content includes an examination of mental health counseling as a helping profession, an overview of the history of mental health counseling, the practice of mental health counseling, and the roles and tasks expected of mental health counselors. Mental health counseling settings, relationships with other human service professionals, and characteristics of individuals and communities are discussed. The topics of policy, consultation and advocacy, as well as current issues in mental health counseling, are covered.

CED790 - Counseling Internship
This course provides advanced graduate students in counseling with a supervised, on-the-job experience in an agency or school setting as a counselor trainee. Students will be on the site for a minimum of 300 hours (if registered for 3 credits) or 600 hours (if registered for 6 credits). Students who anticipate obtaining the Licensed Professional Counselor credential from the Commonwealth of Pennsylvania will be required to complete 6 credits of internship in addition to the requirements of practicum (CED 711). Of the 600 hours, a minimum of 240 hours must be direct service work with clients. Students will receive a minimum of one-hour supervision per week by the on-site supervisor. In addition, students will be required to attend a group supervision class once a week where students will present cases. Ethical and legal issues will be discussed, and information shared.

CED791 - Crisis Counseling and Disaster Preparedness
This course is a survey of theoretical and applied information for counselors working in crisis and disaster situations. Course content includes an examination of the dynamics, types and characteristics of crises and
disasters, the reactions and risk factors of those impacted, as well as the nature and types of responses made in crises and disasters. Intervention techniques and strategies normally employed by counselors handling crises and disasters and with specific vulnerable populations will be explored. Multicultural, ethical, legal, moral and contemporary issues will also be discussed.

CIS-Computer Info Systems
CIS601 - Advanced Data Preparation and Cleaning
This course provides students with an introduction to the need for and methods for data cleaning. The course presents methods for locating and handling invalid values, out-of-range values, and missing values along with methods for managing datasets. The course uses SAS® software.

CIS602 - Data Visualization
This course explores techniques and tools for creating effective data visualizations. The course covers the creation and exploration of visualizations for categorical data, time series data, spatial and geospatial data. SAS® software will be used for this course.

CIS603 - Data Visualization
This course explores techniques and tools for creating effective data visualizations. The course covers the creation and exploration of visualizations for categorical data, time series data, spatial and geospatial data. SAS® software will be used for this course.

CIS604 - Advanced Big Data Analytics
This course is intended to provide the student with an introduction to big data, big data analytics and several methods useful in big data analytics such as clustering, association rules and various forms of regression. SAS® statistical software will also be introduced and used to solve data problems.

CIS605 - Advanced Data Analysis Capstone Project
This course is designed for the certificate in Data Science to provide hands-on experience in the area of data science. This experience will enable students to apply their knowledge of data science and provide valuable experience in the application of methods studied within the program that should enhance their job opportunities upon graduation. Students will receive experience with real world data. Analysis will be completed using SAS®.

CMD-Communication Disorders
CMD600 - Research and Professional Practice in Speech-Language Pathology
This course is designed to teach the graduate student to be both a consumer and producer of research. A research endeavor (research paper, project or thesis) is a requirement of graduation and is initiated in this class. Practice patterns in the profession (ethical, clinical and legal aspects) are also addressed.

CMD701 - Language Disorders in Adults
This course will prepare the graduate student with the academic information necessary to assess and treat language disorders in the adult population, including those patients diagnosed with cerebrovascular accident, dementia, traumatic brain injury, Alzheimer’s Disease, Parkinson’s Disease, and others.

CMD702 - Language Disorders in Children
Challenged by the number and diversity of language disorders, the graduate student will demonstrate the ability to appropriately select from a number of evidence-based treatments the one(s) most likely to build language within the language delayed or disordered child. The graduate student will demonstrate an understanding of the theoretical underpinnings upon which each treatment is built, and the key components of each. He/she will be able to assess not only the strengths and weaknesses of the treatment protocol, but the strengths and opportunities to improve while watching peers actually use the treatment during classroom presentations. He will reach “mastery level” for administration of 5 standardized language tests commonly given to children.

CMD703 - Fluency Disorders
This course provides the student with extensive information about the etiology and development of stuttering, appraisal of symptoms and underlying processes, and treatment of beginning, intermediate and advanced
stuttering in both children and adults. Review of major theories and therapies is provided with special emphasis placed on the effectiveness of combining these therapies eclectically. Through lecture, videotapes, in-class practice and clinical observation, the student is exposed to all the necessary theoretical and practical information necessary for basic evaluation and treatment of stutterers.

CMD705 - Voice Disorders
The purpose of this course is to provide comprehensive academic and clinical training in the etiological factors, description, and management of organic voice disorders. The teaching of esophageal speech, the use of the artificial larynx, and the study of tracheo-esophageal practice are covered in detail.

CMD707 - Phonology and Articulation
This course will prepare the serious student with the academic information necessary to assess and treat articulatory and phonologic disorders of both organic and functional origin. Assessment and treatment of special populations (delays, disorders, and cross-cultural variances) will be emphasized.

CMD708 - Neurology
This course is designed to provide the student with a understanding of the neurological governance of the body as that body carries out its communication functions: speaking, voicing, hearing, comprehending, perceiving, thinking and remembering. After appropriate review of neurologic development, structure and function within the context of normalcy, deviations from normal (secondary to disease, defect, aging, stress, injury or disorder) will be discussed. Hemisphericity (including split brain research), visual neglect, cognitive style and comparative anatomy will also be presented. Though substantial amounts of anatomical information will be presented, the overriding style of the course is highly pragmatic. Clinical application for the speech pathologist will be the central theme of this course.

CMD711 - Applied Therapeutic Procedures in the Preschool Setting
The class, resembling a lab experience, provides the graduate student with an “hands-on” experience in a preschool setting with typically-developing children, as well as children having speech, language, and /or other hearing disorders in a preschool setting.

CMD712 - Applied Therapeutic Procedures in the Outpatient Setting
This practicum course provides the beginning student of communication disorders with the opportunity for real life client contact. He/she will learn by doing! He/she will be assigned to provide either diagnostic or therapeutic services to a communicatively-impaired outpatient who is enrolled in the university speech and hearing clinic. A faculty supervisor will direct the graduate student in his work with the client. Models and theories of typical/atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the language, articulation, stuttering, voice, dysphagia, and children with syndromes and adult populations. Federal entitlements that relate to the provision of specialized service, service options, and equipment for individuals with speech & language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed. This practicum course provides the graduate student with a realistic, practical, and comprehensive overview of clinical problems that are often encountered by the beginning clinician in an outpatient clinic setting. Beginning clinicians will take their first steps into the real world of clinical practice when assigned to clients in the university clinic. Advanced graduate students may enroll in this practicum class to gain specialized skill, or to work with complicated clients. This is a “hands-on” course where the student should expect some client contact. A major focus will be to consider all the important aspects of client management, including but not limited to creation and maintenance of an effective learning environment, the establishment of a climate of fairness, the use of challenging/consistent standards and goals, within a safe physical environment, where universal precautions are consistently taught and demonstrated, where treatment principles are evidence-based, student diversity is addressed appropriately, community needs and resources are adequate, and Pa. academic standards are met.
Course Descriptions

CMD713 - Applied Diagnostic Procedures in Speech Pathology

This practicum course provides the beginning student of communication disorders with the opportunity for real life client contact. He/she will learn by doing! He/she will be assigned to provide diagnostic services to communicatively-impaired clients who seek clinical care from the university clinic. The graduate student will be involved at all levels of client contact, including but not limited to (a) accepting referrals, (b) taking a case history, (c) administering tests, (d) making clinical observations, (e) interpreting results and behaviors, (f) generating treatment plans, (h) making recommendations, (l) counseling patients and families, and (j) communicating results to other medical and educational personnel verbally and in writing. A faculty supervisor will direct the graduate student in ALL appraisal and diagnostic work with clients. Models and theories of typical/atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) psychophysical bases, (c) linguistic and psycholinguistic aspects, and (d) social, behavioral, and cultural aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the language, articulation, stuttering, voice, dysphagia, and syndromic children and adult populations. This practicum course provides the graduate student with a realistic, practical, and comprehensive overview of formal and informal, standardized and non-standardized diagnostic and assessment procedures commonly used by speech-language pathologists. It is the clinician's first step into the real world of diagnostic practice. Once the graduate student is familiar with a diagnostic procedure, he will be given the opportunity to administer it to clients under direct supervision of an ASHA-certified faculty member. This is a "hands-on" course where the student should expect extensive client contact. A major focus will be to consider all the important aspects of client management, including but not limited to creation and maintenance of an effective learning environment, the establishment of a climate of fairness, the use of challenging/consistent standards and goals, within a safe physical environment, where universal precautions are consistently taught and demonstrated, where treatment principles are evidence-based, student diversity is addressed appropriately, community needs and resources are adequate, and Pa. academic standards are met. Federal entitlements that relate to the provision of specialized service, service options, and equipment for individuals with speech & language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD714 - Applied Audiologic Diagnostic and Rehabilitative Procedures

This practicum course provides the beginning student of communication disorders with the opportunity for real life client contact. He/she will learn by doing! He/she will be assigned to provide audiologic screening and therapy services to clients who seek audiologic care from this university clinic. The graduate student will be involved at all levels of client contact, including but not limited to (a) accepting referrals, (b) taking a case history, (c) screening the hearing ability of clients, (d) making clinical observations, (e) interpreting screening results and behaviors, (f) generating aural habilitation/ rehabilitation treatment plans, (h) making recommendations, (i) counseling patients and families, and (j) communicating results to other medical and educational personnel verbally and in writing. A certified SLP or audiologist supervisor will direct the graduate student in ALL of his screening and therapeutic work with clients. This practicum course provides the graduate student with a realistic, practical, and comprehensive overview of formal and informal, standardized and non-standardized assessment and therapeutic procedures commonly used by speech-language pathologists during the provision of audiological screening, or aural habilitation or rehabilitation. It is the clinician's first step into the real world of basic audiological practice. Clinical experiences provided through CMD 714 will comply with ASHA standards which clearly define the scope of practice for speech-language pathologists when providing audiologic services. Once the graduate student is familiar with specific procedures, he will be given the opportunity for "hands-on" client interaction under direct supervision of an ASHA-certified faculty- audiologist. Models and theories of typical/atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the speech, language, and syndromic populations. This is a "hands-on" course where the student should expect some client contact.
Course Descriptions

A major focus will be to consider all the important aspects of client management, including but not limited to creation and maintenance of an effective learning environment, the establishment of a climate of fairness, the use of challenging/consistent standards and goals, within a safe physical environment, where universal precautions are consistently taught and demonstrated, where treatment principles are evidence-based, student diversity is addressed appropriately, community needs and resources are adequate, and Pennslyvania academic standards are met. Federal entitlements that relate to the provision of specialized service, service options, and equipment for individuals with speech & language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD715 - Applied Therapeutic Procedures in the Educational Setting
This practicum course provides the beginning student of communication disorders with the opportunity for real life client contact. He/she will learn by doing! He/she will be assigned to provide either diagnostic or therapeutic services (or both) to communicatively-impaired children who is enrolled in private, public, elementary, middle school, or high school programs. A school-based, ASHA certified SLP will serve as the on-site supervisor, directing the graduate student in his work with clients under the liaison-guidance of assigned faculty from the university. This practicum course provides the graduate student with a realistic, practical, and comprehensive overview of clinical problems that are often encountered by the speech-language pathologist in the public or private educational setting. It may be the clinician's first step into the real world of clinical practice outside of the university clinic. The advanced graduate student may also enroll in CMD 715 to achieve specialized knowledge about the SLP as an educator. Throughout his graduate program, a student may enroll in CMD 715 more than one time. Since the mission of CMD 715 is to afford the graduate student with the opportunity to learn from a variety of others, it is assumed that each subsequent enrollment will occur in a different school or with a different school-based supervisor. ASHA requires that a student must complete practicum courses in three distinct sites. Such settings may include separate units/sets within a single organization IF each of those units provides a unique experience. Before RE-ENROLLING in this course, the graduate student should establish that the setting offers him a uniquely different experience than offered by previous settings. Models and theories of typical/atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the language, articulation, stuttering, voice, dysphagia, and syndromic children population. This is a “hands-on” course where the student should expect some client contact. A major focus will be to consider all the important aspects of client management, including but not limited to creation and maintenance of an effective learning environment, the establishment of a climate of fairness, the use of challenging/consistent standards and goals, within a safe physical environment, where universal precautions are consistently taught and demonstrated, where treatment principles are evidence-based, student diversity is addressed appropriately, community needs and resources are adequate, and Pa. academic standards are met. Federal entitlements that relate to the provision of specialized service, service options, and equipment for individuals with speech & language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD716 - Applied Neurogenic Procedures in Healthcare Facilities
This practicum course provides the beginning student of communication disorders with the opportunity for real life client contact. He/she will learn by doing! He/she will be assigned to provide either diagnostic or therapeutic services within a healthcare setting outside of the university clinic. A facility-based, ASHA certified speech-language pathologist will serve as the on-site supervisor, directing the graduate student in all of his work with clients under the liaison-guidance of assigned faculty. Models and theories of typical/atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the language, articulation, stuttering, voice,
Course Descriptions
dysphagia, and syndromic children and adult population. This is a “hands-on” course where the student should expect some client contact. A major focus will be to consider all the important aspects of client management, including but not limited to creation and maintenance of an effective learning environment, the establishment of a climate of fairness, the use of challenging/consistent standards and goals, within a safe physical environment, where universal precautions are consistently taught and demonstrated, where treatment principles are evidence-based, student diversity is addressed appropriately, community needs and resources are adequate, and Pa. academic standards are met. Federal entitlements that relate to the provision of specialized service, service options, and equipment for individuals with speech & language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD718 - Advanced Audiology for the SLP
This course will provide the student with an understanding of behavioral and electrophysiological assessments for the determination of the location of pathology within the auditory system. The student will be introduced to concepts concerning specification, selection, fitting, care, and use of amplification systems. Models and theories of typical/atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the speech, language, and syndromic population. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD731 - Early Intervention in Speech Language Pathology
This course offers the opportunity for comprehensive study of delayed and deviant speech, language and social interaction development patterns, hearing loss and deafness, and feeding and swallowing issues in children, from infancy through preschool age. The student will be provided a complete overview of the process from referral to assessment to treatment to transition (or discharge). This course meets the certification requirements for ASHA in the professional area, and contributes to the following sections of the Department Model: A3, B, 2, 3, 4, 5, C, D1, 2, 3, & 4. Models and theories of typical/atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the speech & language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD732 - Counseling in Speech-Language Pathology
This course will provide a theoretical and practical framework for the role of the speech-language pathologist in counseling individuals with communication and swallowing disorders. Emphasis will be placed on (1) selfidentifying strengths and areas of need as a clinician relative to the daily practice of interaction (2) applying a theory-based framework for counseling in the clinical setting (3) mastering the application of counseling microskills and (4) communicating effectively, recognizing the needs, values, preferred communication, and cultural/linguistic background of the client, client's family, caregivers, and relevant others.

CMD763 - Communication Problems of Special Groups
This course will focus on the difference in speech/language of non-native users of English, with attention given to assessing when and what types of intervention are ethically and professionally appropriate. Dialectical differences and professional/corporate speech will also be included, along with professional issues and marketing of services to the public. Models and theories of typical/atypical growth and behavior across age groups covered in this
Course Descriptions

class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the language, articulation, stuttering, voice, dysphagia, and syndromic population. Federal entitlements that relate to the provision of specialized service, service options, and equipment for individuals with speech & language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD764 - Instrumentation in Speech Language Pathology
A practical course in the use of instrumentation in the practice of Speech Language Pathology. A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects.

CMD765 - Dysphagia
This course is an in-depth study of deglutition (the normal act of swallowing) and dysphagia (swallowing disorders). It is deliberately designed in full, comprehensive, and particularized fashion because of the medical seriousness of dysphagia and its treatment: people DO DIE from dysphagia and from medical/clinical mistakes made in treating it. The course appropriately begins with anatomy and function of both normal and abnormal swallow patterns, then focuses on proper diagnosis and appraisal through the use of clinical exams, radiographic contrast examinations, electromyography, esophagoscopy, endoscopy and manometry. The final portion of the course focuses on surgical and therapeutic treatment strategies for the wide variety of dysphagic symptoms that exist for pediatric through geriatric populations. Some patient contact during the course should be expected. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed.

CMD766 - Traumatic Brain Injury
When working with many communication impairments, the speech/language pathologist functions as an individual practitioner fostering the necessary changes for the client by him-herself. Rehabilitation of the individual with traumatic brain injury (TBI) requires a diversified team of professionals working together throughout a lengthy continuum of care. In this class, the student will understand the individual and team goals for the client. The following topics will be addressed through lectures, in-class diagnosis, treatment, psychosocial and familial disturbances, conceptual issues, neuropsychological problems, cognition and memory deficits, language disorders, motor speech problems, augmentative communication, and pharmacological issues. Federal entitlements that relate to the provision of specialized service, service options, and equipment for individuals with speech and language disabilities will be introduced as appropriate. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be addressed.

CMD772 - Augmentative and Alternative Communication
This course is an in-depth study of: 1)The underlying theory of augmentative and alternative communication systems (AAC) including state-of-the-art and emerging technologies; and 2) Methodology for assessing and training individuals with communication disorders to use AAC systems. Emphasis is placed on functional strategies for the practicing clinician in AAC. Hands-on experience with various AAC systems is an integral part of this course Models and theories of typical/ atypical growth and behavior across age groups covered in this class will be discussed in such a manner that students begin to understand, and/or apply evidenced-based information to form therapeutic strategies related to cognition, communication, emotional/social development, motor development, sensory integration, and adaptation A major focus is on basic human communication processes including (a) anatomical and physiological bases, (b) the physical and psychophysical bases, and (c) linguistic and psycholinguistic aspects. A major theme in this class is to learn about therapeutic intervention strategies, materials and resources used with the language, articulation, stuttering, voice, dysphagia, and syndromic population. Where appropriate, service delivery models (collaboration, co-treatment, integration, pull-out of individuals and groups) will be discussed
### Course Descriptions

**CMD785 - Seminar in Medical Speech-Language Pathology**
A course in which students advance their knowledge in a specific content area not covered by other courses in the practice of Medical Speech-Language Pathology. This includes applied physiology and practice mechanics of particular relevance to healthcare settings. Particular emphasis is placed on evidence-based practice and the trans-disciplinary treatment model for communicatively or swallow-impaired patients who have multiple medical problems.

**CRJ-Criminal Justice**

**CRJ800 - Leading Criminal Justice Agencies**
This course is designed to introduce the student to the notion of complex leadership theory, particularly as it is applied to criminal justice agencies. Students will learn how to construct the leadership formula of influence, grasp the art and science of influence and execution, and employ 360 degree situational leadership. Emphasis will be placed on community- oriented practices such as leadership for building police and community teams.

**CRJ805 - Using Theory to Improve Criminal Justice Practice**
Through this course, students—using relevant theory—will learn to challenge underlying assumptions to changes in the broad field of criminal justice. Examples include broken windows, routine activities, and control theory. Students will learn about means of achieving crime reduction through condition change, and accordingly, will design an assessment of relevant organizational change.

**CRJ810 - Improving the Administration of Juvenile Justice**
A modern examination of juvenile justice issues in America, students will examine the literature surrounding the relationship between the drop in crime and increase in punishment, encounters with police on the street and in schools, solitary confinement, and use of residential placements. Contemporary problems, such as private correctional facilities and the Pennsylvania scandal will be addressed. Finally, students will have the opportunity to study, discuss, and critique National Institute of Justice and the National Academy of Sciences reports on reform.

**CRJ820 - Police Management for the 21st Century**
Students will critically examine the role of the police and the proper oversight of law enforcement policies, procedures, and tactics. Specific issues to be covered include examining the relationship between police efforts and crime rates, predictive policing, pursuits, race and diversity, and use of force. Overall, course design involves developing and integrating public policy for policing in America to specifically include policy related to the investigation of officer-involved shootings, use of force, and complaints of civil rights abuses. Included within these policies are media relations and keeping the public informed of the status of critical incidents.

**CRJ830 - Corrections: Crisis and Management**
This course examines contemporary issues in corrections such as the use and overuse of probation and incarceration, the empirical assessment of risk in sentencing decisions, and the management of jails and prisons. Intertwined with these issues are the causes and consequences of sentencing disparity. Additionally, students will critically examine methods of avoiding federal consent decrees through proper policies, procedures, management, and leadership. Further, students will learn to implement policies relating to the enforcement of federal consent decrees.

**CRJ840 - Advanced Criminal Law, Procedure, and Evidence for Criminal Justice Leaders**
Law is at the very core of the criminal justice system and its problems. Accordingly, this course will cover critical trends in substantive and procedural criminal law, including civil rights, hate crimes, and terrorism provisions at the federal and state levels. U.S. Supreme Court cases, particularly those surrounding search and seizure and the use of force, will be covered as well as other law-related key issues around the country.

**CRJ850 - Contemporary Forensic Science and Technology for Criminal Justice Leaders**
Whether a police administrator, forensic scientist, or training director, there has never before been such rapid and significant development in relevant forensic sciences. This course is specifically designed to bring senior criminal justice personnel up-to-date on topics such as sources and new methods of extracting DNA, advances in firearms identification, and using emerging forensic science techniques to properly investigate officer-involved shootings and solving complex crimes such as cold case homicides and serial rapes.
Course Descriptions

**CRJ860 - Criminal Justice Training: Needs, Problems, Solutions**
Criminal justice training is evolving in complex ways, both from a substantive perspective and by way pedagogy and andragogy. This course provides the necessary tools for criminal justice managers, leaders, and trainers to conduct relevant and critical needs assessments, develop lesson plans, provide training for newly promulgated policies, and overall gain a better understanding of adult learners in the criminal justice profession.

**CRJ870 - Understanding Civil Liability for Criminal Justice Managers**
Of critical importance to municipalities, police departments, correctional institutions, and criminal justice practitioners generally, is the notion of civil liability. In this course students will examine specific conduct such as illegal search and seizure, false arrests, and how all of this applies to criminal justice managers and department heads. The analysis begins with negligent hiring in the first instance, and follows through examining negligent training, negligent supervision, and negligent retention.

**CRJ880 - Adjudication: Achieving Justice More Often**
When all is said and done, the public, victims, and individual defendants demand and deserve justice. The guilty must be treated fairly, but in a way that meets the goals and objectives of criminal justice public policy. And innocent persons should not be convicted of crimes they did not commit. Consequently, this course will involve an in-depth analysis of the notions of under criminalizing versus over criminalizing conduct, managing the consequences of legislative (policy) decisions, defense errors in capital cases, prosecutorial misconduct, the utility of and possible end to grand juries, and the reasons for wrongful convictions.

**CRJ890 - Applied Criminal Justice Research Methods for Criminal Justice Leaders**
Regardless of which element of the criminal justice profession one works, effective managers and leaders need to be able to interpret and apply qualitative and quantitative research methods. Students will learn how to interpret results of published research that can assist in effective policy development, crime control, supervision, and training. In the end, students will be able to apply evidence-based research to day-to-day criminal justice issues and problems.

**CRJ895 - Legal Research Methods for Criminal Justice Practitioners**
This course will focus on legal research methods for criminal justice practitioners. Special emphasis will be placed on evaluating legal research sources, primary and secondary sources, and legal writing. Students will practice research techniques that are designed to ensure timeliness and relevancy to a particular subject within a specific jurisdiction. Finally, students will learn about contemporary and scientific trends surrounding judicial use of empirical academic research.

**CRJ900 - Case Studies in Criminal Justice Management**
In this course the student will focus on the careful evaluation of systematic problems in criminal justice by comparing events at different times and places to understand their nature and response, and how to problem solve more effectively in the future through assessment of causes, reforms, and impacts. Examples of the types of subject matter to be covered include: federal supervision of local police departments, misconduct of corrections officers, violations of civil rights.

**CRJ910 - Sentinel Event Reviews**
This course involves original conclusions and recommendations surrounding incidents that resulted in unjust outcomes due to errors, lack of training, or ineffective policy. Examples include ineffective actions to prevent recurrence of domestic violence, racial profiling, incarceration of non-dangerous offenders, release of dangerous offenders, prosecutorial misconduct, and violations of civil rights. These reviews focus on single events, summarize what occurred using multiple sources, explain why it became an issue of public consequence, and propose an appropriate response. Additionally, students will detail whether the response is likely to be effective, given what is known about responses to prior events of this kind, and underlying issues of causation, law, policy, practice, research, and leadership.
Course Descriptions

CRM-Criminology

CRM600 - Seminar in Forensic Linguistics
Forensic linguistics has been described as the interface between linguistics and the law. This course will attempt to present the student with an awareness of linguistics and its role in forensic science, and how it can be helpful to law enforcement, intelligence, and security professionals in creating a more informed understanding of how forensic linguistics can be applied in legal cases and proceedings. Individuals in this class will participate in interactive discussions and exercises which will grow from the history and development of this emerging field. Discussions will provide a solid foundation for understanding how forensic linguistics can enhance investigations in both criminal and private security settings.

CRM610 - Forensic Sociolinguistics
This course investigates how language shapes and is shaped by society. The course presents a general overview of the field of sociolinguistics, then focuses in depth on three major approaches: quantitative sociolinguistics (variation analysis), discourse analysis (analysis of conversations, narratives, and other connected speech/writing), and pragmatics (analysis of language in context, how people derive meanings from both context and the linguistic signal). The student will become acquainted with the major literature and research methods in the field and will learn how to apply their knowledge to designing and conducting an original sociolinguistic study. The student will also learn about applications of sociolinguistic knowledge beyond academia, including areas such as language policy and planning (including issues related to bi- and multilingualism and language endangerment), language and education (including teaching the standard language to native speakers of nonstandard dialects), and language and the law, especially the analysis of language evidence (e.g. ransom notes, threatening emails and text messages).

CRM620 - Forensic Language Structure I
This course introduces students to the linguistic study of phonetics – language sounds – and phonology – sound systems. There are four main units: Articulatory Phonetics (how speech sounds are produced), Acoustic Phonetics (the physical properties of sound waves and how to measure them), Segmental Phonology (how sounds contrast and alternate within systems), and Suprasegmental Phonology (aspects of sound systems larger than a single segment). An additional unit introduces students to Forensic Linguistic applications of phonetics. Crosslanguage and cross-dialectal variation in language sounds and sound systems and their implications for Forensic Linguistics are discussed throughout the course. In addition to a solid grounding in the fundamentals of phonetics and phonology, students also gain essential skills in phonetic transcription; recording sounds for phonetic analysis; producing, reading and interpreting spectrograms (commonly mislabeled “voiceprints”); and conducting basic phonological analyses. Students complete exercises in the various skill areas as the course progresses, including an exercise in the analysis of speech data and professional presentation of results in connection with a hypothetical forensic investigation.

CRM640 - Forensic Language Structure II
This course provides students with an introduction to the scientific study of morphology and syntax – that is, word and sentence structure. Students will learn the basic components of words, phrases, and sentences, and how these components fit together to create well-formed words and sentences. Both linguistic universals and variables in word and sentence structure formation will be addressed, with a particular focus on variation in morphology and syntax across English dialects (including different standard Engishes). Students will learn the crucial importance of approaching morphology and syntax (i.e. “grammar”) from a scientific perspective that investigates how people really form words and sentences in everyday life rather than simply how people are supposed to use grammar based on conventions particular to certain individuals/institutions, places, genres, and time periods. Students will learn to conduct syntactic analyses by diagramming phrases and sentences, as well as to conduct morphological analyses (i.e. breaking words into their component meaningful parts; e.g., roots, prefixes, affixes) using sets of data from both known and unfamiliar languages. Students will be introduced to different theoretical approaches to syntax and morphology, though the focus of this course is to introduce students to the basic components and processes that all theories of syntax and morphology must account for. Finally, students will investigate applications of the scientific study of morphology and syntax to Forensic Linguistics. Students complete basic exercises in syntactic analysis (phrase and sentence diagramming) and morphological analysis, as well as a final exercise in morphological-syntactic analysis, and professional presentation of results, in connection with a hypothetical forensic investigation.
Course Descriptions

CRM650 - Author Profiling and Threat Assessment
The first half of the course will cover author profiling, i.e., the analytical determination of the demographic features of an anonymous author by the linguistic features recovered within the communication(s). The sociolinguistic concepts used to develop an author profile include language variation by region, age, gender, race, ethnicity, nativeness, etc. Ancillary issues relating to motivation, truthfulness, actual victimization status and commitment can also be determined through careful author profiling assessment. This course will help students construct potential author profiles of potential evidentiary and investigative value based on the science of linguistics and assist them in presenting profiles in report style. The second half of this course will cover threat assessment from a forensic linguistic perspective. It will be demonstrated that threat assessment can be effectively undertaken to recognize and assess the level of language usage within a communication as it relates to potentially injurious actions to an individual or organization. In particular, topics such as written/verbal versus non-written/non-verbal threats and conditional threats/extortions will be explored. Issues to be examined include the separate categories of threats, the seven primary factors to consider when undertaking a threat assessment, issues relating to escalation, and mental health considerations in anonymous writings. Illustrations will be provided through class exercises and case examples.

CRM670 - Authorial Attribution and Speaker Identification
Every individual has his or her own unique way of communicating. This is known as a person’s idiolect – that is, the distinctive features found within an individual speaker's and/or writer’s language system. These features can assist in identifying the author of one or more anonymous questioned communications when compared with known communications of other suspected authors. This course will examine the basic concepts, methodologies, and practices in which authorial attribution and speaker identification is used to help identify the author of one or more specific anonymous communications. Multiple real-case examples will be utilized in this course to prepare the student for these applications.

CRM690 - Legal and Ethical Issues in Forensic Linguistics
This course will be divided into two primary sections, legal issues and ethical issues. First, the matter of legal issues will be discussed and how they relate to forensic linguistic analysis and the eventual formal presentation of the results of any such analysis. These concepts are of critical importance for any linguist practicing directly or indirectly in the criminal justice system. Recent and relevant U.S. court decisions will be discussed, including how they apply to an analysis, the design of a written report, and the manner in which testimony from that analysis/report may be delivered in a courtroom. Second, ethical issues, as related to forensic linguistic analysis, will be discussed in this course. Topics relating to analytical objectivity, identifying known strengths and weaknesses (and knowing when to admit them), advocacy pitfalls, and investigative and testimonial genuineness will be covered. Multiple real-case examples will be utilized in this course to prepare the student for the understanding of both of these critical concepts.

CRM700 - Advanced Criminological Theories
This course will examine the major theories of crime relevant to criminal behavior, crime analysis, research and criminal justice system policies. Original works of selected theories will be introduced and explained with examples of how theory, research and policy are applied to crime-related issues. Theoretical works such as classical, biological, psychological, social, political, and feminist criminology will be explained in this course.

CRM710 - Advanced Behavioral Crime Analysis Theory
This course provides the theoretical foundation for the behavioral analysis of violent crime associated with applied criminology. Specific course content will examine theoretical underpinnings of criminal behavior, rapist typology and victimology. A particular emphasis will be on the psychopathology of crime, violent offenders, paraphilias, pedophiles and crime victims. Accordingly, the course provides students with the behavioral and psychological theories that are needed in the practical courses in applied criminology, such as Criminal Investigative Analysis; Equivocal Death Analysis; and Geographical Crime Analysis.

CRM720 - Research Methods in Criminology
This course explores the design and analysis of experimental and quasi-experimental research in criminology. It explores both quantitative and qualitative techniques as they relate to criminological research. In addition to being
able to design and undertake basic research in the field of criminology, an outcome of this course is to develop
effective consumers of the research literature.

CRM820 - Ethics and Legal Aspects in Applied Criminology
This course is an in-depth examination of the ethical considerations that confront investigators, forensic scientists,
 supervisors, and others involved in applied criminology. Both theoretical and applied applications will be
presented with emphasis on the practical courses in the Applied Criminology Track in Social Science. A particular
focus will be on ethical issues relating to analysis of various data sets and evidence, preparation of expert
reports, discovery and disclosure, exculpatory evidence, and testifying as a lay witness and as an expert witness.
Relevant case studies will be reviewed.

CRM830 - Criminal Investigative Analysis
This course builds upon the theoretical framework provided in Advanced Criminological Theories and Advanced
Behavioral Crime Analysis Theory. It provides the applied components of criminal investigative analysis from
operational aspects such as the formation of the investigative team, predicting criminal behavior, locating
offenders, and methodically collecting, analyzing and synthesizing relevant evidence. Moreover, the student will
learn other practical applications such as interview techniques for suspects, crime victims and how to minimize
occurrences of false confessions.

CRM840 - Equivocal Death Analysis
This course is designed to provide the theoretical and practical applications in determining whether a death
was the result of an accident, suicide, homicide or natural occurrence. The student will be introduced to specific
techniques, which are used to disambiguate the manner of death including behavioral and psychological histories
of the decedent. Other techniques covered in the course include the analysis of autoerotic fatalities and staged
crime scenes.

CRM850 - Geographical Crime Analysis
This course is designed to provide the student of applied criminology with the basic understanding of the
theoretical and practical applications of Geographic Crime Analysis. Topics covered will include target and
predator patterns; predicting crime; locating offenders; and investigative strategies for solving crimes. Students
will also be introduced to the scientific and technological aspects of this field and will be expected to critically
evaluate the various processes and procedures with the view towards continuous improvement in the field.

CRM855 - Applied Research in Criminology
This course will focus on the application of selected principles of criminological theory and research methods
toward understanding and resolving specific problems in the field of applied criminology. It is designed to help
students to build upon previous courses in crime theories and research methods. Students will be required to
develop and complete a research proposal related to a criminological topic of their choice. (3 crs.)

CRM870 - Special Topics in Criminology
This course is a focused examination of an emerging and dynamic problem or issue in the study of criminology.
The course will provide the student with the opportunity to apply the knowledge and skills learned in the program
to subject matter that will vary each semester. Prerequisite: Must be admitted to the applied criminology program
or permission of instructor. (3 crs.)

CRM880 - Criminology Thesis
The thesis consists of a written report of extensive research into a specific area of investigation in applied
criminology. Students will demonstrate a mastery of knowledge of the background of the topic, the published
literature of the subject, and high standards of original research and presentation.

CRM885 - Criminology Internship
Graduate students in the Applied Criminology program are placed with a law enforcement agency, forensic
science organization, or other entity—public or private—that most nearly approximates employment goals. The
intent of the internship is to provide students with practical work experience in an environment in which they will
be addressing real problems that require solutions in a relatively short time frame.
Course Descriptions

CRM890 - Criminology Studies Abroad
This course is intended to provide students of applied criminology with a number of opportunities to study or work in academic or professional settings abroad. Examples include field-based studies with other students and a supervising professor; studying relevant aspects of applied criminology at foreign institutions of higher education where credit is not being awarded by the foreign institution; or pursuing an approved cultural and educational program abroad. Accordingly, students will be able to apply their skills in applied criminology in real-world environments, and at the same time, broaden their intellectual and personal understandings of cultures operating outside of the United States.

CRS-Conflict Resolution
CRS700 - Conflict Resolution Theory and Practice
This course is designed to provide a strong foundation in conflict studies for the scholar or practitioner. It explores various theoretical perspectives that inform appropriate processes to mediate or resolve emerging and existing conflicts. As such, the student will explore origins and conditions of conflict development, the levels of expression, and its intersectional exposure in a variety of disciplines. A context appropriate role of the mediator will be explored along with appropriate interventions. This course sequences from theoretical investigation to utilization of recognized professional approaches to dispute resolution in its various forms.

CRS700 - Conflict Resolution Theory and Practice
This course is designed to provide a strong foundation in conflict studies for the scholar or practitioner. It explores various theoretical perspectives that inform appropriate processes to mediate or resolve emerging and existing conflicts. As such, the student will explore origins and conditions of conflict development, the levels of expression, and its intersectional exposure in a variety of disciplines. A context appropriate role of the mediator will be explored along with appropriate interventions. This course sequences from theoretical investigation to utilization of recognized professional approaches to dispute resolution in its various forms.

CRS700 - Conflict Resolution Theory and Practice
This course is designed to provide a strong foundation in conflict studies for the scholar or practitioner. It explores various theoretical perspectives that inform appropriate processes to mediate or resolve emerging and existing conflicts. As such, the student will explore origins and conditions of conflict development, the levels of expression, and its intersectional exposure in a variety of disciplines. A context appropriate role of the mediator will be explored along with appropriate interventions. This course sequences from theoretical investigation to utilization of recognized professional approaches to dispute resolution in its various forms.

CRS710 - Special Topics In Conflict Resolution
This course is designed to assist the student of conflict studies to examine a specific intractable conflict facing our communities, nation, or the world today. Students and faculty will investigate specific areas of conflict that are not covered in other conflict resolution courses. Included in this investigation are the etiology, contributing factors, and more importantly, the stakeholders’ inability to productively resolve this conflict. Specifically, students will assess the differences between usual conflict and those that are deemed intractable.

CRS735 - De-escalation and Community Conflict Management
The nature of de-escalation is to reduce the intensity of conflict. This course is designed with a primary focus on interventions aimed to isolate and diminish interpersonal and community conflict that may escalate to violence. Students will be exposed to a variety of interactive competencies that are designed to map potential areas of violence, mitigate aggression and build community consensus. Particular focus will be given to facilitative and negotiation techniques. Students will participate in interactive simulations and conclude this course experience with creating and proposing their own intervention model.

CRS740 - Legal Aspects of Conflict Resolution
This course is designed to compare and contrast legal approaches to conflict resolution. Specifically, the student will examine and differentiate between litigation and other alternative processes to dispute resolution. The role of the professional neutral in reaching settlements will be explored as well as the rationale for non-litigated settlements. Students will focus on and interpret different stages of mediation that interface with the legal system. As part of this process, students will also be exposed to issues of concern for attorney and non-attorney
mediators in areas such as discovery, drafting agreements, conflicts of interests, confidentiality, and other ethical dilemmas.

**CRS750 - Dialogue, Negotiation, and Persuasion in Conflict Resolution Practice**
The primary emphasis of this course is to recognize the role of facilitative dialogue in the resolution of conflict. Specifically, the student will explore elements of negotiation, and persuasion in mitigating various types of disputes. Concepts that are investigated include but are not limited to theories of persuasion, influence, narrative paradigm, verbal and non-verbal communication, active listening, rephrasing, and intra and inter group dynamics. Students will practice simulated mediations to reinforce facilitation and evaluation of negotiation techniques.

**CRS765 - Family Mediation Theory and Practice**
This student in this course will explore a variety of conflicts that arise in the context of the family. There is an emphasis on the mediation process as it relates to separation, divorce, and custody. Students will develop expertise in the areas of implementing parenting plans, visitation schedules, child focused parenting, and reunification through the mediated process. Special consideration is given to consensus building that is focused on addressing the best interests of the children.

**CRS770 - International and Intercultural Conflict Resolution**
This course will study all aspects of conflict that occur within the contemporary international system. The course will begin with the nature and form of conflict from war to economic actions to ethnic conflicts and civil wars that impact the international system. Following this, the student will consider various means for preventing conflict and bringing about resolution and reconciliation, from traditional diplomacy to international organizations to cooperative economic frameworks. Finally, detailed study will be given - through the use of a number of case studies – to the actual process of diplomatic mediation and the negotiation process.

**CRS780 - Principles in Mediation Practice**
This course will provide the student of conflict resolution studies with an understanding of the ethical considerations in conflict resolution and mediation practice. Theoretical underpinnings such neutrality, fairness, and disclosure are examined as they relate to dispute resolution and conduct of the mediation professional. In addition, cross-cultural ethical theories are investigated through case study examples.

**CRS800 - Research Methods in Conflict Resolution Studies**
This course examines the theories and assumptions supporting the practice of mediation and other areas of conflict resolution. Specifically, major schools of thought that inform practice and policy are investigated. Students appraise critical theory, research design, and empirical evidence in evaluating published studies to gain proficiency in professional practice.

**CRS810 - Conflict Resolution Graduate Internship**
Student interns are placed with an organization, which most nearly approximates employment goals. The intent of the internship is to provide students with practical work experience in an environment in which they will be utilizing skills that are also relevant to professional mediation practice. Advisor and Department Chairperson approval is required before course enrollment.

**CRS819 - Conflict Resolution Applied Research Project**
This course is designed to assist the student of conflict studies to address issues of importance that are related to their current or future careers. A creative project will be developed from a variety of student interests that is intended to facilitate application to professional development and practice. Advance of this project will utilize peer reviewed research, analysis, and synthesis to an intervention (proposal). Students are expected to apply suitable analytic methods to their proposal design. The format for the proposal will be proposed by the student and approved by the instructor. This project must demonstrate originality and will meet the requirements of the American Psychological Association (APA) Publication Manual.
Course Descriptions

DHS-Doctor of Health Science
DHS804 - Evidence-Based Practice Theory
This course is designed to provide the student with a systematic method to critically appraise and integrate the results of current scientific literature. Students will participate in discussions and practical writing exercises to articulate clinical questions to be answered through sources of scientific evidence. Students will be exposed to strategies for searching relevant data bases and appraising and evaluating specific sources of evidence.

DHS805 - Health Promotion and Wellness for the Individual
In this course students will be provided with an advanced framework for individual health promotion. Elements of the health and wellness lifestyle will be examined in detail, and students will be provided opportunities to lead and to employ leadership styles into wellness and health promotion for the individual. Students will search the evidence to uncover the most current literature to support individual health promotion, including leadership trends to encourage health and wellness lifestyles.

DHS806 - Community and Corporate Wellness
Students will develop and design community and corporate wellness plans based upon the most current research and evidence. Additionally, the role of effective leadership styles and trends will be studied. Effective leadership in the promotion of healthy lifestyles will be vital in the improvement of health and wellness leading into the future. Great emphasis will be devoted to examining and understanding health and wellness disparities across socioeconomic and cultural lines. Model corporate programs will be examined and dissected to determine overall efficacy in application and leadership.

DHS825 - Research Methods in Exercise Science I
This course will explore general research principles and scientific method. Ethics in research will be fully investigated including training aligned with federal regulations on ethical research practices and protection of human research participants. The process of question formulation, writing the literature review, research design and methodology of the research report will be examined. The student will focus on a research question and begin critically appraising current research for use in writing a literature review.

DHS826 - Research Methods in Exercise Science II
Data collection tools and statistical analysis will be explored as well and validity, reliability, and sampling. The student will begin framing the extended article manuscript that will become the dissertation for the program. The student will construct their dissertation committee, and present an applied research project proposal prior to completing the course.

DHS830 - Leadership in Wellness Education and Professional Practice
Leadership skills, attributes, theories and styles will be examined and applied across a wide-range of practice settings. Students will utilize their current place of employment, where appropriate, to examine the leadership style and tenets. Students will explore the most current as well as foundational literature to synthesize best practices in effective leadership to include, but not limited to topics such as foundations of leadership, emotional intelligence, conflict resolution and consensus building, intercultural competence, project/group facilitation, and motivation and accountability within the constructs of an academic environment.

DHS835 - Values, Ethics and the Promotion of Health and Wellness
The application of personal values and theoretical ethics will be applied to the health promotion and wellness milieu. Ethical decision making and ethical dilemmas encountered by organizations will be examined. The process of being interested in one’s self, moving to thinking about self and others, and finally being concerned with self, others, and society is a leader’s ethical responsibility. Current evidence will be utilized as a basis for arguments and case studies scrutinized to assist students in making sound, ethically grounded decisions driven by contemporary leadership styles and trends.

DHS845 - Advanced Instructional Technology in Evidence-Based Practice
Students will be presented with the latest technologies and adult learning strategies for utilization within educational and private organizational settings. Special attention will be given to research-supported technologies and their application in multiple learning environments, with a focus on Evidence-Based Practice principles.
Course Descriptions

Students will explore the use of a variety of innovative technologies to enhance teaching, enrich learning, and improve assessment.

DHS850 - Theories and Foundation of Adult Learning
Students will be provided with an evidence-based foundation of current theories associated with adult learning including the differences between adults and children as learners. This will include exploration of adult learning theory, research based principles of learning, learning styles, and other contemporary educational theories that effect and influence learning in the adult.

DHS851 - Learning Concepts for the Adult Learner
Students will explore advances in in adult learning, as well as best-practices and concepts for successful outcomes for the adult learner. A detailed exploration will occur into such topics as teaching strategies, overcoming teaching challenges, adult learning principles and practices. The emergence of technology used as campus-wide technologies, as well as internet and social media as a conduit for learning.

DHS852 - Curriculum and Course Design
This course will build upon the current evidence of effective adult learning, curriculum design and curricular evaluation in conjunction with course design, course development, and evaluation will be the foci of this course. Topics such as curricular instructional planning and design, course organization, instructional delivery, lesson planning, assessment tool creation will be included.

DHS899 - Evidence-Based Project Seminar
All aspects of the research project process will be addressed by conducting the steps necessary for a complete dissertation proposal. The process will include committee formation, presentation and approval of the research prospectus, development and defense of the dissertation proposal with IRB approval readiness.

DHS900 - Evidence-Based Capstone I
This is the culminating activity for the completion of the degree program. The student will complete all activities to complete the dissertation including data collection, data analysis, defense, and presentation. Students will develop a poster suitable for presentation at professional conferences. Students are required to travel to campus to defend the dissertation and present the poster.

DHS901 - Dissertation
This is the culminating activity for the completion of the degree program. The student will complete all activities to complete the dissertation including data collection, data analysis, defense, and presentation. Students will develop a poster suitable for presentation at professional conferences. Students are required to travel to campus to defend the dissertation and present the poster.

DHS915 - Evidence-Based Doctoral Portfolio I
This is the first course of three evidence-based doctoral portfolio courses culminating in the completed e-portfolio. The doctoral portfolio constructed by the candidate will reflect and actively influence learning, as well as demonstrate a high level of understanding, growth, proficiency, long-term achievement, and highlight significant accomplishments. The portfolio will focus on a common real-world workplace research problem that was selected by the candidate earlier in year one of the DHSc curricula. The research problem will remain as a common thread throughout the three portfolio courses. The portfolio conception over the three courses will create a community of practice in the workplace, the university, and/or the profession of health science, exercise science, wellness and/or fitness.

DHS925 - Evidence-Based Doctoral Portfolio II
In the second of the three evidence-based doctoral portfolio courses, the doctoral candidate will carry out activities to continue the process of a coherent, structured doctoral portfolio development, including additional artifact collection with regard to personal reflection, self-awareness, scholarship/research, teaching, and leadership. The underlying focus of the second portfolio course will be a synthesis of the first portfolio course contents, experiences, and artifacts to further mature the professional development in the community of
practice the candidate selects based on future plans and aspirations in a university, workplace, or professional communities.

**DHS950 - Evidence-Based Doctoral Portfolio III**
This is the third and culminating course for the completion of the degree program and the professional doctoral portfolio process. The underlying focus of the third portfolio course will be the continuation of the portfolio development by aligning life-long learning and continued professional development. The doctoral candidate will evaluate the portfolio course contents, experiences, and artifacts in total. The doctoral candidate will defend their professional doctoral portfolio in front of the collected advisory panel members as well as members of the university community. The candidate will develop a poster suitable for presentation at professional conferences. Students are required to travel to campus to defend the professional doctoral portfolio and present the poster to the university community at large. The candidate will be encouraged to disseminate key aspects of the portfolio into the scientific literature of health science, exercise science, wellness and/or fitness, as well as present the works to various communities, including but not limited to universities, workplace, and professional organizations.

**DPT-Doctor of Physical Therapy**

**DPT600 - Gross Human Anatomy with Lab**
A cadaver-based advanced study of gross human anatomic structure with emphasis on muscular, skeletal, neural, and vascular structures and systems of the head, neck, trunk, and upper and lower extremities.

**DPT610 - Human Physiology**
This course explores in depth physiology of the human cellular, integumentary, neuromuscular, cardiovascular, and pulmonary systems.

**DPT620 - Foundations of Physical Therapy**
This course will cover the application of the APTA's Guide to Physical Therapy Practice, the role of the Physical Therapist in the American Health care model, physiologic and anthropomorphic measurements, transfer techniques, infection control, elements of documentation, Pennsylvania Physical Therapy Practice Act, assistive devices and their use and application. Further, this course entails the study of mechanisms of pain management and mediation, and the theory and practice of therapeutic modalities including, but not limited to, superficial heat, cold electrotherapy, compression traction and massage. The student will be able to explain the theory behind the use of electromagnetic and acoustic modalities and demonstrate the proper application of therapeutic modalities.

**DPT630 - Movement Science with Lab**
This introductory course entails the study of biomechanics, analysis of normal and abnormal patterns of human movement, diagnostic and therapeutic procedures. Mechanical properties of biological tissue, kinematics, kinetics, muscle actions, and joint structure and function are examined.

**DPT640 - Neuroscience with Lab**
This course examines the gross anatomy and function of the brain, spinal cord, and peripheral nervous systems including autonomic, somatic, sympathetic, and para-sympathetic. Students will learn the fundamentals of neuroanatomy and of neurophysiology.

**DPT650 - Pathology and Diagnostic Imaging**
This course addresses advanced diagnostic testing and imaging of the major systems of the body regions related to physical therapy practice. Review of imaging includes diagnostic ultrasound, magnetic resonance imaging, computed tomography, nuclear medicine, radiographs, and the interpretation of medical diagnostic tests. Diseases and disorders of major body systems with focus on pathogenesis and interventions related to the practice of physical therapy are included.

**DPT660 - Exercise Physiology**
This course will examine the effects of exercise on the physiology of the human body systems including the musculoskeletal, nervous, cardiovascular, pulmonary, and endocrine systems in both healthy and special populations. Additionally, students will learn how to conduct common fitness and performance tests, interpret the findings and prescribe exercise for health and fitness based upon the findings.
Course Descriptions

DPT670 - Orthopedics with Lab
This course is an in-depth study of the musculoskeletal system including normal and abnormal movement patterns. Special diagnostic tests, physical therapy assessment, evaluative procedures and interventions of orthopedic impairments will be covered.

DPT675 - Principles of Evidence-Based Practice
This course includes study of critical appraisal, analysis of literature, clinical reasoning, and decision making in accordance with the patient management model as presented in the APTA's Guide to Physical Therapy Practice and International Classification of Function.

DPT680 - Communication and Ethics in Rehabilitation
This course explores 1) the legal and ethical issues present in the American Health Care Model. The APTA's Code of Ethics and the Pennsylvania State Practice Act will be utilized as guides, and 2) an examination of factors supporting successful learning in the health care system including cultural competence and educational theories and methodologies.

DPT690 - Clinical Experience I
This initial full-time, 6 week clinical education experience will afford the student the opportunity to develop competency in basic physical therapy skills including patient interviewing, patient-therapist interactions, multi-disciplinary interaction, planning, design, and implementation of treatment and documentation skills.

DPT700 - Neurologic and Neuromuscular Physical Therapy with Lab
This course offers an in-depth study of selected neurologic and neuromuscular disorders and appropriate rehabilitative interventions, including preventive care.

DPT705 - Pharmacology
This course is a study of the use of pharmacological agents for the treatment and prevention of illness. Emphasis will be placed on the effects of drugs on the practice of physical therapy including adverse interactions, therapeutic effects, and the administration of drugs by physical therapists.

DPT710 - Cardiovascular and Pulmonary Physical Therapy with Lab
This course offers an in-depth study of the examination and treatment of patients with cardiac, vascular, and/or pulmonary dysfunction including preventive care and rehabilitation.

DPT715 - Differential Diagnosis
This course is designed to assist the physical therapy student to develop into a direct access practitioner able to consider and identify the broad spectrum of conditions and pathologies represented by a musculoskeletal or neurological complaint. Additionally, patterns of referral to the appropriate healthcare providers will be discussed and the role of the physical therapist as 'collaborator' in the healthcare team emphasized.

DPT720 - Research I
This course will offer the physical therapy student the opportunity to gain knowledge of and skills necessary to critically evaluate medical literature and develop a research question applicable to the practice of physical therapy and review of literature. Emphasis will be placed on critical appraisal and the fundamentals of evidence based practice.

DPT725 - Professional Course Remediation
This course allows for the individualized remediation for content that may have been incompletely mastered during prior DPT courses.

DPT730 - Pediatric Physical Therapy
Students learn through lecture, discussion, and guided practice, the major components of development from birth through early adulthood. Theories that support our understanding of development and guide clinical decisions are explored. Emphasis is placed on examination, evaluation and treatment of children with neuromuscular diagnoses
and neurodevelopmental delays and disabilities. Also considered are pediatric public laws, child abuse, and therapeutic interactions with families.

DPT735 - Geriatric Physical Therapy
This course involves the physical therapy examination, evaluation, and management of the older adult patient. Normal age-related changes as well as pathological age-associated changes, in addition to end of life care as related to the practice of physical therapy will be studied.

DPT740 - Medically Complex Patients and Special Populations
In this course the DPT student will consider the clinical ramifications of multi-system pathology on physical function and rehabilitation. Chronic conditions including metabolic, endocrine, vascular, auto-immune, traumatic, infectious, and malignant disorders will be explored. The use of complex case studies will be used to gain insight into patients with compromise of multiple body systems.

DPT745 - Motor Control and Therapeutic Exercise with Lab
This course addresses both the concepts and theories of motor control and motor learning and therapeutic exercise. Advanced movement analysis with a particular focus on foundational movement seen in activities of daily living, gait, and other functional mobility. Restorative and therapeutic exercise prescription based on disorders or disruptions of movement will be developed.

DPT750 - Psychology of Patient Care
This course explores the psychology of illness and disability and its impact on rehabilitation. The motivations, goals, obstacles, and agendas of patients and the role of the physical therapist caring for individuals with acute, chronic, and terminal illnesses will be explored.

DPT760 - Clinical Experience II
This second full-time, clinical education experience is 12 weeks in length will afford the student the opportunity to build on skills and opportunities for improvement identified in DPT 690. Further development and expansion of competency in basic physical therapy clinical skills including patient interviewing, patient therapist interactions, multi-disciplinary interaction, planning, design, and implementation of treatment and documentation skills is expected.

DPT765 - Promotion of Health and Well-Being
This course offers an overview of public, community, and personal health and wellness issues, treatment options, and prevention strategies as related to the practice of physical therapy. Students will participate in community engagement to promote wellness.

DPT770 - Special Topics in Health Care
This course is an in-depth study of the American Health Care system. Issues concerning the profession of physical therapy will be emphasized. Guest speakers representing other health care professions and disciplines will be utilized.

DPT800 - Orthotics and Prosthetics in Rehabilitation
This course involves the study and analysis of upper and lower extremity and trunk orthotic and prosthetic devices and components. The biomechanical concepts of the function of such devices, fitting and examination of the function and use of the devices, as well as related patient education topics and the role of the physical therapist in orthotic and prosthetic management are included. physical therapy examination, evaluation, and management of the older adult patient.

DPT810 - Research II
This course is a continuation of DPT 720. In this course students will design and complete a research study based upon the review of literature and development of a research question completed in DPT 720. Students will be expected to execute a research project and defend their findings in a public forum. Publication of findings will be encouraged.
Course Descriptions

DPT820 - Leadership and Administration
This course examines principles of leadership and management, including topics such as reimbursement, human resource management, electronic medical record management, risk management, and quality improvement will be covered.

DPT830 - Clinical Experience III
This third full-time, clinical education experience is 12 weeks in length will afford the student the opportunity to continue to refine and develop intermediate to entry-level clinical skills of managing patients with musculoskeletal, neuromuscular, integumentary, cardiopulmonary or other system dysfunction. The opportunity to build on skills and opportunities for improvement identified in DPT 760 is afforded. Further development and expansion of competency in physical therapy clinical skills including patient interviewing, patient-therapist interactions, multidisciplinary interaction, planning, design, implementation of treatment and documentation skills is expected. Intermediate administrative skills are expected to be demonstrated as well.

DPT840 - Clinical Experience IV
This final full-time, clinical education experience is completed at the conclusion of didactic and laboratory coursework. The 18 weeks of clinical experience in one or more settings offers the student the opportunity to develop entry-level competency in managing patients with simple to complex diagnoses. The student is expected to experience the full range of physical therapy practice during this final clinical learning experience.

DPT850 - Physical Therapy Cumulative Seminar
This is a reflective course calling on the sum of the student's didactic and clinical experiences. Includes licensure preparation coursework and a mock licensure examination to confirm comprehension of and ability to synthesize curricular content to practical application.

EAL-Educ Admin & Leadership
EAL701 - Leadership 1
This course examines various issues in educational leadership. Students will explore topics in leadership related but not limited to leadership roles and responsibilities, change management, technology, student populations, and staff development. A focus on fiscal responsibility and its role in various leadership areas will be emphasized.

EAL702 - Leadership 2
This course introduces doctoral students to current research, models and theories on leadership. Students will examine their own leadership beliefs and how this connects with leadership in the educational setting. Students will personally reflect and identify individual leadership strengths and limitations.

EAL703 - Qualitative Research in Educational Leadership
This course focuses on qualitative research for doctoral students. It will examine important theories and practices in planning and designing qualitative research in educational environments. Students will develop the skills, techniques, and knowledge necessary to undertake independent research using appropriate methodologies, key research strategies, and principles for research design in qualitative research.

EAL704 - Quantitative Research in Educational Leadership
This course focuses on quantitative research for doctoral students. It will examine important theories and practices in planning and designing quantitative research in educational environments. Students will develop the skills, techniques, and knowledge necessary to critically understand, critique, and apply quantitative research methodologies to educational environments.

EAL705 - Introduction to the Capstone Research
The Education Administration Leadership Capstone is a series of four courses whereby students demonstrate mastery of required competencies through the completion of a final culminating independent applied research project. The Education Administration Leadership Capstone: Introduction to Capstone Research, the first course in the series, is designed to introduce, guide and support candidates as they learn about the doctoral research expectations and processes that will inform their work as education researchers.
Course Descriptions

EAL706 - Capstone 1 – Research Question/Review of Literature
The Education Administration Leadership Capstone is a series of four courses whereby students demonstrate mastery of required competencies through the completion of a final culminating independent applied research project with a focus on fiscal responsibility. The Education Administration Leadership Capstone I: Research Question/ Review of the Literature, the second course in the series, will engage candidates in the identification of a research topic, the development of the research question(s) and conduct a review of the relevant professional literature that will be utilized to inform their work as education researchers.

EAL707 - Capstone 2: Methods/Data Collection
The Education Administration Leadership Capstone is a series of four courses whereby students demonstrate mastery of required competencies through the completion of a final culminating independent applied research project with a focus on fiscal responsibility. The Education Administration Leadership Capstone I: Research Question/ Review of the Literature, the second course in the series, will engage candidates in the identification of a research topic, the development of the research question(s) and conduct a review of the relevant professional literature that will be utilized to inform their work as education researchers.

EAL708 - Capstone 3: Data Analysis/Results/Recommendations
The Education Administration Leadership Capstone is a series of four courses whereby students demonstrate mastery of required competencies through the completion of a final culminating independent applied research project with a focus on fiscal responsibility. The Education Administration Leadership Capstone 3: Data Analysis/ Results/Recommendations, the fourth course in the series, will guide and support candidates in their data analysis methodologies, formulation of findings/conclusions and identification of implications/recommendations as an education researcher.

EAS-Earth Science
EAS511 - DataStreme Atmospheric Studies
A collaborative learning course in conjunction with the American Meteorological Society (AMS) designed to focus on principles of meteorology from analysis of digitally delivered near real-time environmental data and learning activities. The course utilizes the display and analysis of atmospheric data with applications designed to be modified for use in other instructional formats. The analysis of weather maps is an integral part of the investigations component of the course. Students are expected to visualize, interpret, and interrogate various weather phenomena as they relate to the current state of the atmosphere. Basic prediction of future weather conditions is one of the culminating experiences of the course, after extensive online investigations. The course relies on data and support of the American Meteorological Society.

EAS512 - DataStreme Ocean Studies
A collaborative learning course in conjunction with the American Meteorological Society (AMS) designed to focus on principles of oceanic analysis of digitally delivered near real-time environmental data and learning activities. The course utilizes the display and analysis of oceanic data with applications designed to be modified for use in other instructional formats. Specifically, it is designed to be a study of the four main branches of oceanography: 1) geology of the oceanic basins (origins of the oceans, structure and geomorphology of the ocean's floor, methods of investigation); 2) chemistry of the ocean waters; 3) physics of the oceans (currents, waves, tides, etc.); 4) biology of the oceans (marine plants and animals). The course relies on data and support of the American Meteorological Society.

EAS513 - DataStreme Climate Studies
A collaborative learning course in conjunction with the American Meteorological Society (AMS) designed to focus on principles of climate analysis of digitally delivered near real-time environmental data and learning activities. The course utilizes the display and analysis of climatic data with applications designed to be modified for use in other instructional formats. In this course the elements and controls of climate are analyzed in a systematic fashion. The physical parameters controlling climate are reviewed, as they relate to physics and chemistry. Climate science is concerned not only with the most frequently occurring types, the average weather, but the infrequent and unusual types as well. Climates of the past and potential future states of climate will be discussed and the impacts thereof. The student will be able to make an informed decision in the framework of a Citizen Scientist given the nature of a changing climate through data analysis utilized in this course. Near the conclusion
of the course, human energy needs, policy implications and political ramifications are discussed based upon our best understanding of the impacts of the quickly changing climate. The course relies on data and support of the American Meteorological Society.

EAS514 - Selected Topics in Atmospheric Studies
A collaborative learning course in conjunction with the American Meteorological Society (AMS) designed to focus on principles of atmospheric science analysis of observed environmental data and learning activities. Students learn about research initiatives from a variety of scholars and professionals employed in various sectors of the weather enterprise. The course employs a seminar format to facilitate interdisciplinary and cross institutional networking opportunities and leverages the existing institutional connections between Cal U, AMS and the National Oceanic and Atmospheric Administration (NOAA). These connections allow professionals to engage students in the seminar format where engagement is maximized. Professional focus is from the nationals centers (e.g., Weather Prediction Center, Storm Prediction Center, National Center for Environmental Prediction, Local National Weather Forecast Office, Space Weather Prediction Center, & National Weather Service Training Center). Learning modules are presented and students are tasked with engaging each other as they navigate course materials. Near the conclusion of the course, students are required to synthesize course materials and learning modules in a deliverable format for peers or other students at various learning capacities. Students then conduct their own peer-to-peer collaborations utilizing the learning tools presented in the course. The course relies on data and support of the American Meteorological Society.

EAS515 - Selected Topics in Ocean Science Studies
A collaborative learning course in conjunction with the American Meteorological Society (AMS) designed to focus on principles of atmospheric science analysis of observed environmental data and learning activities. Students learn about research initiatives from a variety of scholars and professionals employed in various sectors of the weather enterprise. The course employs a seminar format to facilitate interdisciplinary and cross institutional networking opportunities and leverages the existing institutional connections between Cal U, AMS and the National Oceanic and Atmospheric Administration (NOAA). These connections allow professionals to engage students in the seminar format where engagement is maximized. Professional focus is from the nationals centers (e.g., Weather Prediction Center, Storm Prediction Center, National Center for Environmental Prediction, Local National Weather Forecast Office, Space Weather Prediction Center, & National Weather Service Training Center). Learning modules are presented and students are tasked with engaging each other as they navigate course materials. Near the conclusion of the course, students are required to synthesize course materials and learning modules in a deliverable format for peers or other students at various learning capacities. Students then conduct their own peer-to-peer collaborations utilizing the learning tools presented in the course. The course relies on data and support of the American Meteorological Society, NOAA, United States Naval Academy, Naval Meteorology and Oceanography Command, and by the Office of Naval Research.

EAS710 - Water in the Earth System
A collaborative learning course utilizing curricular materials from the American Meteorological Society (AMS) designed to focus on principles of water analysis of digitally delivered near real-time environmental data and learning activities. Water in the Earth System (WES) is modeled after the DataStreme Project, a highly successful program that trains teachers in the use of real-time geoscience data in the precollege classroom. The primary focus of WES is to investigate the flow of water and energy in the global water cycle from an Earth system science perspective. Through a unique paradigm, WES integrates and applies fundamental concepts of meteorology, oceanography, and hydrology in examining mass and energy transfer in the hydrologic cycle. A central theme of WES is society’s response to and impact on the global water cycle. As with other Cal U-AMS DataStreme courses, WES instruction is delivered online, providing students with highly motivational experiences in a robust online platform as they access and interpret nearreal time environmental data. The course relies on data and support of the American Meteorological Society.

EAS720 - Sustainability in a Changing Climate
The principle focus of the course elaborates on how the Earth system functions interacts amongst its subdomains, but also addresses how humans interact within these sub-systems and how those sub-systems impact humans. The course integrates the approach of Sustainability and explores how today’s human societies can devise adaption and mitigation strategies in a rapidly changing climate. The concept of climate resilience is stressed
Course Descriptions

with the challenges of ecosystem degradation and resource limitations. Sustainability is a multi-disciplinary field, requiring a broad understanding of Earth systems as well as human motivations. Sustainable practices and theories are introduced and are inclusive of but not limited to population dynamics, ecosystem science, global change, energy, water, environmental economics and policy, ethics, and cultural history. A rapidly changing climate necessitates the importance of identifying suitable Sustainable practices and their implications in both the natural and social sciences as well as the technical challenges and limitations available at present. The student should have been exposed to a background in the Earth sciences and/or other core science concepts (e.g., Biological Sciences, Physics/Chemistry). The course will present realworld examples and/or case studies allowing the students to be exposed to contemporary challenges in environmental management.

EAS730 - Environmental Hazards in a Changing Climate
This course focuses on weather- and climate-related natural hazards from physical science perspective but also explores their socioeconomic impact on human societies. The concept of climate resilience is elucidated by examples of climate adaptation and mitigation from the past, as well as proposed strategies for the future. Trends in frequency and intensity of hazard events are discussed within framework of socioeconomic conditions to explain how vulnerable groups are identified. Impact of how a social group’s or individual’s personal views, perceptions of environment, or risk averse attitudes will also be explored.

ECE-Early Childhood Education
ECE700 - Early Childhood Curriculum and Assessment
Based on the premise that curriculum, instruction and assessment are inextricably intertwined, this course is designed to help prospective teachers of young children conduct informal and formal assessments and develop an assessment system that draws information from various sources. Teachers will develop knowledge and understand the principles and components of preschool curricula and strategies of learning for preschool children. Curriculum and assessment, content, strategies, and examples appropriate for the development and learning of young children are emphasized. The course communicates the mindset that comprehensive, reliable and valid assessment data pave the way for meaningful, relevant and engaging learning opportunities for children.

ECE702 - Advanced Childhood Development
This online course provides teachers with the opportunity to review recent research and theory concerning advanced child growth and development. The course examines the nature and process of child development with a focus on infancy and early childhood years. The primary goal of the course is the integration of information generated from empirical research, both classic and current, into explanatory systems (theories) of child development. The emphasis in this course is less on learning the “facts” of child development and more on learning why child development research is conducted (theories), how it is conducted (methodology), what it means for the field (conclusions) and how research is evaluated (critical thinking).

ECE703 - Literacy Development
This online course provides teachers with the opportunity to review recent research and theory concerning literacy development. The study of different areas of literacy development specifically oral language, writing, and reading are encompassed in the course. The theory and research is translated into practical strategies, assessment materials, and preparation of rich literacy environments. The course provides the teachers with an effort to reflect upon current issues in early literacy specifically: early intervention programs to assist struggling readers, language and diversity, teaching skills in developmentally appropriate settings, organization and management of literacy programs, and family literacy partnerships.

ECE704 - Special Topics in Early Childhood Education
A focused examination of an emerging and dynamic problem or issue in the study and practice of early childhood education. Special subject matter not ordinarily covered in the existing curricula can be presented by faculty. Examples include but are not limited to: design and accreditation of early care settings, adapting instruction for diverse learners, cultural diversity in the early care setting, parent and community involvement, advocacy and ethics, inquiry-based learning, or content-specific topics.
Course Descriptions

ECE705 - Science and Math in Early Childhood Education
This course provides practicing teachers with the opportunity to attain an advanced conceptual understanding of and skill in using numerous teaching strategies for science and math content. As the result of this course, teachers will be able to increase their understanding of science and math content, and select, plan and teach integrated constructivist-based lessons for diverse learners in their early childhood years.

ECE707 - Leadership and Management in Early Childhood Settings
Early childcare settings should provide a supportive and encouraging environment. This course addresses planning for child care and education facilities including staffing, regulations and licensing, organizing space and equipment, nutrition and health policies, and parent and community relations. Teachers will examine the importance and application of developmentally appropriate practices and programs that are nationally recognized. Careful attention will be given to standards, ethical practices and advocacy in the development of future leaders of Pre-K programs.

ECO-Economics
ECO716 - Applied Economic Analysis
This course examines the relevance and applicability of microeconomic and macroeconomic principles, focusing on how these principles can be used to analyze and explain various events in the business environment. The first half of the course reviews certain micro-economic principles, which are then applied to real situations in which managers must make specific decisions. This includes a diagnosis of the problem, analysis of the economic choices, and development of a plan of action to help the enterprise reach a reasonable strategy or decision. The second half of the course reviews macroeconomic principles which are used to gain understanding of the aggregate behavior of different sectors of the economy, and how changes in behavior in each of these sectors are caused by various factors, including actions taken by policymakers (Congress, the U.S. President, and the Federal Reserve System) influence the overall level of economic activity. Also examined is how changes in these sectors affect managerial decisions aimed at improving business performance.

ECO765 - Health Economics and Policy
This course introduces students to the application of economic principles used to analyze the behavior of consumers, healthcare providers, health insurers and public policy makers in the allocation of scarce resources for the production and consumption of healthcare services. Economic concepts will be applied to analyze health care markets and evaluate health policies. International comparison of health systems and health outcomes will be discussed.

EDE-Elementary Education
EDE701 - Standards Aligned Curriculum, Instruction and Assessment
Development and Organization of School Curriculum- This course is designed to provide a complete understanding of the history, organizational patterns, and resources available for the development of the school curriculum. Emphasis is on recent developments in curricula for infant/toddler programs, pre-kindergarten, kindergarten and grades one through twelve. Students receive an introduction to the many facets of curriculum development. Varied opportunities are provided for the students to apply, synthesize and evaluate information through cooperative and interactive learning experiences.

EDE750 - Foundations of Integrative STEM Education K-12
This course provides practicing teachers with the conceptual and practical knowledge to enhance their current professional instruction through providing integrative STEM teaching and learning experiences. Candidates will explore current perspectives of how integrative STEM is taught in schools, engage in rich collaborative inquiry projects, and investigate how integrative STEM teaching and learning can enhance their classroom instructional practices while meeting the needs of all learners. The nature of STEM education disciplines, effective STEM pedagogy and teaching strategies, integrative STEM learning, and innovative problem-based instruction utilizing the engineering and design process will be examined.

EDE751 - Building Scientific Literacy and Understanding Through Inquiry
Through this course, candidates will explore the nature of science and scientific literacy, which has become an integral part of the STEM education movement. Candidates will discover how to design lessons that increase...
Course Descriptions

children's/learners’ understanding of scientific concepts as well as their ability to apply this knowledge in authentic, real-world settings. Candidates will expand their knowledge of science pedagogy (meaningful engagement in scientific practice) and transform lessons to promote student-centered teaching and inquiry while helping children/learners build valuable science process skills. Candidates will develop a repertoire of scientific practices to facilitate labs, demonstrations, discussions, fieldwork, and a variety of science activities through the lens of scientific literacy and inquiry-based instruction while exploring the importance of integrating science, mathematics, engineering, and technology.

EDE752 - Mathematics as Problem Solving
Through this course, candidates will explore how to utilize authentic problem solving and inquiry-oriented learning environments to integrate elements of mathematics across disciplines. Candidates will examine best practices in developing curriculum to foster student learning in mathematics, focusing on the content, pedagogical, and curriculum knowledge teachers need to be effective teachers of integrative problem-solving methods, moving away from low level, routine tasks and engaging learners in those that more closely mimic authentic, real-life situations. Candidates will discover how to design integrative lessons that teach mathematics through problem-solving as learners build mathematical dispositions, habits, and practices, while also developing new content understandings. Candidates will learn how to produce the mathematics achievement needed to be competitive in the global economy of the 21st century while also exploring the importance of integrating science, mathematics, engineering, and technology.

EDE753 - Integrative STEM Pedagogy and Instructional Design
This course is designed as an investigation of continually evolving integrative STEM instructional and pedagogical approaches. This includes the examination and application of state and national science, technology, engineering, and mathematics standards; an exploration of existing STEM curricular initiatives; an opportunity to investigate and evaluate STEM curriculum; and an investigation of continually evolving STEM pedagogies. Candidates will plan, design, implement, and reflect on an integrative STEM instructional unit that incorporates an integrative STEM learning cycle approach and developmentally appropriate methodology.

EDE754 - Creating Innovative Measures of Learning for Integrative STEM Learning Communities
This course is designed to investigate continually evolving approaches for developing innovative and inclusive student-centered learning environments that support hands-on, minds-on STEM learning. This includes an exploration of learning networks and communities of practice that contribute to STEM-based learning. Candidates will also explore methods for developing innovative and accessible measures of learning for integrative STEM education, to include an examination of continually evolving digital technologies that can be utilized in transformative ways to assess students’ authentic STEM learning experiences.

EDE755 - STEM Teachers as Leaders
This course is designed to prepare STEM educators to serve as teacher leaders who possess collaboration skills along with the knowledge, skills, and dispositions needed to support a STEM education vision and plan and are effectively prepared to guide school-wide implementation of STEM initiatives that develop and deliver high-quality STEM education to all students. Candidates will explore the various roles that instructional leaders engage in such as instructional design and implementation, facilitating professional learning for colleagues, and contributing to the school or district-wide strategic plan for implementing the STEM vision. Candidates will examine theoretical perspectives and research associated with teacher leadership that enable teachers to engage in meaningful transformation that promotes change in a digital age. Candidates will investigate funding opportunities for STEM programs and will design and implement a STEM professional development project that leads to significant instructional or organization-wide innovation.

EDE766 - Action Research
This course provides experienced teachers with the opportunity to attain a conceptual understanding of action research methods in elementary and early childhood education and the skill to use action research methods to transform classrooms and schools through data-driven decision-making. As the result of this course, students will be able to critically analyze action research projects; design action research projects; collect student, class and school data; interpret the results of student, class and school data analysis; and articulate action research principles as a teacher leader in their teaching contexts. (3 crs.)
Course Descriptions

EDE768 - Teacher Education Internship
The internship experience requires learners to participate in a supervised experience in an early childhood/preschool setting under the supervision of a sponsoring organization and university. The number of hours will be dependent upon the learner’s prior experiences and may include up to 120 hours in an early childhood setting. Valid and current teacher clearances or clearances for your state are required. Individual internship locations will be arranged based on prior educational experiences and the educational program.

EDE769 - Integrative Project in STEM Education
This course is designed as the capstone experience in which candidates synthesize the knowledge, skills, and dispositions developed across the Integrative STEM Education Program through a major culminating project. Candidates may develop a variety of tangible academic products or deliverables which enhance or contribute to the existing STEM-based needs of their local school or community. The goal of this course is for candidates to plan, develop, implement, present, and reflect upon a comprehensive individually produced project that contributes to their personalized growth in STEM education.

EDE795 - Student Teaching Internship
The student teaching experience provides the opportunity for the teacher candidate to engage in pedagogy which embraces the constructivist model. During the course of this assignment, students work in two public school classrooms and attend weekly practicum. Discussions focus on current research and best practices, constructivist teaching strategies and techniques, technology in the classroom, and Pennsylvania school laws relevant to the work of the classroom teacher. The teacher candidate will conduct an action research project and share with colleagues during practicum sessions. In addition to these school-based experiences, the teacher candidate is encouraged to engage in a series of community and cultural events with the surrounding school community. (9 crs.)

EDP-Professional Education
EDP600 - Statistical Methods
This course introduces the student to statistical concepts and techniques that are essential for valid and reliable field research. Emphasis is placed upon statistical reasoning and thinking as well as an understanding the logic behind variance inference procedures and their correct use. A heavy emphasis will be placed on proper interpretation including contextual interpretation. Numerous statistical methods will be discussed including: graphical techniques for both qualitative and quantitative variables, numerical summaries for both qualitative and quantitative variables, hypotheses tests, confidence intervals, regression techniques, one-way and two-way analysis of variance, and analysis of covariance. At the conclusion of the course, the student is expected to be able to identify, describe and critique the statistical methods used in published research studies and correctly apply the appropriate statistical methods in his or her own research. SPSS will be used throughout the course.

EDU-College of Education
EDU590 - Summer Institute for Teachers and Writers
As a partner of the Western Pennsylvania Writing Project, a National Writing Project site, the Cal U Summer Institute for Teachers and Writers provides an opportunity for writers and teachers to grow in their craft even as it exemplifies and examines best methods in teaching writing. Thus, the Summer Institute improves the teaching of writing throughout the region in all disciplines K-16, encourages writers and teachers to refine and extend their own writing skills, increases enthusiasm for the teaching of writing, and creates a network of capable teacher consultants.

EDU650 - Supporting English Language Learners
The purpose of this course is to help prospective teachers in all initial certification areas develop an understanding of how to modify mainstream course materials and instructional strategies so that English language learning students can engage in course content while simultaneously developing their new language.

EDU701 - Foundations of Gifted Education
This course introduces teachers to the foundational ideas of gifted education. Teachers will work with gifted students in their own school while considering ideas such as collaboration, documentation, and advocacy.
Course Descriptions

Teachers will explore key theories and research supporting gifted education and discover resources for gifted education.

**EDU702 - Instructional Design and Strategies for Gifted Education**
This course teaches strategies, methods and techniques for developing and delivering differentiated curricula appropriate for meeting the unique academic strengths, emotional needs and interests of gifted learners.

**EDU704 - Foundations of ESL Education**
The five domains of teaching English language learners are explored: culture, language, planning instruction, assessment and professionalism. Emphasis is placed on the Teachers of English to Speakers of Other Languages (TESOL) teaching standards and ESL K-12 standards. Teachers will examine research-based practices in relation to the five domains and identify their role as an English as a Second Language (ESL) teacher. Field experience may be required per Pennsylvania Department of Education ESL program specialist requirements.

**EDU705 - Program Models for Gifted Education – Service Delivery Options**
Students will demonstrate understanding of research-based instructional models and classroom services of gifted education. This will be done by using district data to evaluate service models and organizational options for gifted services in the district. After students analyze data, they will make recommendations to the district on how to improve their gifted education program.

**EDU709 - Sociolinguistics**
Teachers across the country are finding their classrooms increasingly diverse, therefore, this course will provide an examination of theory, diversity, and pedagogy constructs for explicit applications to practice in classrooms with English Language Learners. This course introduces students to Sociolinguistics, a field of study which ties language and communication to the context in which the language is being used. The variations of language use that are found in relation to age, gender, ethnicity, geographical location and social structure are some of the areas for investigation in the course. Field experience may be required for this course per Pennsylvania Department of Education ESL program specialist requirements.

**EDU712 - Content-Based ESL Instruction**
Teachers will examine the theories, principles, and practices that assist English language learners in achieving academic proficiency in the content areas. Planning standards-based instruction and adapting instruction in the content areas is emphasized. To promote the academic success of English language learners, teachers will involve the family and community, and analyze the learner to establish learning goals and assessment measures that are appropriate for the individual student. Field experience may be required for this course per Pennsylvania Department of Education ESL program specialist requirements.

**EDU713 - Language Acquisition and Development**
Second Language Learners of any age undergo certain processes to be able to learn a new language. In this course, candidates will be exposed to these processes. They will learn and conduct research on the structure and nature of language with a view to assisting their students to adjust to the challenges of learning a new language. They will also learn the theories of second language acquisition, styles and strategies in language learning as well as the socio-cultural and cross-linguistic influences of language learning. Field experience may be required for this course per Pennsylvania Department of Education ESL program specialist requirements.

**EDU714 - Language Assessment**
Assessing English Language Learners can be a challenge to not only teachers but also the students themselves. As ESL students in K-12 are taught English, there needs to be proper instruments in place of assessing their progress in language learning. These tools should be appropriate and should take into account the proficiency level of the learner. In this course, student teachers will gain exposure to the tools necessary to be able to assess English Language Learners appropriately and in a timely way. The course will offer knowledge on benchmarks for different proficiency levels. Field experience may be required for this course per Pennsylvania Department of Education ESL program specialist requirements.
Course Descriptions

EDU719 - Supporting Second Language Learners, Family, and the Community
Most second language learners are from another country. They come in with anxieties and go through phases of cultural adjustments. Without the necessary support, it might be hard for them to transition smoothly and thus be able to learn English well and fast. This course is geared toward equipping ESL teachers with the necessary tools to give ESL students the support they need while they undergo the challenges of transition. Issues that may arise concerning the support of students in the classroom, school and the community will be addressed. Field experience may be required for this course per Pennsylvania Department of Education ESL program specialist requirements.

ELE-PreK thru Grade 4 Educ

ELE621 - Instructional Strategies
This course is designed to provide teacher candidates with the knowledge, skills, and dispositions necessary to create developmentally appropriate and responsive instruction and assessment for learners in K – 4 classrooms. Topics covered include K through grade 4 curriculum models, developmentally appropriate practices, lesson planning, writing objectives, instructional strategies, and assessment of student learning. Through various teaching and learning methodologies, the teacher candidates will learn how to plan for and utilize strategies based on evidence-based research, Pennsylvania Department of Education Learning Standards and standards set forth by the National Association for the Education of Young Children.

ELE701 - Teaching & Assessment in Language Arts
This course examines the development of literacy and assessment practices in Pre#K to grade 4. Candidates are taught how to teach and assess reading, writing, listening and speaking skills with an emphasis on developmentally appropriate practices particularly in the area of language arts, and through the use of an integrated/balanced approach consistent with the constructivist theory of teaching and learning. Research-based effective practices and theories to literacy instruction and assessment are introduced, analyzed and evaluated.

ELE702 - Teaching & Assessment in Reading
This course examines the development of literacy and assessment practices in Pre#K to grade 4. Candidates are taught how to teach and assess reading, writing, listening and speaking skills with an emphasis on developmentally appropriate practices associated with an integrated and balanced approach to literacy instruction consistent with the constructivist theory of teaching and learning. Candidates learn research-based best practices that cultivate early literacy development so that young children through grade four develop skill in phonemic awareness, phonics, vocabulary, comprehension, and fluency. Candidates learn how to assess, make instructional decisions, and provide interventions that will meet the needs of a diverse classroom population. Teacher candidates participate in classroom and field-based experiences that provide them with the knowledge, pedagogy, and dispositions needed to support early literacy and to teach early literacy skills to preschool and early elementary children in a variety of classroom settings. In the required performance assessment project, candidates plan and implement a guided reading lesson in a K-4 classroom.

ELE703 - Field Experience
This course is designed to provide students with a field experience in a Pre K-4 classroom for a minimum of forty-five hours. Students will function as a teacher's aide, develop and teach five lesson plans.

ELE711 - Teaching & Assessment in Mathematics
Understanding the child’s perceptions and cognitive development as they relate to mathematics. Activities appropriate to the developmental and academic levels of elementary school children are explored and practiced.

ELE718 - Expressive Arts
This course deals with expressive arts during the early childhood and elementary school years. The course content focuses on developing creativity, the teaching and integration of art, music, movement, and creative dramatics within the curriculum.

ELE721 - Teaching & Assessing Students’ Science Learning
This course provides teacher candidates at the graduate level opportunities to acquire the science education knowledge, skills and dispositions expected of beginning early childhood teachers in self-contained classrooms.
Course Descriptions

The course provides an overview of the nature of science, scientific inquiry and focuses on science process skill teaching strategies. Candidates learn and practice science teaching skills such as: creating a classroom environment conducive to scientific inquiry, designing science instruction, assessing student attainment of academic standards, and using the local community as a location and topic of classroom science instruction. The course assignments introduce students to the professional community of science education professionals and resources. Teacher candidates participate in university classroom and field experiences that provide them with the knowledge, pedagogy, and dispositions needed to teach in a variety of educational contexts.

ELE731 - Teaching & Assessment in Social Studies
The foundations of the social studies are critiqued. Instructional strategies, best practices and resources for the constructivist social studies classroom will be researched, discussed and demonstrated. Attention will be given to current trends, use of technology in the curriculum, literacy instruction in social studies, and the present status of social studies in the pre K-4 classroom.

ELE741 - Diverse Culture and Arts in Prek-4 Education
This course focuses on diversity, culture and expressive arts in the context of Prek-4 Education. The course content includes: creativity, aesthetics, and the teaching and integration of visual art, music, movement, and creative dramatics within the curriculum. In addition, students will engage in practical experiences in identifying and working with diverse populations in a Prek- 4 classroom. The dimensions of diversity include race, ethnicity, gender, sexual orientation, language, culture, religion, mental and physical ability, class, and immigration status. This course was designed with the commitment to recognizing the importance of diversity, culture, expressive arts and their importance for the individual student, the community, and the world. The arts satisfy the human need to respond to life experiences. This was evident by the pervasiveness of these special areas throughout history in all cultures. Research confirms that all persons have innate potential in these subjects. Instruction in all three areas must be integrated into the school curriculum to enable all students to realize this potential and more fully participate in the human experience. Current teaching technology and strategies to meet the needs of children in grades Prek-4 will be researched, observed, and discussed. At least 30 hours of field experiences in a Prek or K-4 setting will be included in the course.

ELE795 - Student Teaching and School Law
This student teaching experience provides the opportunity for the teacher candidate to engage in pedagogy which embraces the constructivist model. During the course of this assignment, students work in two public school classrooms and attend weekly practicums. Discussions focus on current research and best practices, constructivist teaching strategies and techniques, technology in the classroom, and Pennsylvania school laws relevant to the work of the classroom teacher. The teacher candidate will conduct an action research project and share with colleagues during practicum sessions. In addition to these school-based experiences, the teacher candidate is encouraged to engage in a series of community and cultural events with the surrounding school community.

ENG-English
ENG590 - Summer Institute for Teachers and Writers
As a partner of the Western Pennsylvania Writing Project, a National Writing Project site, the Cal U Summer Institute for Teachers and Writers provides an opportunity for writers and teachers to grow in their craft even as it exemplifies and examines best methods in teaching writing. Thus, the Summer Institute improves the teaching of writing throughout the region in all disciplines K-16, encourages writers and teachers to refine and extend their own writing skills, increases enthusiasm for the teaching of writing, and creates a network of capable teacher consultants.

ENP-Entrepreneurship
ENP701 - Entrepreneurship
This course focuses on the characteristics of an entrepreneur and framework to develop and lead a successful entrepreneurial business. The impact of emotional intelligence in the workplace and sources of entrepreneurial finance are discussed. Students will learn how to develop and manage the human capital in the workplace.
Course Descriptions

ENP705 - Entrepreneurial Finance
This course is designed to expose students to the process of financing and investing in a new venture. The focus of the course is on the key analytical thinking and skills which are needed for financing of new venture and for making investment decisions. Students are introduced to the knowledge and financial tools needed by an entrepreneur for a successful business venture.

ESP-Special Education

ESP602 - Life Skills Planning & Instruction
This course prepares students to work with children and/or adults who require on-going support in order to participate in one or more major life activity. Students are required to do design and implement an instructional program with a person who needs this type and level of support.

ESP603 - Assessment and Prescriptive Teaching
This course teaches students how to administer, score, and interpret both norm-referenced and criterion referenced assessment devices and how to prescribe programs of remediation based on the results of these devices.

ESP606 - Transition Planning and Instruction
This course deals with special education programs for senior high school students as well as those persons who reside in the community. Emphasis is placed on vocational preparation and training. Specific techniques for task analysis of jobs, daily living skills, and social adaptation constitute a major portion of this course. Emphasis is placed on the development of functional skills that contribute to normalized development.

ESP607 - Early Intervention Special Education
The course is designed to provide future educators with knowledge of history, theories, legislation and litigation associated with early childhood special education. In addition, students will develop learning environments, implement research based curriculum, conduct developmental assessments, establish educational teams as well as enhance skills in communicating with team members and facilitate consultation with the targeted population and family members. [Professional Field Experience: 25 Hours]

ESP610 - Special Education Foundations and Collaboration
This course is designed to provide information and skills necessary for accommodating exceptional learners in a variety of school arrangements. The primary focus is foundations of special education and collaboration/consultation for the successful inclusion of students with high and low incidence exceptionalities into the inclusionary classroom.

ESP611 - Assessments and Positive Behavior Interventions
This course is required for all education or related services majors and is intended to provide future teachers with the fundamental knowledge, skills, and disposition: how to administer, score, and interpret both norm-referenced and criterion-referenced assessment devices; how to design appropriate learning environments to promote positive learning and reduce interfering behaviors; and how to design and implement school-wide and classroom positive behavior interventions and supports.

ESP612 - Evidence-Based Practices for PreK-8 Inclusion
Evidence-Based Practices for PreK-8 Inclusion is offered to Elementary Education majors the semester prior to their student-teaching experience and is a methodology course for pre-service education teachers. The purpose of the course is to prepare elementary pre-service teachers to provide evidence-based language arts and math instruction to students with disabilities in inclusion settings. An emphasis is placed on results of research and proven methods of instruction for teaching beginning reading and math to children with learning difficulties. The course stresses a behavioral approach to teaching, as well as the development and implementation of intervention strategies for various populations of children with exceptionalities in inclusion settings. Additional topics include modifications and adaptations of materials, effective teaching, learning strategies, lesson planning, assessment, and individualized education programs.
Course Descriptions

ESP613 - Evidence-Based Practices for Secondary Inclusion
Evidence-Based Practices for Secondary Inclusion is offered to Special/Elementary Education (grades 7-12) or Secondary majors and is a methodology course for pre-service education teachers. The purpose of the course is to prepare elementary/secondary pre-service teachers to provide evidence-based language arts and math instruction to students with disabilities in inclusion settings (upper grade level). An emphasis is placed on results of research and proven methods of instruction for teaching beginning reading and math to adolescents with learning difficulties. The course stresses a behavioral approach to teaching, as well as the development and implementation of intervention strategies for various populations of adolescents with exceptionalities in inclusion settings. Additional topics include modifications and adaptations of materials, effective teaching, learning strategies, lesson planning, assessment, and individualized education programs.

ESP620 - Special Education History, Theory & Exceptionality
This course is designed to provide information and skills necessary for individuals interested in the philosophy found within special education identification and practices. The course also serves to provide information regarding the definition, prevalence, etiology, characteristics, and general educational practices as they relate to individuals with exceptionalities.

ESP622 - Advanced Evidence-Based Practices for PK-8 Inclusion
The course is designed to provide future educators with knowledge of research based practices that may be employed in PK-8 in academic and nonacademic educational settings. The course will focus the future educator on techniques that will be beneficial for developing skills in core areas such as mathematics, language arts, science and social studies along with those skills that are necessary for navigating non-instructional periods. Specifically, this course will provide future educators with intensive, Tier 3, evidence-based interventions for students with exceptionalities. This course is a continuation of ESP 612 in that it provides more intensive, individualized teaching methods for those students who do not adequately respond to Tier 1 & 2 interventions.

ESP623 - Advanced Evidence Based Practices for Secondary Inclusion
This course serves to provide and prepare special education teachers to use research/evidence and strategy-based interventions and plan instruction of adolescents in grades 7-12 who receive special education services at Tier 3, and who may be included in the general education classroom. The course focuses on how to effectively apply the use of evidence-based practices in several curricular areas with an emphasis on the critical areas of English, mathematics, science, and social studies.

ESP639 - Field Experience Seminar in Special Education
A means for graduate students to obtain needed experiences with various groups of children with exceptional learning needs in such settings as special classes, an institution, a sheltered workshop, an activity center, a summer camp, a community MH/MR facility or by doing a specific piece of research with a population of students. Specific requirements for individual graduate students are developed by those students and the supervising professor.

ESP661 - Student Teaching Practicum
The student teaching program is designed to ensure that PreK – 4 and Special Education K – 8 majors, seeking dual certification are exposed to the full range of children covered under the comprehensive special education certification, i.e., intellectually disabled, emotionally disturbed, learning disabled, traumatic brain injury, physically handicapped, autism and other disabilities, along with children within the general education classroom. The major practicum provides an intensive experience for the student in two placements over the period of 15 weeks. The student will have an experience under the direction of a special education teacher and also a placement with a general education teacher. The practicum seminar component meets bi-weekly to provide PreK – 4 and Special Education K – 8 majors with an opportunity to discuss current topics within the field. Students may be provided with opportunities to demonstrate the effectiveness and functionality of their teacher-made devises, and curriculum materials used in their classrooms.

ESP701 - Introduction to Behavior Analysis
The basic learning principles of operant and classical conditioning, with the application of these principles with individuals with disabilities.
Course Descriptions

ESP712 - Seminar on Contemporary Trends and Issues in the Education of Exceptional Populations
Recent issues concerning exceptional populations. A paper making use of current research is required of every graduate student, who must present it to the class. Sample issues include such matters as normalization, nature and nurture, and educational alternatives. Prerequisites: ESP 610 and ESP 701. (3 crs.)

ESP720 - Student Teaching Internship
The special education teaching practicum/internship is designed to ensure that special education majors are exposed to the full range of children covered under the comprehensive certification, i.e., mentally retarded, emotionally disturbed, learning disabled, brain damaged and physically handicapped. The practicum/internship provides an intensive experience for the student in two special education placements for a period of 16 weeks. The practicum seminar component meets weekly to provide special education majors with an opportunity to discuss problems encountered by students in their teaching experiences. Students are provided with opportunities to demonstrate the effectiveness and functionality of their teacher-made devices, learning centers and curriculum materials used in their classrooms. Graduate students seeking dual certification in both special education and elementary education are also supervised within the special education department for their practicum experience. Teacher candidates are required to have one student teaching experience within special education and another in a regular elementary classroom. All other components remain the same for student teachers seeking dual certification. All coursework must be completed prior to enrolling in ESP 720. Graduate students who will student teach will be required to meet all requirements as are currently in place. Prerequisites: ESP 610 and ESP 701. (9 crs.)

ESP737 - Seminar on Legislation/Litigation
Laws and court cases, both federal and local, that have precipitated the initiation of programs for the exceptional child and with parents’ efforts to receive legal support for opportunities for their children to receive an appropriate education. Prerequisites: ESP 610 and ESP 701. (3 crs.)

ESP740 - Seminar on Nature of Autism Spectrum Disorders
This introductory course provides a foundation in understanding and addressing the unique and complex challenges individuals on the autism spectrum face in their learning, development, and social experiences.

ESP741 - Communication, Behavior and Instruction: Autism
This course offers preparation in the design and delivery of communication, behavior and instructional supports for diverse learners with Autism Spectrum Disorders (ASD) and includes data-based assessment and intervention; Applied Behavior Analysis (ABA), functional communication, Augmentative Alternative Communication (AAC); environmental supports; structured teaching; differentiated instruction, cognitive, developmental and sensory-based approaches.

ESP742 - Life Transitions and Partnerships: ASD
This seminar is designed to offer rigorous exploration and critical analysis of contemporary issues influencing the lifelong learning, development and sociocultural experiences of people on the autism spectrum. The course addresses core professional competencies in autism related knowledge and practice: (1) Transition, vocational and independent living, (2) Sexuality, (3) Family support and partnerships, (4) School and community partnerships; (5) professional literacy and leadership.

ESP743 - Navigating the Social World: ASD
This seminar is designed to provide preparation in methods to enhance socialization, communication and imagination in diverse learners with ASD. The course merges the theoretical understanding of the “triad of impairments” as defining features of autism with practical modes of assessment and intervention.

ESP750 - Concepts, Principles, Assessment ABA
This course covers behavioral principles and procedures including the assessment and training of verbal behavior. Participants learn to identify behaviors appropriate for change using behavioral assessment, selecting behavioral outcomes, and ethical and professional issues relevant to the practice of behavioral assessment. Content is drawn from the BACB Fourth Edition Task List. This course serves as the second in a series of courses that prepares students to apply for the Board Certified Behavior Analyst exam.
Course Descriptions

ESP751 - Applied Behavior Analysis Intervention 1
Participants learn the fundamental elements of behavior change and specific behavior change procedures. Content is drawn from the Behavior Analysis Certification Board (BACB) Fourth Edition Task List. This course serves as the third in a series of courses that prepares students to apply for the Board Certified Behavior Analyst exam.

ESP752 - Applied Behavior Analysis Intervention 2
Examination of the process used to conduct a functional behavioral analysis along with designing behavior-change procedures to be taught to educational personnel.

ESP753 - Professional Ethical Practice Behavior Analyst
This course prepares students for the ethical and professional practice of applied behavior analysis. Students will learn about the foundations of professional and ethical behavior needed to insure a high quality of practice in behavior analysis. Included will be discussions of professional representation of oneself and the field of behavior analysis, dissemination of professional values, evaluating behavior change, collaborating with other professionals, relationships with clients and colleagues. Content is drawn from the BACB Professional Disciplinary and Ethical Standards and the BACB Guidelines for Responsible Conduct for Behavior Analysts. This course serves as the 4th course in a series of six courses that prepares students to apply for the Board Certified Behavior Analyst exam.

ESP754 - Intensive Practical Training in Applied Behavior Analysis
The purpose of this intensive practicum course is to ensure that each student learns and applies clinical skills to address problem behaviors of social importance and to teach prosocial, adaptive behaviors. Students may accrue no fewer than 10 hours but no more than 25 hours per week in the application of behavior analytic principles in a university approved intensive practical training site under the supervision of a Board Certified Behavior Analyst.

ESP800 - Seminar in Advanced Behavior Analysis and Research Design
The Seminar in Advanced Behavior Analysis and Research Design was designed for graduate students who have completed ESP 701 (Introduction to Behavior Analysis or a similar course) and who have a thorough understanding of the principles of behavior and their application within applied educational settings. The purpose is to serve as a capstone experience in the master's degree in mentally and physically handicapped education. In this course students will integrate professional knowledge and skills gained throughout the program and learn (1) how to design and implement action research; (2) apply and critique behavior analytic techniques in education; and (3) reflect on how best to deliver and evaluate empirically supported interventions for students with or at-risk for special needs. Prerequisites: ESP 610 and ESP 701. (3 crs.)

FIN-Finance
FIN711 - Corporate Finance
An introduction to the role of financial manager in executive decision making. Topics include valuation models, financial planning, analysis and control, Capital budgeting, cost of capital, capital structure, and dividend policy.

FIN721 - Investment Management
Evaluation of debt and equity security alternatives for the use of investment funds and the theory and techniques basic to control of investment risks and optimization of investment returns.

FIN751 - International Finance
This course provides the conceptual framework within which the key financial decisions of the multinational firm can be analyzed. Topics include international monetary system, balance of payments, foreign exchange market, currency futures and options markets, foreign exchange risk management, and international financial markets.

HRM-Human Resource Management
HRM492 - HRM Internship
The student is placed with a business firm, bank, government agency or nonprofit organization performing human resource management-related tasks. The internship experience offers a practical training ground for students
that supplements academic training by permitting them to apply the theories, concepts and techniques learned through their other coursework to address actual problems in a real business environment.

**HRM711 - Human Resource Management**
This course discusses the key role that Human Resource Management plays in determining the survival, effectiveness, and competitiveness of US businesses; it addresses how effective HR practices help companies gain market share; and how these practices support the general business strategy and provide services the customer values.

**LAW-Law**

**LAW600 - Law and Public Policy**
The cornerstone course of the graduate degree comprises this program of study. Exactly how law plays out in a multitude of settings, from political and legal institutions, to schools and educational entities, to business and free enterprise forms, in social structures and cultural institutions should be a perpetual concern for the policymaker. How the law impacts individuals also receives some needed attention and course participants will weigh and gauge the effects of proposed and implemented legislation in a wide array of contexts including: police and the citizenry, correctional institutions and the incarcerated, government benefit plans and targeted recipients, entitlement programs and the public treasury, tax policy and the incentive based model, charitable giving and the law’s role in fostering giving, to name a few. Measuring impacts and effects on individuals and institutions stands in the forefront of course delivery.

**LAW601 - Law and Ethics**
An inquiry into the interplay of law, morality, ethical reasoning and Western Legal tradition. The course exposes the tradition and foundations of the American legal system with special emphasis on its jurisprudential foundations. Questions of right, justice, equity, law as moral command and order, natural law reasoning and the dignity of the human person are central to the instruction. The course delivers a critical look at how our legal and justice institutions have come about and provides a method for dealing with and delving into perennial legal and moral problems that plague cultures. Overview of the major legal theories about the nature of law and its place in the political system. Among the issues considered is the origin of law, its relationship with divine law, obligations of obedience and disobedience, and the relationship between political sovereignty and law.

**LAW602 - Law, Civil Liberties and the Constitution**
Analyzing the place of the Constitution and Supreme Court in American policy, using both empirical and case materials is the primary purpose of this course. Focus also includes the structure and powers of national government, with special emphasis on the Supreme Court as a policy-making institution. Civil liberties and corresponding constitutional protections will be examined in depth including a close up of the Bill of Rights and Civil War Amendments. Issues of jurisdiction, search and seizure, police powers, free speech, privacy and its penumbras, state action, eminent domain, states’ rights, and other constitutional issues will be fully analyzed. Even more attention will be given to questions involving discrimination whether based on race, disability or gender.

**LAW603 - Law and Legal Method**
A review of the American legal system, including the courts and the legislatures, role and functions of its personnel, form and substance of law from a procedural and substantive perspective, and primary and secondary sources of the law. Students will be exposed to federalism, the function of law making and dispute resolution in the judicial system. The course also surveys the processes of the judicial, legislative and executive branches and the role of administrative agencies. Another facet of the course is dedicated to the mastery of legal method and the research tools essential to that success, including: judicial reports, including federal and state court reports and citation forms; case-finding aids, including federal, state and Supreme Court digests and encyclopedias; citators such as Shepard's Citations; digests; annotated law reports; legal periodicals, including periodical indexes and research procedure; the nature, function and characteristics of treatises; research procedures; state and federal administrative law; federal, state and local court rules; miscellaneous research aids; and non-legal research aids. The student will also be exposed to the various types of law, including crimes, civil actions, contract and business actions, as well as other typologies of law. Course participants will have ample opportunity to hone and develop critical legal skills by argument, advocacy, interpretation and preparation of legal documents.
Course Descriptions

LAW605 - Law and Police Process
A comprehensive examination of the role of police as gatekeepers in the justice system with particular attention
given to their role, function and responsibilities inside the legal system commences the course analysis. How
police and law enforcement carry out their duties in a free society will be the subject of debate and advocacy
as will the perennial issues surrounding police behavior - police misconduct, police abuse of discretion and
police alienation from communities. An equally important aspect of the course will relate to the legal issues that
surround police practice on a day-to-day basis. Police search and seizure, confessions and witness cooperation,
identification and investigative field practices, and the law of arrest and detention will be assessed from a
professional, statutory and constitutional perspective. Attention will be given to the efficacy of judicially ordered
remedies in the conduct of police and whether other methods of intervention may generate better results. A
comprehensive view of litigation tactics and strategies in police misconduct cases from initial investigation to
appeals, receive significant coverage.

LAW606 - Law, Punishment and Corrections
Concepts related to correctional law and its applications are the central theme of the course. Aside from the
usual review of correctional law issues, relating to prison modalities and regimen, discipline and due process,
constitutional protections during incarceration, with special analysis of 8th and 14th Amendment claims, the
course expends considerable time on the role of function of institutional processes and operations in the
 correctional sphere - allowing an even-handed discussion of the rights and responsibilities of both the correctional
officers and supervisory personnel and the inmates within their custody. Further treatment includes emerging
questions in the prison environment, including aids in the facility, free expression and political speech, the right to
vote, family and conjugal visitation, and matters involving parole and furlough, as well the theory of rehabilitation,
both medical and mental, in prison operations. Lastly, the course evaluates the diverse schools of thought in
the matter of punishment, including its legitimacy and its condemnation, and addresses the more controversial
questions in prison practice and therapeutic activity as punishment.

LAW607 - Law and Criminal Conduct
A comprehensive analysis of the law of crimes from a historical, philosophical, moral and statutory perspective
is the chief end of the course. Topics include criminal responsibility, criminal liability, and criminal defenses.
Students will be adept at understanding the roots of criminal conduct and just as capable in the analysis of
criminal legislation. Aside from dissecting the fundamental elements of each crime, the participant will become
learned in more than simple definition and delineation of crimes, but able to pose and advocate defense tactic
as well. How constitutional and social issues interplay with criminal proscription will be central to course delivery.
The course will include a study of criminal litigation process and procedure with a particular emphasis on appeal
strategy.

LAW608 - Law and Civil Litigation
A comprehensive review of civil action and remedies that are part and parcel of the American legal system is
the central focus of this course. Civil actions, in the law of torts and contracts, and in the arena of administrative
process, impact the justice system in varied ways. From litigation to court docketing, to enforcement and fines,
as well as other legal responses, civil litigation consumes the resources of the justice model. In the law of torts
and damages, the civil system provides intentional causes of action, from assault to defamation, from invasion of
privacy to false imprisonment, to injured parties. Negligence delivers remedies to those injured by a lack of due
cautions and expected behavior from the reasonable person. Covered too, will be the principles of strict, product
and vicarious liability in particular relationships such as employer/employee, parent/child or product manufacturer
and consumer. Methods and issues of damage awards will be fully critiqued as well as the current debate over
reform in the law of torts, workers compensation and other no-fault claim processes.

LAW609 - Law and Society
An interdisciplinary survey of the functions of law in society is the prime end of this course. The course not
only analyzes law and legal theory, as well as legal and social institutions, but also evaluates the interplay and
interdependence between law and the social order within which it resides. The study delivers special emphasis
on issues of justice, fairness, and equality. The relationship between law and the legal system and political/
economic institutions and ideologies is continually emphasized. Law and the legal systems are viewed from a
critical perspective, including the relationship between the legal and the individual as to matters of inequality, race, class, and gender. Emphasis is placed on evaluation of critical issues.

LAW610 - Law, Justice and the Family
A survey of the law of domestic relations from a statutory and common law perspective is the chief aim of this course. Special emphasis will be given to the diverse controversies inherent in the law of the family including annulment, divorce, separation, and other temporary and permanent dissolution agreements. In addition, course coverage weighs and evaluates the controversies and practical difficulties inherent in the division of property, custodial and equitable dissolution awards, and the judicial oversight of the parent/child relationship. Other topical concerns are visitation, adoption, proof of paternity, questions of incorrigibility and delinquency, and the diverse forms of litigation tactics so often witnessed in the law of domestic relations. Contemporary dilemmas related to the family will be thoroughly scrutinized and include gay and lesbian adoption, same-sex marriage, the rights of grandparents, state's right to intrude in family life in matters of medical care and worship, and other controversial claims.

LAW700 - Law and the International Community
Course examines the major legal systems of the modern world, commencing with the West, moving to the East and some emerging third world republics. In the era of globalization, knowledge of the legal traditions and legal systems of the world's major powers is essential. The course scrutinizes and critiques legal systems as systems, with distinctive components, internal relations and functionalities and includes a review of their respective history, culture, and structure. The purpose of the course is to compare the rules of law in the different legal systems in an effort to discern the general principles of law, and gain insight and understanding into the emerging globalization of legal principles and ideas. Serious assessment will also be provided relative to human rights questions, definitions of "political prisoner" and the principles defined by treaty and agreement as to the protection of individuals in a global context.

LAW701 - Law and the Administrative Process
The course exposes participants to administrative law theory and the practical aspects of administrative law practice, both within and outside the administrative agency. Coverage equips the student with the necessary skills to: 1) understand, apply, and research relevant statutory and regulatory provisions at the federal and state level; 2) read, interpret and draft proposed rules and regulations; 3) become familiar with the process known as the administrative law hearing; and 4) become familiar with the concept of administrative discretion and corresponding remedies. Preliminary drafts of documents, briefs, and opinions relative to the appellate stage of an administrative law proceeding will also be covered.

LAW702 - Law, Science and Forensic Applications
An interdisciplinary course covering law, criminal justice and technology in the evidentiary arena. Coverage in the course provides a broad-based assessment of expert witnesses, microanalysis, pathological evidence, admissibility and investigatory practice, ballistics, fingerprints, VASCAR/radar, and photographic techniques. Contrasted with criminalistics, subject matter of this course is primarily evidentiary. More particularly, the course will delve into the rules of evidence that guide the admissibility of forensic evidence in a court of law. Examination includes threshold tests for reliability and admissibility; qualification of witnesses competent to testify; scientific rigor required for admission; and case law determinations on the use and abuse of scientific evidence.

LAW703 - Law and the Environment
Surveys the major federal statutes and regulatory schemes relating to environmental quality and analyzes and compares the contrasting approaches to regulation that have been used in judicial settings. Focuses on the interaction of law and policy and considers the role of Congress, the regulatory agencies, and the courts in defining and implementing environmental mandates. Focused attention is given to air quality and its regulation, water and pollutants, the control and dissemination of toxic substances, management of hazardous materials and the debate around the government's role as protector of the environment.

LAW704 - Law, Business and the Workplace
Course content includes the various business entities and the steps necessary for creation and operation, from initial and amended articles of incorporation, state filing requirements, stock certificates and securities, stock
ledgers and books, resolutions, dividends and stock splits, employment agreements, as well as introducing other business forms from partnerships to limited liability corporations. In the employment sector, coverage will examine constitutional and statutory protection related to employee rights from benefits and pensions to discrimination remedies. Collective bargaining and other labor questions will be keenly assessed as well as emerging workplace questions involving maternity and family leave, wages and compensation, COBRA, free expression and religious rights and novel forms of disability claims.

**LAW730 - Independent Study in Law and Public Policy**
An independent opportunity for mature and scholarly graduate students to build on and further develop research, writing and analytical thinking skills by authoring a serious work of scholarship. Student is required to use advanced research and writing skills in the resolution of a current substantive or procedural legal problem. Student works directly under the guidance of a graduate faculty member and prepares, executes and submits for departmental review, the proposed course of study.

**MAT-Mathematics**

**MAT601 - Advanced Data Preparation and Cleaning**
This course provides students with an introduction to the need for and methods for data cleaning. The course presents methods for locating and handling invalid values, out-of-range values, and missing values along with methods for managing datasets. The course uses SAS® software.

**MAT602 - Data Visualization**
This course explores techniques and tools for creating effective data visualizations. The course covers the creation and exploration of visualizations for categorical data, time series data, spatial and geospatial data. SAS® software will be used for this course.

**MAT603 - Advanced Big Data Tools**
This course covers an introduction to big data analysis tools. The course provides an overview of SAS®, Hadoop and other big data tools. The course covers the structure and framework of data analytic tools and covers the use of these tools to perform various analyses.

**MAT604 - Advanced Big Data Analytics**
This course is intended to provide the student with an introduction to big data, big data analytics and several methods useful in big data analytics such as clustering, association rules and various forms of regression. SAS® statistical software will also be introduced and used to solve data problems.

**MAT605 - Advanced Data Analysis Capstone Project**
This course is designed for the certificate in Data Science to provide hands-on experience in the area of data science. This experience will enable students to apply their knowledge of data science and provide valuable experience in the application of methods studied within the program that should enhance their job opportunities upon graduation. Students will receive experience with real world data. Analysis will be completed using SAS®.

**MAT611 - Optimization and Operations Research I**
A first course of a sequence to the applied field of Operations Research. The first course starts by giving a general and broad overview of Operations Research. The course focuses on deterministic models, especially linear programming, integer programming, network optimization and non-linear programming.

**MAT671 - Advanced Multivariate Statistics**
Covers the basics for several multivariate statistical analyses. The course begins with a review of univariate and bivariate statistics and continues on to cover regression, multiple regression, multivariate analysis of covariance, discriminant analysis, logistic regression and survival analysis.

**MAT723 - Advanced Nonparametric Statistics**
This course provides an introduction to and in-depth development of nonparametric statistics. It includes the introduction of nonparametric inference testing including the Wilcoxon Test, the Mann-Whitney test, the Ansari-
Course Descriptions

Bradley test, the Kruskal-Wallis test, the Kendall test and the Theil test along with their associated estimators. Students will also learn how to run analyses within a statistical software program.

MGT-Management

**MGT721 - Production and Operations Management**
This graduate course addresses topics of management related to the production of goods and the management of service organizations. Students taking this course will apply quantitative techniques to cases and to settings requiring evaluation, assessment, and quantification. Inventory, space, capital, labor, technology and related values will be included in specific calculations.

**MGT730 - Hospitality Management**
This course provides an introduction to and a comprehensive overview of management in the hospitality industry worldwide. The course gives students a theoretical commercial operations, conventions, clubs, resorts, and casinos and the management skills needed to thrive in all segments of this industry. The course combines the academic concepts, perspectives and practices of the field with the pragmatism of real-world hospitality management by providing numerous examples to illustrate the circumstances of actual companies.

**MGT751 - International Business Management**
This is a graduate course designed to address global trade and to allow students to explore the global business world. Student are provided with information about trading and how global shipping organizations move tons of cargo globally with little cost. Foreign exchange is addressed as a changing model and students are taught to calculate changing values, and apply that to export and import increases and decreases. Students measure the effects of culture, unemployment, cultural practices, quantity differences, and the effects of metric differences on shipments and packaging.

**MGT761 - U.S. Health Care Policy**
This course is designed to provide students with an overview of U.S. Health care system, various organizations and institutions that make the U.S. Health care system work, its components, and related policy challenges. The course will discuss the rising cost of health care, history and financing of Medicare and Medicaid, and the role of government in healthcare.

**MGT763 - Health Systems Management**
This course is designed to provide students with an understanding of the conceptual foundations and practices of management in healthcare organizations. The course analyzes theories, strategies and systems of managing healthcare organizations. Various tools of planning and control, such as budget preparation and justification, training design, and labor union contracts will be explained. An analysis of administrative practices and procedures in healthcare organizations will be covered. The course will explore the continuous process improvement and healthcare quality management.

**MGT766 - Healthcare Information Systems**
This course describes the historical and current environment of healthcare information systems used to deliver cost-effective and high quality healthcare through a deeper understanding of information technology and management concepts. It concentrates on the theories behind data management, strategic planning, knowledge management, change management, decision support coupled with privacy and ethical aspects related to healthcare informatics and clinical information systems.

**MGT783 - Business Analytics for Big Data**
This course will help students understand the current and emerging trends and practices for working with big data and large-scale database systems used throughout business and social networking services. Information is growing exponentially growing and analyzing these data needs new methods and processes. Business
Course Descriptions

decision making is highly data intensive and require heavy read/write workloads. Topics in this course will cover understanding big data, storing and transforming this data, and technologies used to analyze these datasets.

MGT784 - Decision Support Systems
This course will discuss Decision Support Systems (DSS) used in business and the theory behind different DSS techniques, enabling students to understand today’s competitive business environment. Students will learn modeling, decision processes, data mining, expert systems, and executive information systems used in organizations to support data-driven business decisions. Additionally, students will be provided with the needed skills and knowledge of various decision making models based on logical and mathematical models under different circumstances like uncertainty, lack of information, or certainty. As an outcome, students will be able to discuss the design, development, and operation of decision support systems allowing them to apply and integrate their knowledge into the business environment aiding management in better decision making.

MIS-Management Info Systems
MIS711 - Management Information Systems
This course will utilize a managerial focus where students will learn the essential principles associated with implementation, strategic adoption, and the utilization of management information systems within an organization. It will employ information management concepts to real-world settings where students will discuss and analyze information needs using various approaches where students develop an effective information management plan. Covering the current and emerging trends of IT strategy and management, this course will provide students with an understanding of how to leverage IT within their organization to improve processes and drive organizational value for a competitive advantage.

MIS766 - Healthcare Informatics
This course describes the historical and current environment of healthcare information systems used to deliver cost-effective and high-quality healthcare through a deeper understanding of information technology and management concepts. It concentrates on the theories behind data management, strategic planning, knowledge management, change management, decision support coupled with privacy and ethical aspects related to healthcare informatics and clinical information systems.

MKT-Marketing
MKT711 - Marketing Management
This course focuses on the description and analysis of the nature, strategies, and techniques used in marketing management. These tasks are undertaken in most companies at the strategic business unit level. The marketing management process is important at all levels of the organization, regardless of the title applied to the activity. Typically, it is called corporate marketing, strategic marketing, or marketing management. The course provides students with a systematic framework for understanding marketing management and strategy. The course emphasizes primary and changing perspectives on marketing management in leading companies, the impact of interactive media on marketing management, and international focus in developing marketing management and strategy, and the interrelationships among critical elements of the marketing mix, advertising mix, and the internal and external environmental factors impacting the firm.

MKT741 - International Marketing
The course is designed to introduce students to role of international marketing in the global economy. Students are exposed to the dynamic environment of International Trade and various opportunities and challenges faced by those who are involved with international marketing. Topics cover the cultural environment of global markets, assessment of global market opportunities and marketing strategies to deal with these global market challenges.

MSE-Master of Arts Teaching
MSE641 - Orientation to 7-12 Education
An entry-level course for prospective teachers designed to begin their professional development. Different instructional activities will allow the student to become proficient in the theories of modern secondary education instructional development, basic history and philosophy of secondary education and of pedagogy in general.
Course Descriptions

MSE642 - Standards-Based Instruction in 7-12 Education
The Pennsylvania Standards Aligned System (SAS) is a collaborative product of research and good practice that identifies six distinct elements which, if utilized together, will provide schools and districts a common framework for continuous school and district enhancement and improvement. There are many intangible components; however, research supports the notion that great schools and school systems tend to have six common elements that ensure Student Achievement: Clear Standards, Fair Assessments, Curriculum Framework, Instruction, Materials & Resources, and Interventions.

MSE643 - Content Area Literacy in 7-12 Education
The purpose of this course is to help prospective teachers of the secondary education academic subject areas develop an understanding and appreciation of the necessary reading skills needed by their students. Methods of establishing awareness of general reading needs as well as the special skills unique to their subject area will be stressed.

MSE644 - Instructional Strategies in 7-12 Education
This course is for prospective teachers designed to begin their professional development. Different instructional activities will allow the student to become proficient in the theories of modern secondary education instructional development, basic history and philosophy of secondary education, and of pedagogy in general. Students will participate in observation at selected field sites, grades 7-12. Students will begin development of their professional portfolio.

MSE645 - Technology Integration in 7-12 Education
The purpose of this course is to help teacher candidates learn how to effectively analyze, select and integrate current educational technologies into the design, implementation and assessment of learning experiences to engage a diverse student population.

MSE646 - Assessments and Inverventions in 7-12
Part of this course is designed to provide insight into the design, implementation, and analysis of assessment instruments used in 7-12 education. The second part of this course is to allow the secondary education candidate to become aware of, and to gain experience in, the contemporary interventions that teachers use to prevent, minimize, or eliminate negative behaviors in the classroom.

MSE647 - Classroom Management in 7-12 Education
This course will allow the Secondary Education teacher education candidate to explore different instructional methodologies and classroom management plans, from the physical set-up of the classroom, classroom rules to procedures for dealing with problem students in your classroom.

MSE651 - Methods of English Teaching 7-12
This course is designed to provide insight into the teaching of general English, writing, and literature in grades 7 through 12. Students become aware of and use the resources and methods of instruction for teaching English at the secondary level. Open to secondary English education majors only.

MSE652 - Methods of Mathematics Teaching 7-12
This course is designed to provide insight into the teaching of general mathematics, algebra, geometry, probability, and statistics in grades 7 through 12. Students become aware of and use the resources and methods of instruction for teaching mathematics at the secondary level. Open to secondary mathematics education majors only.

MSE653 - Methods of Science Teaching 7-12
This course is designed to provide insight into the teaching of Biology, Chemistry, Earth and Space Science, and Physics in grades 7 through 12. Students become aware of and use the resources and methods of instruction for teaching science at the secondary level. Open to secondary Biology, Chemistry, Earth and Space Science, and Physics education majors only.
MSE654 - Methods of Social Studies Teaching 7-12
This course is designed to provide insight into the teaching of general social studies, history, political science, geography, economics, anthropology, psychology, and world cultures in grades 7 through 12. Students become aware of and use the resources and methods of instruction for teaching social studies at the secondary level.

MSE655 - Methods of Art Teaching K-12
This course is designed to provide insight into the teaching of general art, art history, ceramics, crafts, drawing, painting, and printmaking in grades K through 12. Students become aware of and use the resources and methods of instruction for teaching art at the secondary levels. Open to Art education majors only.

MSE656 - Methods of Foreign Language Teaching 7-12
This course is designed to provide insight into the teaching of foreign language acquisition and cultural courses in grades K through 12. Students become aware of and use the resources and methods of instruction for teaching languages and cultures at the secondary level. Open to secondary Foreign Language education majors only.

MSE661 - Student Teaching and School Law
This is the final and most extensive clinical experience. Students are assigned to a supervising teacher or teaching team at one of our clinical sites. The students spend full time in classroom teaching for a semester of fifteen weeks. Student teaching is scheduled during either the fall or spring terms of the senior year. Pass/fail grade.

MSE720 - Advanced Standards-Aligned Instruction 7-12
This course focuses on planning instructional units and lessons that are aligned with state standards. Using the Standards Aligned System (SAS), teachers will develop a thorough understanding of curriculum planning and the importance of diagnostic and formative assessment. All aspects of the SAS: Clear Standards, Fair Assessments, Curriculum Framework, Instruction, Materials & Resources, and Interventions will be utilized to provide a common framework for the design of instruction and assessment.

MSE740 - Advanced Instructional Technology
This course will prepare the learner to integrate technology into instructional practices through development of skills, knowledge and dispositions. The course focuses an exploration of research, trends, tools, and models of integration. Through active participation, the learner will learn new technologies as well as develop instructional modules for classroom integration.

MSE745 - Managing Learning Environments
This course will explore ways that effective teachers establish productive learning environments as well as the research that demonstrates the different methods of classroom management, from the physical set-up of the classroom, classroom rules and procedures for secondary education to dealing with problem students in your classroom.

MSE750 - Strategies in Teaching Online
The course provides a model of online instruction and the participants will practice online teaching strategies, course design, and assessment strategies. The course is recommended for educators who are or will be teaching online courses. The course introduces strategies and tips in designing and teaching an online course.

MSE755 - Constructivist Instructional Strategies
This course emphasizes strategies that engage students in active inquiry, collaboration with peers, and acquiring and using tools of learning in an experiential learning environment. The approach of the course is experiential, inquiry-oriented and reflective.

MSE760 - Reflective Practitioner
This course provides guidelines for teachers to continually engage in the cycle of review and adjustment for the purpose of professional growth and improvement of instruction. Students will develop a research paper or a reflective analysis of their teaching using National Board Standards.
Course Descriptions

MSE761 - Assessment
This course examines the role that assessment plays in the instruction of students in both a traditional and an eLearning environment. The characteristics and uses of both formal and informal assessment instruments and procedures will be studied with an emphasis on the eLearning environment. Student Learning Objectives and how they are aligned with teacher evaluation is discussed. Students will create assessment instruments for traditional and eLearning environments.

MSE765 - Curriculum Design
This course in curriculum design provides the learner with the fundamental concepts and skills that will help teachers develop a thorough understanding of curriculum development. This course is designed for teachers to help bridge theory and practice in curriculum development. The focus will be on presenting the concepts and skills of curriculum development and showing how to apply them to actual curriculum planning. (3 crs.) Summer

MSE766 - Instructional Design
This course develops knowledge of instructional design competencies appropriate for use in the development of traditional and eLearning applications. Students will experience both theory and best practices from the areas of education and training. Students will explore and acquire instructional design skills and knowledge associated with identification methodologies, learner analysis, task analysis, instructional objectives, teaching strategies and instructional evaluation.

MSE771 - Strategies for Inclusive Classrooms in 7-12
This course focuses on instructional strategies for the inclusive classroom. Teachers will develop a thorough understanding of differentiation and instructional techniques used to maximize learning for all students. It will address research-proven strategies to help special learners and to manage the inclusive classroom. Teachers will use assessment to identify students’ needs, plan differentiated instruction, and assess student achievement.

MSE780 - Field Experience
This field experience course provides students with the opportunity to apply their knowledge, skills, and dispositions in a professional setting related to the specific competencies of their concentration area. In consultation with their advisor, students will establish an agreement with the field experience setting and establish goals. Students will complete projects relate to their goals and demonstrate an ability to self-evaluate and reflect professionally.

MSE781 - Field Experience
This field experience course provides students with the opportunity to apply their knowledge, skills, and dispositions in a professional setting related to the specific competencies of their concentration area. In consultation with their advisor, students will establish an agreement with the field experience setting and establish goals. Students will complete projects relate to their goals and demonstrate an ability to self-evaluate and reflect professionally.

MSE790 - Thesis in Secondary Education
The thesis will usually be empirical in nature and involve the manipulation of independent variables, use of statistical methods or experimental design. The Publication Manual of the American Psychological Association will be required for this thesis. The thesis requires at least three members. Prerequisite: MSE 725. (3 crs.) Spring

NUR-Nursing
NUR601 - Theory and Research in Nursing
This course explores the relationships between theory, nursing research, and nursing practice. The use of theory and research in the construction of a scientific knowledge base for nursing practice will be examined. Emphasis will be on the importance of research as a process for developing and examining practice-based questions, and evidence-based practice. The research process, with emphasis on the logic and processes of inquiry, design, data collection and analysis, and the interpretation, dissemination, and application of findings appropriate to nursing practice, will be reviewed. A critical analysis of nursing research and the methodological approaches utilized in the practice of nursing administration and leadership in health care will be conducted. Students will develop proposals for individual or group research projects relevant to their areas of interest.
Course Descriptions

NUR602 - Health Policy in Nursing
This course is intended to familiarize graduate nursing students with current healthcare policy and the roles and responsibilities, processes and strategies, which create and support policy-based initiatives in health care today, and the impact of policy on health care. Students will apply the concepts gained in this course in advocacy and leadership roles in search of creative solutions to pervasive issues in health care to culturally diverse populations.

NUR603 - Information Systems for Nurses in Health Care Organizations
This course is designed to introduce students to information systems in healthcare organizations. Students will examine, evaluate, and utilize a variety of information systems available to the nurse leader in health care organizations. Use of information systems, standardized databases, and statistics needed for population analysis is presented. During the course students will compare and interact with information management applications related to administration, education, practice and research. Multimedia technology and software will be used for projects related to the student's area of interest.

NUR604 - Population Health Promotion and Disease Prevention
This course explores the role of the masters-prepared nurse in integrating broad scientific, client-centered, and culturally appropriate concepts in the planning, delivery, and evaluation of evidence-based health promotion and prevention services and care to individuals, families, aggregates/identified populations, and global communities. Models and principles from a wide variety of sources and disciplines are examined to assist students in the exploration and evaluation of existing programs and services and in proposing new interventions and strategies to meet identified needs.

NUR711 - Nursing Organization and Leadership Theory
This course is designed to provide nurse administrators and leaders with an understanding of organization, management, and leadership theories as they apply to today's healthcare delivery systems. In addition students will explore leadership skills and decision making in the provision of culturally responsive, high-quality nursing care, healthcare team coordination, and oversight and accountability for care delivery and outcomes. Students will demonstrate the ability to develop a strategic plan and incorporate a collaborative team.

NUR712 - Nursing Administration & Leadership Role
This nursing administration and leadership specialty course focuses on health care knowledge and transformational leadership skills and competencies essential to the role development of nurse leaders and administrators for the 21st century. Students discover how to develop high-performance practice areas and how the leadership role is advanced through mentorship and career development. Contemporary studies and models for leadership competency are explored, and students critically self-assess their own competence, developing action plans in those areas they perceive as deficient. The role of managing one's personal resources in developing leadership competency is addressed. Students also gain competence in managing human resources. Concepts, models and principles of continuous quality improvement, tools and techniques for improving quality and performance are broadened. Students identify a quality topic and plan in preparation for completing the practicum project in NUR 813.

NUR714 - Legal Aspects of Health Care Administration
This course includes an introduction to the laws, regulations and court decisions covering the employment relationship, including labor-management relations, OSHA, EEOC, ERISA, ADA, etc. Health care law and an overview of practical ways to improve the quality and safe delivery of nursing care in health care organizations will also be reviewed. This course explores the most pressing legal and ethical issues and concerns related to the delivery of patient care and the administration of nursing services. This course is structured to present theories of ethical practice, as well as issues of the law related to health care delivery.

NUR715 - Financial Management in Non-Profit Healthcare Organizations
This course is intended to prepare students to effectively interact with financial management staff and participate in various aspects of financial control and planning in non-profit health care organizations. Included will be perspectives of financial management in health care, including trends in the industry and the forces that influence the financing of health care organizations. Financial statements, interpretation and analysis of financial reports,
Course Descriptions

and topics such as cost-benefits analysis, budgeting, and capital management will also be addressed. Additional emphasis will be given to cost effectiveness and financial future of health care organizations.

NUR721 - Foundations of Nursing Education
This course provides students with underlying content and information essential in the development, implementation, and evaluation of education programs, curricula and courses within academic and healthcare agency settings. The roles and competencies of nurse educators are reviewed and theoretical foundations education, teaching and learning are examined. Learning environments for nursing education are compared specific to achieving learning outcomes. Diversity of student learning needs are discussed and creating an inclusive learning environment is addressed. Legal and ethical issues with respect to both the educator and student implications are identified. Facilitating the teaching/learning process for students with disabilities are identified. The models, principles, and products specific to healthcare financing are examined including associated influences on contemporary healthcare delivery.

NUR722 - Curriculum Design in Nursing Education
This course provides students with essential knowledge and experiences in designing and developing nursing education curricula and courses. Students will examine forces, trends, issues, and factors affecting curricular decisions. Curricula models applicable to academic and healthcare organizational settings are presented. The integration of interprofessional education and collaborative practice in designing curriculum is discussed. Organizing frameworks and components of curricular design are analyzed with student development of a nursing education curriculum applicable to either an academic or healthcare organization setting.

NUR723 - Teaching and Instructional Strategies in Nursing Education
This course provides students with essential knowledge and experiences in designing and developing teaching and instructional strategies applicable in the academic and healthcare organization settings. Promotion of the learner as an engaged and active participant in the learning process is threaded throughout the content and creating an inclusive learning environment is emphasized. The roles and application of simulation, digital technology, distance and online learning in choosing and developing instructional strategies is examined. Students will develop instructional strategies from their course development project completed in NUR 722 Curriculum Development.

NUR724 - Assessment and Evaluation Methods in Nursing Education
This course is designed to provide students with essential knowledge and skills in developing, implementing, and evaluating assessment and evaluation tools commonly utilized in nursing education including interpretation and analysis of results. Students will explore measurement tools for evaluation of learning in the cognitive, affective, and psychomotor domains for both the classroom and clinical learning environments. The use of rubrics in evaluating learning outcomes is emphasized. Clinical evaluation methods are explored including the use of simulation. Issues related to testing and evaluation in nursing education are examined. Students will develop evaluation tool(s) from their course development project from NUR 722 Curriculum Development.

NUR725 - Advanced Clinical Practice for Nurse Educators
Building on prior education and clinical area of practice, this course will provide students with opportunities to develop advanced clinical knowledge and clinical proficiency within his/her specialty area of clinical practice. By integrating knowledge of pathophysiology to manifestations of disease/illness and pharmacologic management of patients, students will apply clinical inquiry through the processes of clinical judgement and diagnostic reasoning to develop expertise within their nursing practice specialty. Through the use of case studies and clinical practice experiences, students will develop comprehensive health databases, differentiate patient acute/chronic conditions, design evidence-based plans of care, evaluate healthcare outcomes, and plan health teaching for identified health issues.

NUR813 - Nursing Administration Role Practicum
This course provides students with the opportunity to synthesize and apply their understanding of nursing administration and leadership within and across complex integrated organizational and institutional boundaries. In this culminating experience, students plan, execute, and evaluate nursing practice within the context of the practice setting(s) or among a specific population of interest within the organization or in communities. Within
Course Descriptions

the practice situation, students enact leadership roles to expand, enhance, and optimize positive outcomes. The learning experience consists of an administrative practicum and online seminars. This culminating experience of the graduate program is designed to provide students with an opportunity to apply the knowledge and competencies acquired throughout the program of study to actual and simulated practicum situations.

NUR823 - Nursing Education Role Practicum
This course provides students with the opportunity to synthesize and apply the role of a nurse educator within an academic setting or healthcare agency. The course consists of online seminars and a 150-hour education practicum. Under the guidance of course faculty and a designated preceptor, students "immerse" themselves in the nurse educator role which includes planning, implementing, and evaluating an education activity.

PCJ-Prof Studies Crim Justice
PCJ747 - Financial Investigations
This course introduces you to current perspectives dominant in the field of financial investigations. Concepts of law and evidence, sources of information, accounting, methods of tracing funds, banking and financial record keeping, and interviewing tactics will all be covered. Primary emphasis will be placed on legal principles and applications of financial investigative techniques, and the pertinent crimes.

PCJ748 - Criminal Justice Organization and Management
This course is the study of command-level problems and trends in criminal justice organizations and management. These include the functional concepts of the administrative process as well as the principles of organizing, controlling, planning and leadership relating to criminal justice agencies.

PCJ749 - Seminar in Criminal Justice
This course for advanced graduate students allows the opportunity for scholarly research in a specific topic relevant to the justice system. The course is a seminar because it offers students the chance to interact in small groups and meet closely with the instructor. A focused, esoteric examination of a specifically approved research topic is the course’s chief purpose.

PCJ750 - Sexual Assault Investigations
The investigation of sexual offenses requires both the humanity of the investigator and the technical expertise of those remaining at the crime scene. How the forensic sciences play out in these forms of investigation is crucial to course purpose and content. How evidence is collected, identified and processed, as well as its suitability for use in the field, and its subsequent admissibility into court, are central themes throughout the course. Students are also exposed to case law and statutory materials dealing with sexual offenses and actual case studies for application and critique.

PCJ751 - Executive Protection and the Law
This course develops an understanding of the principals, planning, tactics, and techniques used as in executive protection (“EP”). This course will teach student’s fundamentals of EP such as advance site survey development, protective formations and protective threat assessments. This work provides students in the study of EP with the tools they need to know and appreciate the profession. Students learn what to expect when they are in positions of confidence and trust. Students also examine the full implications of being responsible for the safety and lives of others. The course emphasizes the basic elements of EP and its practical application.

PCJ752 - Forensic Photography, Digital Imaging and the Law
This course will improve the student’s knowledge and skill in relation to the use of digital imaging to both document and provide evidence. This will include education of digital imaging and its close relationship to forensic photography as well as familiarization with the operation of associated equipment. The student will examine the role of digital imaging as applied to photography from the crime scene, lab, or otherwise located materials of an evidentiary nature. In addition, the student will study the techniques used in digital imaging to achieve the desired results and in order to better understand how and why it is applied This course will include in depth studies of landmark cases associated with digital imaging to explore not just the theory but also the application of this technology in the legal arena. The student will also study the legal aspects and the process from the crime scene to the courtroom to include the presentation of photos and testimony of the photographer/ technician.
Course Descriptions

PCJ755 - Polygraph and Lie Detection
Polygraph testing is used for three main purposes: event-specific investigations (e.g., after a crime), employee screening and pre-employment screening. This course explores the different uses involved in the search for different kinds of information. This exploration includes how the polygraph measures several physiological processes (e.g., heart rate) and changes in those processes. It also includes examination of the charts of those measures in response to questions on a polygraph test. This course focuses mainly on validity because a test that is reliable (i.e., produces consistent outcomes) has little use unless it is also valid (i.e., measures what it is supposed to measure). It evaluates available scientific evidence on polygraph test validity coming from studies of specific-event investigations.

PRF-Perf Enhance Injury Prev
PRF700 - Orientation to Exercise Science and Health Promotion
This course is designed to provide an overview of online learning and the graduate program in Exercise Science and Health Promotion. Discussion will include various exercise science and health promotion models. The course will also introduce the student to various types and styles of learning via online education, and will orient the student to feature used in online courses.

PRF701 - Advanced Topics in SAQ and Endurance Training
This course will provide students with advanced knowledge regarding the topics of speed, agility, and quickness (SAQ) and endurance training. Students will be prepared for the Speed and Explosion Specialist Certification offered by the National Association of Speed and Explosion (NASE). Advanced topics of training will be explored, including body mechanics, sports training protocols and program design. Detailed sport performance training programs, focused on SAQ and endurance, will be covered.

PRF705 - Industrial, Clinical, & Corporate Wellness
This course is designed to develop knowledge and awareness of the major issues in the field of worksite health promotion. The focus of the course is on planning, administering, and evaluating wellness and fitness programs based in clinical, industrial, and corporate environments. The cost of unhealthy life style choices for the individual and employer and their relationship to the workplace will be explored. Topics include, the "Wellness Revolution", the "Industrial Athlete Model", benchmark programs, and outcomes assessment strategies.

PRF710 - Performance Enhancement and Physical Activity
This course offers a comprehensive discussion of functional anatomy, functional biomechanics, and motor learning as it related to functional rehabilitation and athletic reconditioning. The student will be introduced to integrated, functional rehabilitation techniques including core stabilization, neuromuscular stabilization, reactive neuromuscular stabilization, integrated flexibility, integrated strength, speed training, foot training, and vision training. The student will also be taught a comprehensive kinetic chain assessment to determine myokinematic, arthrokinematic, and neuromuscular deficits. After completing this course and Performance Enhancement Program Design, students will be eligible to sit for the National Academy of Sports Medicine Examination for Performance Enhancement Specialist certification.

PRF711 - Integrated Approach to Wellness & Fitness
This course will introduce the revolutionary exercise programming strategies of the Optimum Performance Training™ model. The student will receive a detailed insight into designing exercise programs for any personal training client. They will be shown how this systematic approach to program design uniquely blends the science of acute variables with the concepts of flexibility, core stabilization, balance, reactive training, speed, agility and quickness and strength training to develop safe and effective exercise programs for all individuals.

PRF712 - Corrective Exercise in Rehabilitation
This course will introduce the student to corrective exercise theory based on the pathokinesiological model. The student will be introduced to a systematic evaluation approach based on the pathokinesiological model. The pathokinesiological model will examine human movement systems in regard to key regions of the human body. These regions will be recognized as potential sites for integrated corrective exercise programs.
Course Descriptions

PRF713 - Special Topics in Sport Psychology
This course is designed to cover diverse professional issues related to sport psychology. Various organizations (APA Division 47 and AAASP) affiliated with sport psychology and ethical concerns will be addressed.

PRF714 - Health and Wellness Coaching Competencies
This course will provide students with advanced knowledge regarding the topics of speed, agility, quickness, (SAQ) and endurance training. Students will be prepared for the Speed and Explosion Specialist Certification offered by the National Association of Speed and Explosion (NASE). Advanced topics of training will be explored, including body mechanics, sports training protocols, and program design. Detailed sport performance training programs, focused on SAQ and endurance, will be covered.

PRF715 - Business & Entrepreneurship in the Fitness Industry
This course offers a comprehensive discussion of the practical aspects of starting and running a business in performance enhancement and fitness. The course focuses on launching new ventures, as well as business and management practices for individuals who are already in business but want to learn how to improve their operations. Specific topics include management theory, financial management, personnel management, record keeping, risk management and technology issues.

PRF716 - Advanced Techniques in Human Movement and Recovery
The purpose of this course is to explore theory and application of assessments, corrective exercise, and physical and physiological recovery strategies in the prevention or reduction of musculoskeletal injuries. Emphasis will be placed on system-based solutions that promote optimal human movement, performance, recovery, and readiness. Scientific evidence supporting design and implementation of musculoskeletal injury prevention programs are discussed.

PRF717 - Strength and HIIT Training in Group Fitness Exercise
This course will introduce a scientific approach to group exercise, specifically focused on strength and High Intensity Interval Training (HIIT) programs. The student will receive detailed insight into the concepts, principles, and procedures necessary to understand and implement strength and HIIT group exercise classes for all populations.

PRF718 - Health Behavior Change in Nutrition Education
This course examines health behavior change theories and practices utilized to facilitate healthful behavior change in a variety of nutrition-related settings. The design and evaluation of behavior change counseling and program development will also be explored.

PRF720 - Essentials of Human Movement Science
This course will introduce a scientific approach to the essentials of human movement science. The student will receive a detailed insight into the independent and interdependent function of the muscular, articular and nervous systems during human force production, stabilization and force reduction. The course will also introduce the student to various types and styles of learning via web-based technologies, and will orient the student to web based methods of learning. This course is a dually listed course applicable to the Master of Science, Exercise Science and Health Promotion, and to the Doctor of Health Science, Health Science and Exercise Leadership, within the department of Exercise Science and Sport Studies.

PRF750 - Performance Enhancement Program Design
This course requires the student to integrate knowledge learned from the course Performance Enhancement with professional experience and prior learning in fitness and rehabilitation. Students will work in teams to prepare a performance enhancement program proposal including program elements, rationale, innovative design, and supporting research. Each week, cohort members will professionally analyze and critique new proposals, resulting in high-level discussion and exchange. After completing this course and Performance Enhancement in Physical Activity, students will be eligible to sit for the National Academy of Sports Medicine (NASM) Examination for NASM Performance Enhancement Specialist certification.
Course Descriptions

PRF751 - Program Design in Wellness & Fitness
This course will introduce the revolutionary exercise programming strategies of the Optimum Performance Training™ model specifically for the wellness and fitness professional. The student will receive a detailed insight into designing exercise programs for any personal training client. They will be shown how this systematic approach to program design uniquely blends the science of acute variables with the concepts of flexibility, core stabilization, balance, reactive training, speed, agility and quickness and strength training to develop safe and effective exercise programs for all individuals.

PRF752 - Corrective Exercise Program Design
This course will introduce corrective exercise strategies based on loss of function. The student will receive detailed insight into the design of corrective exercise programs. The systematic approach of an integrated corrective exercise design uniquely blends the variables of available flexibility, isolated and integrated corrective strengthening, and corrective exercise design to provide the student with the necessary foundation in designing and developing safe corrective exercise programs.

PRF753 - Psychological Aspects of Sport Injury and Rehabilitation
This course is designed to introduce students to various topics related to the psychological aspects of sport injury. The course focuses on the onset (precursors), experience, and treatment of athletic injuries from a biopsychosocial perspective. Course material is based on empirical data and psychophysiology foundation and the role of psychological factors and psychological interventions, which influence rehabilitation and recovery.

PRF754 - Health and Wellness Coaching: Facilitating Change
Expanding on the concepts from PRF-714, “Health and Wellness Coaching Competencies “, students will identify the health and wellness coaching practices that influence long-lasting behavior change. Combine the tools and processes necessary to prepare to become a Certified Health and Wellness Coach and make an impact on the toughest challenges of our times: the epidemics of obesity, sedentary lifestyles, stress, depression, poor nutrition, and ever-rising healthcare costs.

PRF756 - Program Design for Optimizing Human Movement and Recovery
The purpose of this course is to provide an in-depth exploration and application of assessment data and analytics to assist practitioners in the design and implementation of programs focused on improving common human movement impairments, reducing injury-risk, optimizing performance, and enhancing physical and physiological recovery. Emphasis will be placed on system- and technology-based solutions that promote optimal human movement, performance, recovery, and readiness. Scientific evidence supporting design and implementation of musculoskeletal injury reduction programs are discussed.

PRF757 - Cardiovascular and Flexibility Training in Group Fitness Exercise
This course will introduce a scientific approach to group exercise focusing on cardiovascular and flexibility training programs. The student will receive a detailed insight into the concepts, principles, and procedures necessary to understand and implement cardiovascular and flexibility group exercise classes for all populations.

PRF758 - Applied Principles of Human Nutrition
This course covers the basic concepts physiological components and science of human nutrition. Dietary requirements and recommendations, nutrient composition of foods, assessment of nutritional status, physical activity, and relationship of human nutrition to health and disease prevention will be covered.

PRF760 - Leadership and Professional Development
This course is intended to prepare students for the leadership decisions and actions that are inherent in practice as well as every-day life issues. Professional and personal growth are discussed at great length and principles and applications of personal leadership practices will be explored in depth. Techniques for managing change and empowering others also are included in this course. Topics related to effective leadership are issues of communication, motivation, delegation, team building, and quality improvement. Finally, students will have the opportunity to perform a SWOT analysis on their business or self (whichever is applicable). This culminating activity is designed to strengthen the students’ leadership abilities and skills.
**Course Descriptions**

**PRF765 - Nutrition for Peak Performance**
An in-depth examination of contemporary issues such as performance enhancement dietary supplements, dietary lipids and heart disease, dietary fiber and health, influence of lifestyle factors on nutrition. Controversies in nutrition, ergogenic aides, hydration, and eating disorders are also discussed. Energy and nutrient needs for activity with emphasis on particular physical and athletic activities; common myths and fallacies concerning diet and athletic performance; and appropriate dietary approaches for specific activities and active people. This course is a dually listed course applicable to the Master of Science, Exercise Science and Health Promotion, and to the Doctor of Health Science, Health Science and Exercise Leadership, within the department of Exercise Science and Sport Studies.

**PRF770 - Exercise Physiology: Assessment and Exercise Prescription**
This course offers a comprehensive discussion of the knowledge, skills, and abilities needed for American College of Sports Medicine certifications and current clinical practices in sports medicine. Emphasis will be placed on the value and application of exercise testing and prescription in persons with and without chronic disease. Special topics to be addressed include, exercise prescription in children, the elderly, pulmonary patients, cardiac patients, and pregnant women. This course is a dually listed course applicable to the Master of Science, Exercise Science and Health Promotion, and to the Doctor of Health Science, Health Science and Exercise Leadership, within the department of Exercise Science and Sport Studies.

**PRF780 - Current Topics in Performance Enhancement and Injury Prevention**
The purpose of this course is to increase student understanding of various performance enhancement and injury prevention issues facing America and the world today. This course introduces students to the field of exercise science as a discipline and profession with a specific focus on contemporary topics facing all performance enhancement and injury prevention professionals.

**PRF781 - Current Topics in Wellness & Fitness**
The purpose of this course is to increase student understanding of various fitness and wellness issues facing America and the world today. This course introduces students to the field of exercise science as a discipline and profession with a specific focus on contemporary topics facing all fitness and wellness professionals.

**PRF782 - Current Topics in Rehabilitation**
The purpose of this course is to increase student understanding of various rehabilitation issues facing America and the world today. This course focuses students toward the ever-changing contemporary issues that impact direct and indirect client care.

**PRF783 - Psychological Perspectives in Sport Performance Enhancement and Intervention**
This course is designed to introduce students to various performance enhancement techniques commonly used in sports. Examples of such techniques will be presented in the course. Students will be able to apply the basic features of PE & I to a specific sport or rehabilitation situation. Students will have the opportunity to create their own intervention manual based on research and course content.

**PRF784 - Current Topics in Health and Wellness Coaching**
The purpose of this course is to increase student understanding of various fitness and wellness issues facing America and the world today. This course introduces students to the field of health and wellness coaching as a discipline and profession with a specific focus on contemporary topics facing all fitness and wellness professionals.

**PRF786 - Current Topics in Human Movement and Recovery**
The purpose of this course is to increase student awareness and understanding of the various musculoskeletal health and performance issues facing America and the world today. This course introduces students to the field of performance healthcare as a discipline and profession with a specific focus on contemporary topics and trends facing professionals who focus on optimizing human movement, human performance, and human recovery.
Course Descriptions

PRF787 - Key Concepts in Group Fitness Exercise
This course will focus on key concepts that will benefit individuals who are group exercise leaders and group fitness instructors. Students will be exposed to topics that impact fitness instruction, including skill development, coaching development, and the development of a healthy lifestyle. Special emphasis will be placed on pre-choreographed group fitness classes, effective coaching techniques for today’s group fitness participants, and instructor development.

PRF788 - Nutrition Through the Lifecycle
This course covers nutrition needs necessary for growth, development and normal functioning throughout the life cycle. Pregnancy, lactation, infancy, childhood, adolescence and aging will be studied. Specific concerns for each life cycle stage will be emphasized. Common chronic diseases during Adult nutrition and their corresponding interventions will be explored in depth.

PRF800 - Research in Fitness and Wellness
This course is designed to introduce the student to various research sources, creating skills for investigation of topics of interest in the future. Additionally, discuss of selected topics will promote critical thinking and enhance skills for critical review of content.

PRF810 - Research in Performance Enhancement and Injury Prevention
This course is designed to immerse the student in injury prevention research, focusing on current clinical outcomes research, psychology and physical activity research, and performance enhancement research. Topics include, research in resistance training, core stabilization, reactive training, posture, supplementation, and sport vision training. Injury prevention research is discussed related to special populations, such as athletes at opposite ends of the performance spectrum.

PRF816 - Research in Human Movement and Recovery
The purpose of this course is designed to introduce the student to various research sources, creating skills for investigation of topics of interest in the future. Additionally, discussion of selected performance health (human movement and recovery science) research topics will promote critical thinking and enhance skills for critical review of content.

PRF820 - Research in Rehabilitation
This course is designed to introduce the student to various research sources, creating skills for investigation of topics of interest in the future.

PRF830 - Research in Sport Psychology
This course is designed to provide the student with knowledge of research in the sport psychology arena. Students will be introduced to psychometric properties of research and interpretation of results published, enabling them to critically analyze published material specific to the area of sport psychology.

PRF840 - Research in Health and Wellness Coaching
This wellness coaching course is designed to introduce the student to various research sources, creating skills for investigation of topics of interest in the future. Additionally, discussion of selected wellness coaching research topics will promote critical thinking and enhance skills for critical review of content.

PSA-Prof Sci Applied Math
PSA611 - Optimization and Operations Research I
A first course of a sequence to the applied field of Operations Research. The first course starts by giving a general and broad overview of Operations Research. The course focuses on deterministic models, especially linear programming, integer programming, network optimization and non-linear programming.

PSA671 - Advanced Multivariate Statistics
Covers the basics for several multivariate statistical analyses. The course begins with a review of univariate and bivariate statistics and continues on to cover regression, multiple regression, multivariate analysis of covariance, discriminant analysis, logistic regression and survival analysis.
Course Descriptions

PSA711 - Optimization and Operations Research II
The second course of a sequence to the applied field of Operations Research. The second course continues the in-depth study of Operations Research. The course focuses on non-deterministic models, decision analysis and games, probabilistic inventory models, Markov chains, queuing systems, simulation modeling, non-linear programming algorithms, probabilistic dynamic programming and Markovian decision processes.

PSA715 - Advanced Time Series and Stochastic Processes
This course provides an introduction to stochastic processes. The course covers Poisson processes, renewal theory, Markov chains and continuous-time Markov chains, martingales, random walks, and Brownian motion.

PSA723 - Advanced Nonparametric Statistics
This course provides an introduction to and in-depth development of nonparametric statistics. It includes the introduction of nonparametric inference testing including the Wilcoxon Test, the Mann-Whitney test, the Ansari-Bradley test, the Kruskal-Wallis test, the Kendall test and the Theil test along with their associated estimators. Students will also learn how to run analyses within a statistical software program.

PSA724 - Advanced Numerical Analysis and Empirical Modeling
This course is designed to introduce students to the fundamentals of numerical analysis and empirical modeling. Topics will include methods for systems of linear equations, matrix eigenvalue problems, interpolation, methods for nonlinear systems, initial value problems, and experimental models.

PSA725 - Data Mining and Simulation Modeling
This course is an introduction to data mining and simulation modeling. The course begins with an introduction to data mining including the preparation of data for mining. Knowledge representations such as tables, models and trees are then discussed before presenting basic algorithms for data mining including simulation modeling. The course concludes with verification of models and advanced mining techniques. Appropriate statistical packages will be presented and used throughout the course to complete analyses.

PSC-Prof Sci Cybersecurity

PSC600 - Operating Systems
This course focuses on fundamental principles in modern operating systems including Windows, Unix/Linux and Mac OS. Students learn about the services provided by operating systems’ software; memory management, process scheduling and communication, storage, input/output, and distributed systems. OS security and data protection, and the interaction between computers will be also covered.

PSC640 - Computer Networking
This course covers concepts in the design and implementation of computer communication networks, their protocols, the applications, and advanced principles of Computer Networks. Security issues in communication networks will be also studied, including secure communication, authentication, firewalls and intrusion detection.

PSC735 - Biometrics
This course concentrates on the unique advantages that biometrics brings to computer security, but also addresses challenging issues such as security strength, recognition rates, and privacy, as well as alternatives of passwords and smart cards. Students will gain knowledge in the building blocks of this field: image and signal processing, pattern recognition, security and privacy, and secure systems design. By the end of the course, students will be able to evaluate and design security systems that include biometrics.

PSC745 - Cybersecurity Risk Management & Assessment
In business today, risk plays a critical role. Almost every business decision requires executives and managers to balance risk and reward. This course introduces students to the strategic discipline of assessing, prioritizing, monitoring and controlling the impact of uncertainty on organizational objectives.

PSC755 - Wireless Networks and Security
This course is designed to provide the student with an understanding of the principles and concepts of wireless data network and security. Students will study wireless standards (such as IEEE 802.11 a/b/g/n, ZigBee,
Course Descriptions

2G/3G/4G/LTE). The course will survey the state of the art in wireless networks and security. Students will also learn security and privacy issues associated with wireless networks. Various attacks against wireless networks and their defense strategies will be analyzed.

PSM- Prof Sci Master Deg Cours
PSM645 - Applied Cryptography
An introduction to Cryptography with the Number Theory portion tied in. The following topics will be covered: Modular Arithmetic, Classical Cryptography, Public Key Cryptography, Introduction to Complexity, and their corresponding implementations in an appropriate computer programming language.

PSM675 - Project Management
This course focuses on the management and change control for both general and IT related 27 projects. Technical and behavioral aspects of project management are applied within the context of an 28 information systems development project.

PSM721 - Database Systems
This course introduces the graduate student to fundamentals of database design and use. Through the analysis of business processes, students will create conceptual database designs, in MS-Visio – for example, via normalization and entity-relationship modeling. Students will prove their models by implementing them using Oracle’s DDL SQL, and manipulate data in those structures using Oracle’s DML SQL and PL/SQL (Procedural Language/SQL).

PSM760 - Leadership and Professional Development
This course is intended to prepare students for the leadership decisions and actions that are inherent in practice as well as every-day life issues. Professional and personal growth are discussed at great length and principles and applications of personal leadership practices will be explored in depth. Techniques for managing change and empowering others also are included in this course. Topics related to effective leadership are issues of communication, motivation, delegation, team building, and quality improvement. Finally, students will have the opportunity to perform a SWOT analysis on their business or self (whichever is applicable). This culminating activity is designed to strengthen the students’ leadership abilities and skills.

PSM799 - PSM Capstone Course
This internship course will enable students to apply knowledge and solve problems in the real workplace. This course will consist of the student aligning with a business or entity to complete a specific project of series of projects with the entity. The student will then identify the problem, design a solution and effectively communicate a working solution to the faculty and entity working with the student. During each stage of the process, students will receive feedback from faculty and the entity for which they are working.

PSY-Psychology
PSY702 - Psychopathology of Childhood
Intensive study of the cognitive, emotional and behavioral disorders in children and adolescents. Emphasis is on etiology, early recognition and approaches to treatment or intervention in the schools.

PSY710 - Principles of Instruction and Intervention
This course is designed for the non-teaching educational specialist to assist them in gaining a fundamental understanding of the basic principles of instruction, with an emphasis on evidence-based practices in inclusive settings. Specific academic and behavioral strategies will be examined, as they relate to reading development and instruction, curriculum based assessments, program evaluation, the development of evaluation reports, and the implementation of intervention strategies for various populations of children at risk for or with exceptionalities in inclusive settings. Students will also examine a variety of theoretical frameworks that focus on the specific components of assessment, instruction and consultation in inclusive settings.

PSY712 - Advanced Psychology of Learning
This course examines the diverse, intricate process of learning. Behavioral and cognitive views of learning are emphasized with special attention given to the educational implications of learning theory.
Course Descriptions

PSY713 - Psychology of Growth and Development
This course explores how people grow and develop from infancy through old age. Physical growth patterns, along with emotional, intellectual, and social development are emphasized. Maturation, learning, and their interrelationships are also examined in terms of their implications of developmental variables for the home, school, and community.

PSY720 - Neuropsychology
This course presents the neuropsychological approach to the identification and education of children with learning disorders. The central nervous system and brain regions and their role in learning are studied in depth. Neuropsychological assessment techniques will be introduced to clarify cognitive strengths, weaknesses, processing preference patterns (simultaneous-sequential), and the identification of neuropsychological deficits in children. This course focuses on issues related to children with learning disorders, including: etiological factors, epidemiological studies, gender differences, subtyping, emotional concomitants of learning disorders, diagnostic instruments, and remedial techniques. The intent of this course is to provide the necessary theoretical framework from which more effective remedial programs can be developed for learning disordered children.

PSY721 - Advanced Tests and Measurements
This course is designed to provide the graduate student with an understanding of the use of tests for diagnostic studies of children, adolescents and adults in a diverse society. It explores the ways in which tests are constructed, evaluated, administered and interpreted. In addition, the course provides a survey of some representative tests of achievement, aptitude, personality, intelligence and occupational interests. Students also receive practice in administering, scoring and interpreting such tests through a practicum involving an evaluation of themselves and at least one other person.

PSY722 - Individual Psychological Evaluation I with Practicum
Emphasizes theory and competence in the administration, scoring, and interpretation of the Stanford-Binet Intelligence Scale V, and the Bender Visual Motor Gestalt Test. Extensive supervised practice in the administration, scoring, and interpretation utilizes subjects aged two to adult. Theory and experience with other infant and child measures of intelligence such as the Bayley II and the K-ABC–II are included. Psychological report writing is stressed.

PSY723 - Individual Psychological Evaluation II with Practicum
This course emphasizes the theoretical underpinnings of intellectual assessment and the development of competence in the administration, scoring, and interpretation of the Wechsler Scales: WISC-IV, WPPSI-III, and WAIS-III. Attention is directed toward the use of these scales in measuring intellectual levels, identifying cognitive strengths and weakness, and developing research-based interventions. Practicum experiences are an integral component of this course.

PSY728 - Practicum in School Psychology
This course is a practicum in psychoeducational assessment and intervention planning in which students develop competence in the administration, scoring and interpretation of individually administered achievement tests, as well as response to intervention, progress monitoring and the generation of research-based, data-driven interventions. Under faculty supervision, students conduct comprehensive evaluations of children, including gathering background information, writing reports and consulting with clients in the process of problem-solving in the educational setting. Ethical considerations, as well as the particular problems encountered when working with a diverse population, are included.

PSY734 - Assessment of Personality and Behavior I
An introduction to the assessment of personality and behavior. Experience is given to the student in the administration, scoring and interpretation of the more widely used personality assessment measures. Particular attention is given to assessment techniques used in planning for remediation and treatment.

PSY741 - Theories of Counseling and Psychotherapy
This course is designed to introduce students to the most common therapeutic approaches in use today (e.g., Person-centered, Cognitive, Behavioral, Family Systems and Reality Therapy). Lectures, classroom
Course Descriptions

demonstrations and role-playing are utilized to illustrate these various orientations. Attention is paid to implementation of counseling that is respectful of ethical boundaries/issues as well as cultural factors which may be involved in the therapeutic process. Student participation is required. A position paper describing the student's own orientation is required.

**PSY742 - Techniques of Counseling and Psychotherapy with Practicum**
This course is intended to provide both a didactic and an actual experience in counseling. Graduate students familiarize themselves with the phases, procedures, and goals of counseling and therapy through assigned readings, audiotapes, and group discussion of case presentations. This will include consideration of ethical boundaries/issues and cultural factors that are germane to the therapeutic process. Graduate students will be assigned or are asked to recruit five volunteer subjects for purposes of role-play activity utilizing counseling technique. Clients from the University's Counseling Center and the School Psychology Clinic will also be assigned as they become available. Those graduate students currently working in a school district may select cases from that setting; cases are to be approved by the instructor. Supervision of all cases is provided both in-group sessions and on an individual basis. Graduate students are seen outside of regularly scheduled group sessions for individual supervision.

**PSY752 - Fundamentals of School Psychology**
This course is an introduction to the profession of school psychology. Topics examined revolve around the roles and functions of school psychologists. A partial list of the topics examined includes: school systems, the law and school psychology, and professional ethics. Field experiences in educational settings are required for students enrolled in the school psychology program.

**PSY756 - Consultation and Group Processes with Practicum**
This course is intended to familiarize the student with the variety of group methods and techniques utilized by the school psychologist in a diverse society. This is accomplished, in part through assigned reading and group discussion. The student is also required to observe and then act as a group leader in an ongoing group activity. The student tapes group counseling sessions for the purposes of evaluation and supervision. This course also explores the variety of consultative techniques that may arise in a school system.

**PSY761 - Statistics and Research Methods in Psychology I: Univariate**
This course is designed to give students the basic information they need to interpret the univariate research methods and statistics that are used most frequently in psychology. The focus is on acquiring the skills to critically evaluate a research report, analyze and interpret data, and to write a research paper. This course is designed to provide the background for students in Psy 767.

**PSY762 - Statistics and Research Methods in Psychology II: Multivariate**
This course is designed to give students the basic information they need to interpret the multivariate research methods and statistics that are used most frequently in psychology. The focus is on acquiring the skills to critically evaluate a research report, analyze and interpret data, and to write a research paper. This course is designed to provide a continuation of the material from Psy 766.

**PSY769 - Independent Study**
This course provides students the opportunity to explore and research topics of interest that are not available as regular course offerings of the school psychology program.

**PSY773 - Internship in School Psychology**
The internship requires a minimum of 1200 hours of practical work experience under direct supervision of a qualified psychologist. A minimum of 800 hours must be completed in a realistic educational setting (i.e., public school system). The remaining 400 hours may be in a related setting (e.g., clinic, hospital, etc.). The intern is expected to demonstrate all of the competencies of the practicing school psychologist as outlined in Program Goals.
PSY774 - Internship in School Psychology
The internship requires a minimum of 1200 hours of practical work experience under direct supervision of a qualified psychologist. A minimum of 800 hours must be completed in a realistic educational setting (i.e., public school system). The remaining 400 hours may be in a related setting (e.g., clinic, hospital, etc.). The intern is expected to demonstrate all of the competencies of the practicing school psychologist as outlined in Program Goals.

PSY795 - Seminar in Behavior Modification with Practicum
This course provides the student with the knowledge and skills needed to design, implement, and evaluate behavioral interventions. Interventions applicable to school settings are emphasized and students are required to conduct a functional behavior assessment and to develop/implement a behavior intervention plan.

PSY796 - Seminar in Analysis of Research in School Psychology
This course consists of an examination of current research in School Psychology. Critical study and evaluation of empirical research findings applicable to selected topics from current editions of Best Practices in School Psychology are undertaken. The student develops skills in using current data bases to access empirically based research reports, as well as the abilities to critically analyze and synthesize the content of these reports as it relates to situations and issues faced by the practitioner school psychologist. Students develop an understanding of the importance of using empirical data in making sound educational decisions.

PSY798 - Seminar in Professional School Psychology
Concepts fundamental to the practice of school psychology are discussed and evaluated in this course. A range of topics are discussed, including the roles and functions of school psychologists, legal and ethical issues, the organization and operation of school systems, student diversity, and community resources. As this course is taken in conjunction with the Internship in School Psychology, discussions tend to be dynamic and framed within the context of actual experiences encountered by interns.

PSY849 - Thesis
The student conducts an independent, scientific research study in a classroom or other structured educational setting. The thesis is presented as a written document that conforms to American Psychological Association style.

RES-Research
RES800 - Research Methods
This course explores the design and analysis of experimental and quasi-experimental research. It explores both quantitative and qualitative techniques. In addition to students being able to design and undertake basic research, an outcome of this course is to develop effective consumers of the research literature.

RES810 - Qualitative Research in Social Science
This course will introduce participants to the characteristics and various approaches to designing and conducting qualitative research projects within various social science disciplines. Students will gain hands-on experience in various qualitative methods and analysis techniques while carrying out a research project related to their areas of interest. (3 crs.)

RES819 - Research Paper
A written report on a specific topic of investigation, based on knowledge of the subject, acquaintance with the published literature on the subject and accurate presentation of findings.

RES829 - Research Project
An advanced study or presentation on a topic related to the student's academic discipline. The research project is more in depth than a research paper but less thorough than a master's thesis. Approval of only the graduate student's adviser is needed. The Publication Manual of the American Psychological Association or other generally accepted style for a particular academic discipline will be used.
Course Descriptions

RES849 - Thesis
The thesis consists of a written report of extensive research into a specific area of investigation, demonstration of knowledge of the background of the subject, the published literature of the subject, and high standards of original research and presentation. A thesis is often experimental in nature.

RSP-Reading Specialist
RSP700 - Foundations of Literacy: Theory and Instruction
In this course students will connect foundational knowledge about teaching reading to research based instruction. The major components of reading development and correlating instructional strategies will be examined.

RSP702 - Literacy Assessment and Instruction
The purpose of the course is to provide reading specialist candidates the knowledge of literacy assessment to equip them to serve in the various roles of a reading specialist. Formal and informal assessment will be explored. The candidates will implement several informal assessments, interpret data, and develop an instructional plan based upon the results of those assessments.

RSP703 - Practicum I: Assessment
RSP 703 and RSP 704 are to be taken together. The purpose of RSP 703 is to provide 55 field hours of authentic experience in the role of a reading specialist as a teacher who works with struggling readers. In this course, the reading specialist candidate will work with a K-12 student to assess his/her strengths and needs in reading and writing, develop an instructional plan of action to address those needs, and generate a report to parents that informs them of the assessment results and the resulting instructional plan of action. This course will take place at the University, and RSP candidates will work with K-12 students from the surrounding communities and school districts. RSP 703 is the first course in this two-course series.

RSP704 - Practicum II: Instruction
RSP 703 and RSP 704 are to be taken together. The purpose of RSP 704 is to provide 55 field hours of authentic experience in the role of a reading specialist as a teacher who works with struggling readers. In this course, the reading specialist candidate will work with a student to implement the plan of action developed in RSP 703 Action Research I: Assessment. RSP candidates implement the instructional plan of action, provide ongoing progress monitoring to drive ongoing instructional planning, generate a written report to parents/guardians, and meet with parents/guardians to report progress and make further instructional recommendations. This course will take place at the University with K-12 students from the surrounding communities and school districts and will immediately follow RSP 703.

RSP705 - Psychology of Reading
Psychology of Reading explores the psychological, sociological, cultural, and historical foundations underlying the development of literacy proficiency. During this course, participants will reflect on their own understanding of literacy, examine relevant literature, and become critical consumers of research.

RSP706 - Literacy Leadership
RSP candidates are professionals whose goal is to improve reading achievement in schools and/or districts. Reading specialists serve as a resource in reading and writing for educational support personnel, administrators, teachers, and the community, provide professional development based on historical and current literature and research. Reading specialists work collaboratively with other professionals to build and implement reading programs that positively impact student learning.

RSP707 - Creating and Fostering Literate Environments
The purpose of this course is to provide candidates with experience in defining, observing, and making recommendations for a literate environment that fosters reading and writing by integrating foundational knowledge, instructional practices, approaches and methods, curriculum materials, and the appropriate use of assessments.
Course Descriptions

RSP708 - Literacy Development for English Language Learners
Candidates will explore theories, pedagogical considerations, and current methodology in the teaching of reading, writing, speaking, listening, metacognition, and visualizing for English language learners. The critical components of reading instruction (phonemic awareness, word recognition and vocabulary, fluency, comprehension, and writing) for language development and acquisition are emphasized. Candidates will identify effective, research-based best practices, interventions, and strategies for ELLs, methods for school personnel, and resources to support culturally diverse families.

RSP734 - Content Area Reading
In this course reading specialists candidates are prepared to teach reading in the content areas to students in grades K-12. Reading theory is applied to elementary, middle, and high school across all curriculums. Essential components of reading in the content areas are emphasized: comprehension, vocabulary, reading/writing connection, study skills, assessment, differentiated and culturally responsive instruction, and integrating technology across the curriculum.

SLE-Edu Studies
SLE701 - Administrative Theory, Organization and Operation
This course offers the participant opportunities to gain competencies in and an understanding of the application of administrative theory relating to the operations of a school district. Through inquiry into the subject of administrative theory, candidates will gain critical and creative attitudes toward humanistic and scientific principles of public school organization and administration. Along with required course activities, each participant will complete a minimum of 15 hours of field experience assignments involving leadership or organization theory and practice. The field experiences will have utility for the participant’s home school district or another school district and will be undertaken and completed in concert with the instructor’s expectations.

SLE704 - Technology and Facilities Development
The course will offer the student an opportunity to view, understand and execute the planning, acquisition and management of technology and school facilities. The course emphasizes the use of technology for effective school management and instruction, promoting an educational environment that encourages change but also focuses on linking technology with students, and effectively analyzing and operating the management of the school organization as it relates to technology and facilities development. Topics such as reform, empowering students with technology, productivity and technology windows of the future and school facilities for the 21st century will be included. Participants will be required to demonstrate competencies regarding an understanding of the superintendent's role in the following areas: • Planning for immediate and future facilities; • Efficiently managing technology and facilities; • Acquiring technology and facilities; • Planning for immediate and future technology needs

SLE705 - Curriculum/Instruction and Leadership/Supervision
This course offers the participant the opportunity to gain an understanding of and skills related to the district level administration of curriculum, instruction, leadership and supervision. The course emphasis is on current practice in the field, state level requirements and national trends that are shifting theory and practice in their regard.

SLE707 - Strategic Planning, Policy Analysis, Board Relations
SLE 707 is designed for aspiring school superintendents. Specifically, the course addresses strategic planning and thinking, policy development and analysis, and the value of the relationship between the Superintendent and the School Board, specifically the Board President. The focus is reality based and draws from experienced instructors. The goal is to prepare aspiring superintendents for the duties and responsibilities they will encounter in the abovementioned areas, mindful of the fact that the key role of the school superintendent is to ensure a quality education for all students of the district.

SLE708 - SLE Internship
The internship is designed to be a theory into practice experience where formal coursework is applied in a field setting. It provides significant opportunities in the workplace to synthesize and apply the knowledge and to practice and develop skills identified in the program competency areas. Internships with a trained mentor at diverse settings is an important and highly valued part of the program. Each placement will be made in
Course Descriptions

cooperation with the SLE faculty, the participating school district mentor, and the intern. The internship involves field placement with a carefully chosen and trained superintendent/mentor (field supervisor) in a K-12 school district, who shares the SLE program philosophy that the superintendent should function as a change agent and facilitator of the reform process as well as a strong instructional leader. The intern is both a participant and observer under the direction of the superintendent who should provide the intern with as many supervisory and administrative experiences as possible. The intern gains valuable work-related experience and is given the opportunity to learn how academic knowledge and skills can be applied at the worksite with real people, problems and events.

SLE720 - District Leadership for Public Relations and Marketing
The objective of the course is to provide students the opportunity to view school public relations and marketing from the point of view of the school superintendent, through practical, real-life experiences. To become an effective school superintendent or assistant superintendent requires that an administrator be an effective communicator and develop positive community relations. It requires networking, knowledge, the ability to market your ‘product’ and the ability to establish credibility within and outside the school community. One must be able to make decisions, sometimes quickly, and then be accountable for those decisions. This course will enable students to learn the theory and practical application of school and community relations with a focus on fiscal responsibility. All candidates will be required to complete field work/experiences with a focus on fiscal responsibility that are designed to reinforce and extend upon the learning objectives of the course.

SLE730 - District Leadership for Legal Issues in Education
American public education operates within a complex framework of law. Federal and state constitutional provisions and statutes, along with administrative regulations and local school board policies, control the daily operation of our schools. It is imperative that all who are employed by school districts, particularly central office administrators, are conversant with this myriad of legal mandates and constraints so that they can operate effectively and efficiently and avoid time consuming litigation and grievances. The purpose of this course is to familiarize aspiring superintendents with the legal bases for the administration of public schools with a focus on fiscal responsibility. It is hoped that by the conclusion of this course that the students will possess the knowledge base and research skills necessary to make intelligent and informed educational decisions. In this course, emphasis will be placed on Pennsylvania school law. All candidates will be required to complete field work/experiences with a focus on fiscal responsibility that are designed to reinforce and extend upon the learning objectives of the course.

SLE740 - District Leadership for Finances
This course provides students with the fundamentals of public school finance. It will review issues that confront superintendents and school districts, and provide insights into resolving finance problems. Students will read, research, problem solve and explore financial issues with a focus on fiscal responsibility. All candidates will be required to complete field work/experiences with a focus on fiscal responsibility that are designed to reinforce and extend upon the learning objectives of the course.

SLE750 - District Leadership for Human Resources
This course examines how to manage human resources effectively in the dynamic political, legal, social, and economic environment currently impacting educational institutions. It includes examination of the acquisition, distribution, cultivation and management of human, fiscal, and time resources in public education, and identification and application of skills necessary for harnessing human and financial resources that further the goals of a school and district. All candidates will be required to complete field work/experiences with a focus on fiscal responsibility that are designed to reinforce and extend upon the learning objectives of the course.

SLE760 - District Leadership Field Project – Fiscal Responsibility
In this course, doctoral candidates will engage in problem-solving activities, field experiences and a field project planned cooperatively with university and school district personnel with a focus on fiscal responsibility. This practice-centered approach requires students to apply their knowledge and demonstrate proficiency in those skills that contribute to effective performance as a leader with a focus on fiscal resource management challenges faced by school districts.
Course Descriptions

SPT-Sport Management
SPT700 - Research Methods in Sport
This course is intended to introduce students to methods and design problems specific to research in sport management. It is designed to promote an understanding of the theory, tools, and processes involved in designing sport management research studies. Course emphasis will be placed on differentiating between qualitative and quantitative data, data collection, data analysis, data interpretation, and sources of data specific to the sport industry.

SPT710 - Socio-Cultural Aspects of Sport
This course will analyze the sport industry as a social institution, using critical thinking skills to solve controversies and issues related to the sport culture. Discussions will center around the social, political, and economic significance of sport in society. Emphasis will also be placed on understanding the positive and negative social effects of sport and physical activity on society.

SPT720 - Sport Marketing
This course will compare and contrast the field of sport marketing with the practices and applications of mainstream marketing. The course will examine the application of marketing principles within the sport industry. Course emphasis will center on linking the marketing plan to an organization's mission statement and core values. Topics will include SWOT analysis, market segmentation, distribution, packaging, promotion, positioning and pricing.

SPT730 - Public Relations in Sports
This course explores theories of communications and public relations management necessary for successfully working with internal and external publics of a sport organization. The course will demonstrate how community relations professionals serve their organizations by meeting social needs and connecting with key publics. Topics will include employee relations, community relations, media relations, customer relations and image enhancement.

SPT740 - Legal Aspects of Sport
This course will examine the law as it applies to sport organizations. An in-depth analysis will be conducted on the topics of contract law, constitutional law, tort law, administrative/statutory law, antitrust law, and collective bargaining as they apply to sport organizations.

SPT750 - Sport Finance
This course will be an in-depth study of financial analysis processes utilized in decision making by sport managers. The focus of the course is on basic principles of macro-economic, micro economics, economic impact analysis, business structures of sport organizations, basic tools of financial management, and interpreting financial statements. Topics include principles of budgeting, practical budgeting, sources of revenue, fundraising methods, financial planning, ecommerce, public stadium/arena finance, and basic accounting principles.

SPT760 - Sport Ethics
This course will focus on the ethical issues impacting sport organization policy formation and practice. Students will recognize and identify moral and ethical problems related to sport in its intrinsic and extrinsic dimensions and develop a personal philosophy regarding social responsibility in the sport management setting. Topics include moral and ethical development theories, models of ethical analysis, code of professional ethics, personal and management values, and situational analysis.

SPT770 - Leadership and Management in Sport
This course is an analysis of leadership and managerial functions, concepts and practices used to foster interpersonal and small-group relations as found in sport organizations. Further, this course is intended to prepare students for the leadership decisions and actions that are inherent in Sports Management and as well as everyday life issues. Professional and personal growth is discussed at length and principles and applications of personal leadership practices will be explored. Techniques for managing change and empowering others also are included in this course. Topics related to effective leadership are issues of communication, motivation, delegation, team building, and quality improvement. Finally, students will have the opportunity to perform a Personal
Course Descriptions

Leadership Development Plan. This culminating activity is designed to strengthen the students' leadership abilities and skills.

SPT780 - Current Trends and Issues in Sport Management
This course is designed to identify, analyze, and evaluate current and future sport industry trends and issues that may affect a sport organization’s ability to establish and maintain a competitive advantage.

SPT781 - Sport Analytics
The class will discuss the theory, development, and application of analytics in sports. Students will learn about the application of analytics in sports for purposes of personnel acquisition and management, marketing, finance, communications, and team management among many other topics. The class will consist of lectures, quizzes, threaded discussions, and practical applications.

SPT782 - Economic Analysis in Sport
This course presents an application of economics concepts and issues relevant to the sports industry. Topics include: market structures and outcomes; barriers to entry; contraction and expansion; cooperative, competitive, and collusive behavior among participants; professional sports; collegiate and amateur sports: public policy, subsidies for new facilities, institutional rules, and tax policies; discrimination; and labor market imperfections.

SPT783 - Strategic Sport Management
This course is designed to introduce the key concepts, tools, and principles of strategy formulation and competitive analysis. It is concerned with managerial decisions and actions that affect the performance and survival of sport industry organizations. It will focus on the theories of strategic management and their applicability to the sport industry, including strategic planning, decision making, implementation and controlling processes, understanding organizational effectiveness, and environmental analysis.

SPT790 - Sport Governance
This course is designed to provide students with a knowledge and understanding of the power and politics of sport organizations that govern intercollegiate athletics. Students will learn and analyze how people involved in governance set the tone of an entire organization and how individual sport governance bodies fit into the greater industry. Emphasis will be placed upon the student’s development of a working knowledge of what these organizations do and what their true purpose is in the administration of an intercollegiate athletic department.

SPT791 - Sport Compliance
This course is designed to provide students with a knowledge and understanding of the necessary and mandatory compliance techniques of the major governing bodies of intercollegiate athletics to ensure institutional control. Emphasis will be placed upon an in-depth review and discussion of the various NCAA bylaw manuals, as well as NAIA rules and regulations.

SPT792 - Legal Aspects of Equity in Intercollegiate Athletics
"Legal Aspects of Equity in Intercollegiate Athletics" is designed to provide students with a knowledge and understanding of an in-depth of gender equity issues that are prevalent in an intercollegiate athletic setting. This course also covers the many legal issues dealing with equity in intercollegiate athletics. Emphasis is placed upon the development of an overall knowledge of Title IX and the various tests that have been implemented to assure compliance.

SPT793 - Development of Human Resource Strategies in Intercollegiate Athletics
This course is designed to provide students with the latest human resource strategies to successfully address everyday problems that may arise with coaches, staff and personnel of an intercollegiate athletic department. The student will develop a working knowledge of complex organizations and how this may affect the employees that he/she supervises.
Course Descriptions

SPT799 - Sport Mentorship
This course allows the student to obtain practical managerial experience in the sport industry while under the direct supervision of a recognized leader in the student’s chosen area of specialty in the sport industry. Course requirements dictate that students complete a minimum of 300 supervised contact hours.

SWK-Social Work-Grad

SWK701 - Generalist Practice I
Foundation framework for generalist social work practice, including the problem-solving process, social work values/ethics and social work roles as they apply to varying size client systems. Develops specific intervention skills, such as interviewing, assessment, contracting, goal setting and evaluation for diverse client systems with the emphasis on rural, small communities, and other underserved areas.

SWK702 - Generalist Practice II
Continues foundation for generalist social work practice and builds on SWK 701, with a focus on the community/rural content of practice. This course explores basic intervention/advocacy, case management and evaluation of practice. Additionally, this course provides examples from a variety of practice areas.

SWK705 - Human Behavior in the Social Environment
Foundation for working with individuals, families, groups, organizations, and communities. Theories and concepts of human development throughout the life cycle are presented and critiqued within the person-in-environment perspective. The framework is multidimensional, considering the impact of ability, age, class, exploitation, ethnicity, gender, oppression, political belief system, race, religion, sexual orientation, and the social environment on human behavior and development. Students learn to identify multiple determinants of human behavior using examples from all levels of social work practice in local, national, and international rural and small town communities.

SWK707 - Human Diversity
This course provides foundation knowledge for analyzing and understanding the dynamics of the social work profession on culturally grounded social work practice. Students develop skills to identify strengths, bi-cultural adaptation, and patterns of oppression, with particular emphasis on rural and small town communities. The course assists students in understanding the impact of oppression on human growth and development and social functioning for the integration of multi-level interventions to promote or enhance social justice.

SWK709 - Social Welfare Policy and Services
Examination of the history and value base of the social work profession and U.S. social policy with a framework for policy analysis from the definition of a social problem, through legislative adoption to actual program development. Special emphasis on the impact of these policies, and related services on small towns, rural communities, and diverse populations.

SWK715 - Research, Policy and Rural Social Work Practice
Use of research designs to inform and evaluate practice and policy in small town and rural contexts. Development of knowledge and skills for understanding and conducting applied research, with emphasis on research related to social work practices and programs serving small towns, rural communities and diverse populations.

SWK716 - Social Work Research Methodology and Data Analysis
This course examines: the logic of scientific inquiry; the social work research process with an emphasis on problem conceptualization, measurement options, and research design; the use of descriptive and inferential data analyses; and the development of skills needed for understanding and conducting ethical quantitative and qualitative research related to social work practices and programs serving small towns, rural communities and diverse populations.

SWK730 - First Year Practicum
MSW supervised placement in a social agency that provides opportunities for generalist social work practice with individuals, families and groups of all ages from rural and small communities, including advocacy skills to enhance social justice. The minimum hours required in a field placement is 240 for SWK 730.
**Course Descriptions**

**SWK801 - Advanced Generalist Practice**
Builds on the generalist practice skills, knowledge and values taught in Generalist Practice I and II. Integrates the use of advanced individual, family, group and organizational skills within the agency and community settings that serve diverse rural, small town, and underserved client systems. Addresses practice concerns such as acquiring sanction for work, assessing needed resources, supervision, certification and evaluation of practice.

**SWK803 - Differential Assessment**
Application of knowledge from foundation courses to social work assessment with clients and integration of a strength’s perspective with other social work assessment models to examine human differences and levels of functioning within the context of family, group, institutional, and community systems. Life model assessments, incorporating the Person-in-Environment Classification System, are conducted and students develop advanced generalist intervention plans that are appropriate for diverse client groups from local, national, and international underserved communities.

**SWK806 - Rural Family/Community Policy**
Explores the design, function and impact of community and family policies. Development of specific policies and the effects of policy on underserved family and community institutions and organizations. Skills in analyzing and synthesizing policy are applied to underserved situations and change strategies.

**SWK808 - Advanced Practice Evaluation**
Prospective social workers require tools to evaluate their own practice and their agencies’ programs. This course provides and develops advanced knowledge, skills, and values in the evaluation of social work practice. Building and maintaining effective researcher-practitioner partnerships is also emphasized. Program evaluation is emphasized in this course but single subject design is infused as well.

**SWK811 - Practice with Aging In Rural and Small Town Environments**
Integration of knowledge about aging, rural aging, services for the aging and the principles of social work and practice with various diverse populations in underserved environments.

**SWK812 - Practice in Supervision and Administration**
This course is designed to provide students with basic knowledge and tools for effective practice in positions for supervision, administration, and planning.

**SWK813 - Practice with Health Care and Health Care Planning in Rural and Small Town Environments**
Examines roles of the social worker and the place of social work values and practice in health care planning, modern medical ethics and professional practice.

**SWK814 - Practice in Mental Health in Rural and Small Town Environments**
Overview of MH/MR policies and services, issues of rehabilitation, advocacy, case management and treatment approaches (crisis, behavioral and chemical) and their relationship to social work roles and values in the context of community needs.

**SWK815 - Practice in Juvenile/Adult Justice Systems in Rural & Small Town Environments**
Overview of the juvenile and adult criminal justice in urban and rural communities places emphasis on the development of an understanding of the ever-changing philosophies that under gird the criminal justice systems. In addition, the focus of the course will include an examination of the relationship between human diversity and criminal justice.

**SWK816 - Practice In Children and Youth in Rural and Small Town Environments**
Examines the major problems and legal and clinical issues encountered when working with children. Special concern for victimized and underserved children in rural settings.
Course Descriptions

SWK821 - Practice in Substance Abuse/Addictions in Small Towns and Rural Environments
This course provides students with a substantive knowledge base and critical skills for planning to work in the addictions fields as well as for those who will encounter chemical dependency problems in their work with different age groups in the variety of arenas in which they practice.

SWK829 - Advanced Field Practicum I
First semester advanced MSW supervised placement in social agency setting for three days per week requiring advanced generalist practice with varying size and aging client systems, working in rural, small town, and underserved communities. Students are required to complete a minimum of 330 hours.

SWK830 - Advanced Field Practicum II
Second semester advanced MSW supervised placement in social agency setting for three days per week requiring advanced generalist practice with varying size and aging client systems, working in rural, small town, and underserved communities. Students are required to complete a minimum of 330 hours.

SWK840 - Special Topics
This course offers a discussion of selected topics of significant or current importance and interest to the social work profession.

TED-Technology Education
TED565 - Special Problems in Technology Education
This course provides the student with opportunities to experience and research various technologies, techniques and teaching methodologies in the discipline areas of technology education. An intense in-depth study will be made in relation to selected topics on an individual basis or as a short-term concentrated study session for a group.

TED701 - Issues in Technology Education Curriculum & Instruction
The focus of this course is two-fold. First, students will use state and national standards to develop a technology education curriculum by using various curriculum design processes. The second phase of the class is designed to improve the students' ability to use appropriate standards-based instructional methods. These include cooperative learning, problem-based learning, discovery learning, constructivism, reflection, meta-cognition and others those students research and demonstrate to the class. This course is part of a Global Online program.

TED702 - Assessment in a Constructivist Classroom
Assessment in Technology Education is designed to provide the classroom teacher with a variety of assessment tools that can be used in the classroom. A wide range of assessment techniques, from traditional to authentic, will be analyzed, designed, and evaluated. Finally, students will use basic research techniques to validate the assessments they design and test.

TED703 - Strategic Management in Education
Strategic Management in Education is designed to enable teachers to analyze their opportunities, environment, resources and constraints to develop a prioritized plan of action to maximize their success educating students within a complex political, social and economic system. Students will experience strategic planning, funding proposal development, and various analytical tools.

TED704 - Integrating Math, Science and Technology
This course is focused on integrating the content of mathematics, science and technology education for the purpose of teaching in middle and high schools. Curriculum issues and planning related to integrating mathematics, science and technology according to state and national standards are discussed and practiced. Finally, students will have an opportunity to develop instructional units and carry them out in an activity-based laboratory.

TED705 - Technology and Sustainable Development
This course focuses on the development of understanding of the concepts of development and sustainability and their relationships to technology. Concepts of basic human needs, community development, technology
assessment and research into specific technological alternatives will be included. Students will design, produce, test, and assess a relevant technological system.

TED715 - Study in Human Creativity
The primary purpose of this course is to formally introduce the student to the study of human creativity as an academic endeavor. It is specifically designed to establish each person’s competence as a creative problem-solving facilitator (a teacher, one who is knowledgeable and skilled at applying creative problem-solving methodologies). Individual, managerial and technical types of problem-solving activities will be engaged. Each student will conduct (facilitate) several problem-solving excursions. Each student will study, administer and evaluate several standardized tests that evaluate creative problem-solving skills. Students may evaluate themselves, others or both. This is a learning laboratory, action-oriented course intended to simulate real world creative problem-solving techniques. This course is part of a Global Online program.

TED716 - Sustainable Architecture and Systems
This course covers a variety of natural and sustainable construction materials and systems, some revivals of ancient materials and practices, some new and innovative, as the natural building movement gains both momentum and prominence in the construction and architectural arena. Integrated topics such as water conservation systems and energy conservation and alternative generation sources are also included. Two lecture hours and three lab hours per week.

TED718 - Special Populations in Laboratory-based Programs
The focus of this course is to understand the specific needs, populations, processes, adaptations, funding sources and other factors that affect the success of special populations who will be educated in technology education laboratory-based programs. This course will enable students to explore and develop various instructional methodologies and assessments for student learning. Finally, students will be introduced to a variety of classroom management and discipline issues that classroom teachers encounter each day and taught techniques to handle these situations.

TED725 - Applied Research Science, Technology, Engineering and Mathematics Education
This course is designed to give teachers an opportunity to study real classroom situations and to design a plan of action to improve those situations. Teachers will learn how to conduct a review of the literature and develop an understanding of various research methodologies, especially as they relate to Science, Technology, Engineering and Mathematics (STEM) education. Reflection and analysis of current trends in the STEM disciplines is a key component of action research. This course is part of a Global Online program.

TED766 - Special Problems in Technology Education
This course provides the student with the opportunities to experience and research various technology, techniques and teaching methodologies in the discipline areas of technology education. An intense in-depth study will be made in relation to selected topics on an individual basis or as a short-term concentrated study session of a group.

TED775 - Integrating Technology in Elementary/Middle School STEM Curriculum
This course provides elementary and middle level teachers an in-depth, research-based examination of technological literacy education within STEM disciplines. Candidates examine relevant technology education academic standards and design curriculum, instruction and assessment to enhance student achievement of proficiency in technological literacy. The course focuses on successful instructional strategies for integrating technology education throughout the existing school curriculum and aligning technology activities to help students achieve academic standards.

TED795 - Technology Education Internship
Student interns are placed in an educational/technical organization, which most nearly approximates employment goals or enrichment. The intent of the internship is to provide students with practical work experience in an environment in which they will be dealing with real problems requiring real solutions in a relatively short time frame.
Course Descriptions

TED807 - Technology Program Development and Improvement
Students will engage in a process to develop or access a district-wide technology standards-based program. They will develop strategies to facilitate and enhance student learning in all areas of their program, including content, curricula, instruction, student assessment, learning environment and professional development. They will examine the current status of a district’s program, establish new goals, determine strategies to meet those goals, develop goals to enhance personnel knowledge and skills, and examine strategies to evaluate their success. This course is part of a Global Online program.

TED850 - Technology Education Major Project
Students interns will produce a major culminating piece of academic work that synthesizes contents from the Technology Education masters program. This may take the form of a research activity of various types, a major curriculum development project, or other extensive individually produced pieces or work that is approved by the internship supervisor. All projects must follow a technological design process.

THE-Theatre
THE502 - Estill Voice Training: Levels 1 & 2 Combined Intensive
This course will provide a focused experience for vocal performers to explore and optimize voice production for musical and theatrical performance utilizing the Estill Voice Model™. By examining the acoustic, physiologic, and perceptual correlates of voice and by learning to enhance control of the vocal structures that influence vocal quality, the students will acquire tools offered by the Estill Voice Training™ system for adding color, strength, clarity and stamina to the performing voice.

TOU-Tourism
TOU709 - Statistical Applications for Tourism Analysis
TOU 709 Statistical Applications for Tourism Analysis (3 credits). This course will inform students how to use quantitative methods for the assessment of tourism performance and trends. Students will learn statistical methods, procedure, analysis, and interpretation in a tourism context.

TOU737 - Tourism Planning
TOU 737 Tourism Planning. Students will become familiar with the process of tourism planning as a mechanism to sustainable tourism development. This course will explore the advanced principles, steps, tools and case studies of tourism planning. Tourism policy, law, and administration will also be reviewed.

TOU777 - Tourism Field Experience
TOU 777 Tourism Field Experience (6-9 credits). Because a student enrolled in the Master of Arts in Tourism, Planning, and Development must engage in a field experience in the period between the successful completion of the first semester until the twenty-fourth month of the program, this course is a required component. For this course, an enrollee acquires practical experiences and applies those experiences according to the student’s interest and expertise. The field experience serves as a transition from course work to the Thesis/Master’s

TOU899 - Thesis/Masters Degree Project Option
TOU 899 Thesis/Master’s Degree Project Option (3-6 credits). Upon completion of the required course work students will complete the Thesis/Master’s Degree Project Option phase. The Thesis/Master’s Degree Project Option will be a piece of original research that contributes to knowledge within the tourism field. Project based work will be evaluated by the MA Tourism Development Program Advisor. A master’s degree project will be valued at three credits and the thesis six.

UNI-Co Curricular Activities
UNI093 - G0-GR Tentative Schedule
Used by Calu GO for tracking purposes.

UNI094 - GO-GR Schedule Confirmed
Used by Calu GO for tracking purposes.
Faculty

Stephanie J. Adam. (2016) Associate Professor, Business and Economics. B.A., Mercyhurst University; M.S., LaRoche College; D.B.A., Northcentral University

Ahmet Akgun. (2018) Associate Professor, Business and Economics. B.S., Dumlpinar University; M.S., Ph.D., Wichita State University

Ghassan Al-Sinbol. (2017) Assistant Professor, Applied Engineering and Technology. B.S, University of Baghdad; M.Sc., Ph.D., West Virginia University

David G. Argent. (2000) Professor, Biological and Environmental Sciences. B.S., Indiana University of Pennsylvania; M.S., Virginia Polytechnic Institute and State University; Ph.D., Pennsylvania State University

Summer J. Arrigo-Nelson. (2008) Associate Professor, Biological and Environmental Sciences. B.A., B.S., University of Rhode Island; M.A., Ph.D., Stony Brook University

Maggy Aston. (2005) Associate Professor, Art and Languages. B.F.A., Maryland Institute College of Art; M.F.A., West Virginia University

Justin Barroner. (2005) Associate Professor, Exercise Science and Sport Studies. P.G.A., B.S., Pennsylvania State University, M.S., California University of Pennsylvania; MBA, Clarion University of Pennsylvania

Wendy Batts. (2018) Adjunct Professor, Exercise Science and Sport Studies. B.S., Arizona State University; M.S., California University of Pennsylvania

Ralph J. Belsterling. (2001) Associate Professor, Communication Disorders. B.S., M.Ed., M.S., California University of Pennsylvania; M.S., Clarion University of Pennsylvania; Au.D., University of Florida

Mohamed Benbourenane. (2001) Professor, Mathematics, Computer Science and Information Systems. B.S.B.A., University of Science and Technology of Algeria, Algeria; M.A., Ph.D., University of California, San Diego

Ann Bergamasco. (2017) Instructor, Social Work. B.S., California University of Pennsylvania; M.S.W., University of Pittsburgh

Carol M. Biddington. (2005) Professor, Exercise Science and Sport Studies. B.S., M.S., Ed.D., West Virginia University

Azadeh M. Block. (2015) Assistant Professor, Social Work. B.A. Tuffs University; M.S.W., Ph.D., University of Pittsburgh

Melanie J. Blumberg. (2001) Professor, History, Politics, and Society. B.A., Youngstown State University; M.A., University of Akron; Ph.D., Kent State University
Carol Bocetti. (2004) Professor, Biological and Environmental Sciences. B.S., University of Florida; M.S., Ph.D., Ohio State University

David F. Boehm. (1989) Professor, Biological and Environmental Sciences. B.S., West Liberty State College; M.S., Ph.D., West Virginia University

Jayna Bonfini. (2018) Assistant Professor. B.A., Georgetown University; M.A., Carnegie Mellon University; M.A., Waynesburg University; Ph.D., Duquesne University

Vamsi Borra. (2018) Assistant Professor, Applied Engineering and Technology. B.S., Jawaharial Nehru Technological University, India; M.S. Youngstown State University; Ph.D., University of Toledo

Aimee B. Bosley. (2016) Assistant Professor, Health Science. A.A.S., B.S., M.S., California University of Pennsylvania

Kaddour Boukaabar. (1997) Professor, Mathematics, Computer Science and Information Systems. B.S., University of Wahran, Algeria; M.S., Florida Institute of Technology; Ph.D., Bowling Green State University

Sarah Downey. (2009) Associate Professor, English. B.A., University of the South; Ph.D., University of Toronto

Lisa Driscoll. (2004) Assistant Professor, TRIO and Academic Services. B.A., Waynesburg College; M.S., California University of Pennsylvania

Jodi L. Dusi. (2005) Associate Professor, Health Science. B.S., M.P.T., Ph.D., Duquesne University

Nicole Evanick. (2015) Assistant Professor, Nursing. B.S.N., Carlow University; M.S.N., Waynesburg University; D.N.P., Chatham University

Diane Fine. (2014) Assistant Professor, Childhood Education. B.A., West Virginia Wesleyan College; M.Ed., California University of Pennsylvania; M.A., Ed.D., West Virginia University

Christina Fisanick. (2008) Associate Professor, English. B.A. West Liberty University; M.A., Ph.D., Ohio University

Craig Fox. (2006) Associate Professor, Communication, Design, and Culture. B.A., Boston University; M.A., Tufts University; Ph.D., University of Illinois at Chicago

Kyle Fredrick. (2007) Professor, Earth Sciences. B.S., University of Wisconsin-River Falls; Ph.D., University at Buffalo

Laura Giachetti. (2017) Assistant Professor, TRIO and Academic Services. B.S., M.S.W., California University of Pennsylvania

Swarndeep S. Gill. (2002) Associate Professor, Earth Sciences. B.S., University of Alberta; M.S., University of Oklahoma; Ph.D., University of Wyoming

Debbie Goh. (2018) Assistant Professor, English, B.A., Nanyang Tech University, Singapore; M.A., Ph.D., Indiana University

Arcides Gonzalez. (2002) Assistant Professor, Art and Languages. B.A., Brooklyn College; M.A., Ph.D., University of California, Los Angeles

Gregg Gould. (1991) Professor, Chemistry and Physics. B.A., Colgate University; Ph.D., University of North Carolina at Chapel Hill

Elizabeth Gruber. (1990) Professor, Counselor Education. B.S., Bowling Green State University; M.S., Youngstown State University; Ph.D., Duquesne University
Maggie Habeeb. (2013) Associate Professor, Math, Computer Science & Information Systems. B.S., Stony Brook University M.A., Hunter College, CUNY, Ph.D., CUNY Graduate Center, City University of New York

Justin D. Hackett. (2013) Associate Professor, Psychology. B.S. Northern Kentucky University; M.A., Ph.D., Claremont Graduate University

Fanourios Halkiadakis. (2015) Associate Professor, Applied Engineering and Technology. Diploma in Electrical Engineering, University of Patras, Greece; M.S.E.E., Ph.D., Southern Illinois University Carbondale

Lindsay M. Hammond. (2015) Assistant Professor, Exercise Science and Sport Studies. B.S., Brock University, St. Catherines, Ontario; M.S., Eastern Kentucky University

Chadwick Hanna. (2010) Associate Professor, Biological and Environmental Sciences. B.S., Cumberland University; M.S., Middle Tennessee State University; Ph.D., University of Louisville

Scott Hargraves. (2006) Associate Professor, Health Science. B.S., Delaware Valley College; M.P.T., Rutgers University; D.P.T., Slippery Rock University

Chris T. Harman. (2005) Professor, Health Science. B.S., University of Vermont; A.T.C., M.S., Indiana University; Ed.D., Oklahoma State University

Daniel Harris. (2013) Assistant Professor, Earth Science, B.A., Slippery Rock University; M.S., Ph. D., West Virginia University

Mary A. Hart. (1984) Assistant Professor, Health Science. B.S., Nebraska Wesleyan University; M.A., Duquesne University; Graduate Aging Specialist Certificate, University of Nebraska, Omaha

Jeffrey R. Hatton. (2001) Professor, Exercise Science and Sport Studies. B.S., Lock Haven University; B.S., College Misericordia; M.S., California University of Pennsylvania; O.T.D., Chatham University

Peter Heh. (2013) Assistant Professor, Special Education. B.A., Washington and Jefferson College; M.Ed., Edinboro University of Pennsylvania; Ed.D., University of Pittsburgh

Joseph C. Heim. (1990) Professor, History, Politics, and Society. B.A., M.A., University of Pittsburgh; M. Phil., Cambridge University; Ph.D., University of Pittsburgh; Certificate, International Finance, Wharton Graduate School of Business, University of Pennsylvania

Rebecca A. Hess. (2001) Professor, Exercise Science and Sport Studies. B.S., West Virginia University; M.S., West Virginia University; Ph.D., University of Pittsburgh

Paul Hettler. (2005) Professor, Business and Economics. B.A., Pennsylvania State University; M.A., Ph.D., University of Pittsburgh

Karen Hjerpe. (2006) Professor, Student Services. B.S., Gannon University; M.S., California University of Pennsylvania; Ph.D., Robert Morris University

Larry D. Horath. (1990) Professor, Applied Engineering and Technology. B.S., M.S., Eastern Illinois University; Ph.D., Texas A&M University

Brent House. (2013) Associate Professor, English. B.A. William Carey College; M.F.A., Georgia College & State University; Ph.D., Indiana University of Pennsylvania

Raymond Hsieh. (2005) Professor, Criminal Justice. B.A., Central Police University-Taiwan; M.S., Rochester Institute of Technology; Ph.D., State University of New York at Buffalo

William Hug. (2007) Associate Professor, Childhood Education. B.S., Western Illinois University; M.S., Ph.D., Pennsylvania State University

Sabrina Hykes-Davis. (2015) Assistant Professor, Music and Theatre, B.A., Point Park University; M.F.A., West Virginia University

Olaniyi Iyiola. (2018) Assistant Professor, Math, Computer Science and Information Systems. B.Sc., University of Nigeria; M.Sc., African University of Science and Technology, Nigeria; Ph.D., University of Wisconsin

Bernadette Jeffrey. (2009) Associate Professor, Social Work. B.A., Washburn University; M.S.W., University of Kansas; Ph.D., University of Denver

Patricia A. Johnson. (2004), Associate Professor, TRIO and Academic Services. B.S., M.Ed., California University of Pennsylvania

David T. Jones. (1985) Associate Professor, Business and Economics. B.S., Waynesburg College; M.S., West Virginia University; C.P.A.

Elizabeth Jones. (2018) Associate Professor, Business and Economics. B.G.S., University of Kentucky; M.S., Ph.D., Capella University

Denise M. Joseph. (2005) Associate Professor, Communication Disorders. B.S.E.D., Duquesne University; M.S., Syracuse University; Ph.D., University of Pittsburgh

Leandro Junes. (2012) Associate Professor, Math, Computer Science & Information Systems. B.S., University of Antioquia; M.A. National University of Colombia; Ph.D. Binghamton University

Macdonald N. Kalé. (1985) Associate Professor, Communication, Design, and Culture. B.A., Governors State University; M.A., University of Illinois, Chicago; Ph.D., Indiana University, Bloomington

Chad M. Kauffman. (2001) Professor, Earth Science. B.S., Salisbury University; M.A., Ph.D., University of Nebraska-Lincoln

Dana Keener. (2013) Assistant Professor, Psychology. A.S., Community College of Allegheny County; B.A. California University of Pennsylvania; M.S.Ed., Ph.D., Duquesne University, Nationally Certified School Psychologist; Pennsylvania Certified School Psychologist

Jason Kight. (2010) Associate Professor, Special Education. . B.S., M.A., Ph.D., West Virginia University
Kalie R. Kossar. (2007) Associate Professor, Special Education. B.A., University of Pittsburgh; M.Ed., California University of Pennsylvania; Ed.D., West Virginia University

Lisa L. Kovalchick. (2004) Professor, Mathematics, Computer Science and Information Systems. B.S., California University of Pennsylvania; M.S., Ph.D., West Virginia University

Mary Kreis. (2004) Associate Professor, Exercise Science and Sport Studies. B.S., University of Virginia; M.S., University of Texas, San Antonio; Ph.D., University of Miami

René L. Kruse. (1989) Professor, Applied Engineering and Technology. B.S., Peru State College; M.S., Ph.D., Texas A&M University

Cassandra Kuba. (2007) Professor, History, Politics, and Society. B.S., Mercyhurst College; M.S., University of Indianapolis; Ph.D., Arizona State University

Bonnie Young Laing (2013) Associate Professor, Social Work. B.A., Edinboro University of Pennsylvania; M.S.W., West Virginia University; Ph.D., Virginia Commonwealth University

Richard J. LaRosa. (2007) Associate Professor, Business and Economics. B.S., MBA., Drexel University; Ph.D., Cleveland State University

Elizabeth Larsen. (2006) Professor, History, Politics, and Society. B.A., University of Virginia; M.A., George Mason University; Ph.D., University of Pittsburgh

Shirley A. Lazorchak. (2001) Professor, Business and Economics. B.S., West Virginia University; M.S., Robert Morris University; Ph.D., Ohio State University

Mark Lennon. (2016) Associate Professor, Business and Economics. B.A., Williams College; MBA., Northeastern University (Boston, MA); Ph.D., University of Rhode Island

Min Li. (2008) Associate Professor, Chemistry and Physics. B.S., Hebei University of Science and Technology, China; M.S., Tianjin University, China; Ph.D., Drexel University

Nan Li. (2009) Associate Professor, Business and Economics. B.A., M.A., Zhongshan University, China; M.A., Ph.D., City University of New York

Scott Lloyd. (2002) Associate Professor, Art and Languages. B.A., University of Pittsburgh; M.F.A., Pratt Institute; Ed.D., University of Pittsburgh

Kevin Lordon. (2003) Associate Professor, Secondary Education & Administrative Leadership. B.S., Edinboro University; M.Ed., Duquesne University; Ed.D., University of Pittsburgh

Ayanna Lyles. (2006) Associate Professor, Health Science. B.S., University of Connecticut; A.T.C., M.S., California University of PA; Ph.D., Southern Illinois University, Carbondale

Rebecca R. Maddas. (2014) Assistant Professor, Childhood Education. B.S., M.Ed., California University of Pennsylvania; Ed.D., Indiana University of Pennsylvania

Mario Majcen. (2009) Associate Professor, Earth Sciences. B.S., University of Zagreb, Croatia; M.S., University of Utah; Ph.D., Pennsylvania State University

Graduate Catalog

Edmund L. Matecki. (2014) Assistant Professor, Business and Economics. B.A. University of Oklahoma; MBA, Grand Valley State University; Ph.D., Wayne State University

Marta S. McClintock-Comeaux. (2007) Professor, History, Politics, and Society. B.S., Bucknell University; M.S., University of Michigan School of Social Work; Ph.D., University of Maryland

Karen McCullough. (2006) Assistant Professor, English. B.A., Pennsylvania State University; M.A., Youngstown State University; Ph.D., Indiana University of Pennsylvania

Barry E. McGlumphy. (2002) Professor, Exercise Science and Sport Studies. B.S., Lock Haven University; M.S., University of Arizona; Ed.D., University of Pittsburgh

Drew McGukin. (1990) Associate Professor, Communication, Design, and Culture. B.A., Freed Hardeman College; M.A., S.C.T., Murray State University; Ph.D., University of Nebraska-Lincoln

James T. McVey. (1966) Assistant Professor, English. B.A., Youngstown State University; M.A., University of Virginia

Robert M. Mehalik. (2015) Assistant Professor, Student Services. B.A., M.S., California University of PA

Sarah L. Meiss. (2007) Associate Professor, Biological and Environmental Sciences. B.S., Bloomsburg University of Pennsylvania; Ph.D., Ohio University

Pratibha Menon. (2016) Assistant Professor, Mathematics, Computer Science and Information Systems. M.S.T., Ph.D., University of Pittsburgh

Linda Meyer. (2006) Professor, Exercise Science and Sport Studies. B.S., Lock Haven University; M.S., West Virginia University; Ed.D., Duquesne University

Richard Miecznikowski. (1990) Professor, Art and Languages. B.S., Indiana University of Pennsylvania; M.F.A., State University of New York, College of Ceramics at Alfred University

Laura Miller. (2006) Associate Professor, Exercise Science and Sport Studies. B.S., Pennsylvania State University-Behrend College; M.S., Ph.D., University of Southern Mississippi

Katherine J. Mitchem. (2005) Professor, Special Education. B.S., Manchester University; M.Ed., Drury University, Missouri; Ph.D., Utah State University

Dawn M. Moeller. (2004) Professor, Student Services, Counseling Center. B.A., University of Virginia; M.S., Ph.D., Syracuse University

Suzan Mohney. (2007) Assistant Professor, Art and Languages. B.S., Indiana University of Pennsylvania; B.S., California University of Pennsylvania; M.S., Indiana University of Pennsylvania; Ed.D., Walden University
Connie Monroe. (2006) Professor, Secondary Education & Administrative Leadership. B.A., Case Western Reserve University; Post-Bac Teaching Certification, University of Texas at San Antonio; M.A., Regis University; Ph.D., University of Dayton

Jennifer Morrison. (2017) Assistant Professor, Student Services. B.S., M.S., California University of Pennsylvania

Thomas R. Mueller. (1999) Professor, Earth Sciences. B.S., Towson State University; M.A., University of Connecticut; Ph.D., University of Illinois

Keat Murray. (2013) Assistant Professor, English. B.S., Shippensburg University of Pennsylvania; M.A., Millersville University of Pennsylvania; Ph.D., Lehigh University

Diane H. Nettles. (1989) Professor, Childhood Education. B.A., M.A., Ph.D., University of South Florida

Louise Nicholson (2009) Associate Professor, Biology and Environmental Sciences. B.S., University of Glasgow (Scotland); Ph.D., University of Southampton (United Kingdom)

Christine Nora. (2008) Assistant Professor, English. B.M., M.A., Youngstown State University; Ph.D., Indiana University of Pennsylvania

George D. Novak. (1959) Associate Professor, Mathematics, Computer Science and Information Systems. B.S., California University of Pennsylvania; M.Litt., University of Pittsburgh

Mary A. O’Connor. (2001) Professor, Nursing. B.S.N., Carlow University; M.S.N., Ph.D., University of Pittsburgh

Brian T. Oddi. (2016) Assistant Professor, Exercise Science and Sport Studies. B.S., M.S., California University of Pennsylvania; Ph.D., Trident University

Bismark Oduro. (2018) Assistant Professor, Math, Computer Science and Information Systems. B.Sc., University of Cape Coast, Ghana; M.Sc., Youngstown State University; Ph.D., Ohio University

Suzanne M. Palko. (1984) Associate Professor, Nursing. B.S.N., Edinboro University of Pennsylvania; M.S.N., University of Pennsylvania; R.N.

Pratul C. Pathak. (1990) Professor, English. B.A., M.A., L.L.B., University of Delhi, India; M.A., Ph.D., University of Wisconsin-Milwaukee

Brian K. Paulson. (1989) Professor, Biological and Environmental Science. B.A., Gustavus Adolphus College; M.S., Michigan Technological University; Ph.D., University of Oklahoma

Michael Perrotti. (2013) Assistant Professor, Secondary Education & Administrative Leadership. B.A., Mansfield University of Pennsylvania; Science in Education. M.A., Wilkes University; Ph.D., Marywood University

Gwendolyn D. Perry-Burney. (2001) Professor, Social Work. B.S.W., M.S.W., Temple University; M.S., California University of Pennsylvania; Ph.D., University of Pittsburgh

Cynthia Persingher. (2010) Associate Professor, Communication, Design, and Culture. B.A., M.A., Kent State University; M.A., Ph.D., University of Pittsburgh

Christine A. Peterson. (2002) Professor, Childhood Education. B.S., Edinboro University of Pennsylvania; M.S., Johns Hopkins University; Ed.D., West Virginia University
Theresa T. Pham. (2014) Assistant Professor, Social Work. B.A., University of Houston; M.S.W., Smith College; Ph.D., Columbia University

Tamare Piersaint. (2018). Assistant Professor, Psychology. B.A., University of Rhode Island, M.A., Salve Regina University, Psy.D. Carlow University

Linda Pina. (2007) Professor, Nursing. B.S.N., M.S.N., Indiana University of Pennsylvania; Ph.D. Kennedy-Western University

Joel Press. (2006) Associate Professor, Communication, Design, and Culture. B.A., Arizona State University/Northern Arizona University; M.A., Arizona State University; Ph.D., University of Arizona

Loring A. Prest. (1998) Professor, Library Services. A.A., Brevard Community College; B.R.E. Baptist Bible College of Pennsylvania; Th.M. Grace Theological Seminary; M.S. (L.I.S.), University of Illinois at Urbana-Champaign

Matthew J. Price. (2005) Professor, Chemistry and Physics. B.S., Adams State College; Ph.D., University of Utah

Samantha J. Procaccini. (2013) Associate Professor, Communication Disorders. B.S., University of Rhode Island; M.S., Columbia University; SLP.D, University of Pittsburgh

Aleksandra Prokic. (2002) Assistant Professor, Applied Engineering and Technology. B.S., Belgrade University, Yugoslavia; M.A., School of Visual Arts, New York

Anthony S. Pyzdrowski. (1990) Professor, Mathematics, Computer Science and Information Systems. A.S., Pennsylvania State University; B.S., M.S., Ph.D., West Virginia University

Jennifer Ramsey. (2017) Assistant Professor, TRIO and Academic Services. B.A., California University of Pennsylvania; M.S.W., West Virginia University

Mary Randall. (2005) Assistant Professor, Art and Languages. B.A., Montana State University; M.A., University of Montana; Ph.D., University of Colorado-Boulder

Rebecca A. Regeth. (2001) Professor, Psychology. B.A., M.S., Western Washington University; Ph.D., University of New Hampshire

Benjamin Reuter. (2004) Associate Professor, Exercise Science and Sport Studies. B.S., Gettysburg College; M.S., Old Dominion University; C.S.C.S., *D., A.T.C., Ph.D., Auburn University

Clyde A. Roberts. (1992) Professor, Business and Economics. B.S., MBA, Marshall University; D.D.A., University of Kentucky

Nikolas C. Larrow Roberts. (2018) Assistant Professor, Criminal Justice. B.A., B.S., M.S., California University of Pennsylvania; Graduate Certificate, Ph.D., Saybrook University

Carrie R. Rosengart. (2005) Associate Professor, Psychology. B.S., Tufts University; M.S., Ph.D., University of Georgia

Beverly J. Ross. (2018) Assistant Professor, Criminal Justice. B.S., California University of Pennsylvania; M.A., Duquesne University; M.A., Ph.D., The Chicago School of Professional Psychology
Monica L. Ruane Rogers. (2011) Assistant Professor, Library Services. B.A., University of Maryland, Baltimore County; M.L.I.S., University of Pittsburgh.

Susan Morris- Rutledge (2011) Associate Professor, Secondary Education & Administrative Leadership. B.A., M.A., University of South Dakota; Ph.D., University of Mississippi

Susan D. Ryan. (2002) Professor, Earth Sciences. B.A., University of Western Ontario; M.A., Bournemouth University, England; Ph.D., University of Calgary

Ghassan A. Salim. (2001) Assistant Professor, Applied Engineering and Technology. B.S., Wright State University; M.S., West Virginia University

Mary Ann Salotti. (1994) Professor, Licensed Psychologist, Student Services, Counseling Center. B.A., University of Pittsburgh; M.Ed., Duquesne University; Ph.D., University of Pittsburgh

Kristen Schaffner. (2018) Assistant Professor, Psychology. B.A., Duquesne University, M.Ed., Duquesne University, Ph.D. Duquesne University

Joseph G. Schickel. (1988) Assistant Professor, Applied Engineering and Technology. B.S., California University of Pennsylvania; M. Ed., Clemson University

Joseph Schwerha. (2005) Associate Professor, Business and Economics. B.S., Carnegie Mellon University; J.D., University of Pittsburgh

Mary Seman. (1998) Professor, Special Education. B.S., California University of Pennsylvania; M.Ed., University of Vermont; Ed.D., West Virginia University

Ali Sezer. (2006) Professor, Chemistry and Physics. B.S., Yildiz University; M.S., Ph.D., University of Nebraska-Lincoln

Kayla Shinew. (2016) Assistant Professor, Health Science. B.S., Lock Haven University of Pennsylvania; M.S., Austin Peay State University; Ph.D., Ohio University

Paul Sible. (2002) Assistant Professor, Mathematics, Computer Science and Information Systems. B.S., California University of Pennsylvania; M.S., West Virginia University

Robert Skwarecki. (2000) Professor, Communication Disorders. B.S., Duquesne University; M.S., Ph.D., University of Pittsburgh

Rosalie Smiley. (1999) Professor, Social Work. B.S.W., M.S.W., M.P.H., Ph.D, University of Pittsburgh

Craig Smith. (2008) Professor, History, Politics, and Society. B.A., University of Arizona; M.A., Ph.D., University of Missouri-Kansas City

Melissa Sovak. (2010) Associate Professor, Math, Computer Science & Information Systems. B.S., Carlow College; M.S., Duquesne University; Ph.D., University of Pittsburgh
Graduate Catalog

Mathilda Spencer. (2015) Assistant Professor, Criminal Justice. B.A., Pennsylvania State University; M.S., Shippensburg University of Pennsylvania; Ph.D., Indiana University of Pennsylvania

Gregory A. Spicer. (1998) Associate Professor, Communication, Design, and Culture. B.S., Clarion University of Pennsylvania; M.S., Southern Illinois University; Ph.D., University of Pittsburgh

Frank Stetar. (2016) Assistant Professor, Music and Theatre. B.S.Ed., M.Ed., Indiana University of Pennsylvania; Ph.D., Robert Morris University

Jeffrey S. Sumey. (1990) Associate Professor, Applied Engineering and Technology. B.S., California University of Pennsylvania; M.S., West Virginia University

Razak Abedalla Surrey. (2017) Assistant Professor, Art and Languages. B.A., University of Wassit; M.A., University of Al-Qadissiyah; Sc.D., Robert Morris University

Emily M. Sweitzer. (2001) Professor, History, Politics, and Society. B.A., M.S., California University of Pennsylvania; Ed.D., West Virginia University; Nationally Certified School Psychologist; Certified Forensic Science and Law, Duquesne University; Certified K-12 Administrator, WV

Robert G. Taylor. (2001) Associate Professor, Exercise Science and Sport Studies. B.S., San Diego State University; M.Ed., Frostburg State University; Ph.D., University of Southern Mississippi

Mark C. Tebbitt. (2007) Professor, Biological and Environmental Sciences. B.S., University of Wales, M.S., University of Reading, England; Ph.D., University of Glasgow, Scotland

Randy Tillmutt. (2016) Assistant Professor, Music and Theatre. Diploma in Music Education, Edna Manley College of the Visual and Performing Arts, Jamaica; M.M., Ph.D., University of Mississippi (Ole Miss)

Michelle Early Torregano. (2014) Associate Professor, Childhood Education. B.A., M.A., Xavier University of Louisiana; Ph.D., Pennsylvania State University

Christina Toras. (2010) Professor, Professional Studies. B.A., Youngstown State University; J.D., Capital University Law School; M.A., East Carolina University

Pamela C. Twiss. (1999) Professor, Social Work. B.A., Point Park College; M.S.W., Ph.D., University of Pittsburgh

Susan G. Urbine. (1990) Assistant Professor, Applied Engineering and Technology. B.S., California University of Pennsylvania; M.Ed., Clemson University

Kimberly Vanderlaan. (2013) Associate Professor, English. B.A., Colgate University; M.A. State University of New York; Ph.D., University of Delaware

Ronald Wagner. (2005) Associate Professor, Exercise Science and Sport Studies. B.S., Southeast Missouri State University; M.S., Eastern Kentucky University; M.S., Bloomsburg University of Pennsylvania; Ph.D., University of Arkansas, Fayetteville

Jacqueline Walsh. (1998) Professor, Counselor Education. B.S., M.S., California University of Pennsylvania; Ph.D., Kent State University

240
Julie Warnick. (2010) Associate Professor, Criminal Justice. B.S., West Virginia University; J.D. Thomas M. Cooley School of Law

Carolyn Wass. (2001) Instructor, Social Work. B.S., M.S., California University of Pennsylvania; M.S.W., West Virginia University; Ph.D., Warren National

Jamie Weary. (2006) Associate Professor, Health Science. B.S., Slippery Rock University; A.T.C., D.P.T., Slippery Rock University

Robin R. Weaver. (2015) Assistant Professor, Nursing. A.S., Community College of Beaver County; B.S.N., M.S.N., Ph.D., Duquesne University

Ellen West. (2005) Associate Professor, Exercise Science and Sport Studies. B.S., California University of Pennsylvania; A.T.C., M.S., Ed.D. West Virginia University

Thomas F. West. (2004) Professor, Health Science. M.S., West Virginia University; B.S., A.T.C., Ph.D., Pennsylvania State University

Robert Whyte. (2005) Professor, Biological and Environmental Sciences. B.S., Michigan State University; M.En.S., Miami University, Institute of Environmental Science, Oxford, OH; Ph.D., Miami University, Department of Botany, Oxford, OH

Thomas Dean Wickham. (2000) Professor, Earth Sciences. B.S., Slippery Rock University of Pennsylvania; M.S., West Virginia University; Ph.D, Pennsylvania State University

Brenton Wilburn. (2015) Assistant Professor, Applied Engineering & Technology. B.S., M.S., Ph.D., West Virginia University

Jennifer N. Wilburn. (2013) Assistant Professor, Applied Engineering & Technology. B.S., M.S., Ph.D., West Virginia University

Mary A. Wolf. (2017) Assistant Professor, Secondary Education & Administrative Leadership. B.S., M.S., Clarion University of Pennsylvania; Elementary/Secondary Principal Certification, Edinboro University of Pennsylvania; Ed.D., Indiana University of Pennsylvania

Brian D. Wood. (2005) Associate Professor, Exercise Science and Sport Studies. B.S., University of Wisconsin-LaCrosse; M.S., Minnesota State University – Mankato; Ph.D., University of New Mexico

Kimberly A. Woznack. (2004) Professor, Chemistry and Physics. B.S., Hartwick College; Ph.D., University of Wisconsin-Madison

April Wright. (2019) Assistant Professor, Communication Disorders. B.S., M.S., California University of Pennsylvania

Clover Wright. (2009) Assistant Professor, Childhood Education. B.A., Antioch College; M.A., Ph.D., West Virginia University

Christopher Wydra. (2015) Assistant Professor, Criminal Justice. B.S., Point Park University; M.S., Duquesne University; D.Sc., Robert Morris University

Edwin Zuchelkowski. (1985) Professor, Biology and Environmental Sciences. B.S., California University of Pennsylvania; Ph.D., West Virginia University
Financial Aid
Mission Statement
The primary mission of the Financial Aid Office at California University of Pennsylvania is to provide financial planning and assistance to students and their families in meeting the costs of education. In fulfilling this mission each student will be given careful consideration and the University will determine financial assistance based on federal state and institutional guidelines. Financial aid programs have been established to provide access to higher education with guidelines to ensure fairness in disbursing available funds to qualifying students. The Financial Aid Office strives to ensure that courteous timely and accurate financial aid services are delivered to all students see in assistance from our office.

For current information on the following items, please visit the Financial Aid Web pages at www.calu.edu/financial-aid:

- Eligibility requirements
- Financial aid application process, including FAFSA
- Cost of attendance
- Grants
- Student employment
- Scholarships
- Loans
- Disbursement of financial aid
- Financial aid warning, financial aid suspension, financial aid probation

Location and Office Hours
The Financial Aid Office is located on the first floor of Dixon Hall. The office hours are 8 a.m. to 4 p.m., Monday through Friday. Appointments are encouraged, but a daily on-call counselor is available to assist walk-ins.

Students can contact the Financial Aid Office by phone at 724-938-4415 or by fax at 724-938-4551. In addition, general financial aid information may be obtained at www.calu.edu/financial-aid. Specific financial aid and student account information is available 24 hours a day through the Vulcan Information Portal (VIP).
Office of Social Equity

The Office of Social Equity supports the University's goal of creating and maintaining a learning environment in which the rights of all are respected. This office encourages the entire University to become personally involved in enriching the campus through support of enhanced social justice and diversity. The Office of Social Equity reaffirms the University's commitment to social justice and diversity through the promotion of understanding, tolerance and respect for others, and ensures that the University community understands and complies with federal and state laws and California University policies with respect to equal opportunity, Affirmative Action, ADA and Title IX.

Services
The Office of Social Equity helps students and employees resolve concerns and complaints regarding harassment, discrimination and disability. The Office of Social Equity strives to help any student, faculty member or employee who needs information or assistance or has a concern about Equal Opportunity, Affirmative Action, ADA, Title IX or Sexual Harassment policies. More information, visit the Office of Social Equity’s website at: www.calu.edu/SocialEquity.

The Office of Social Equity's support services are provided in the following areas in compliance with state and federal laws:

Equal Opportunity, Diversity, Compliance and Equity
The Special Assistant to the President for EEO who is also the Title IX Coordinator strives to enhance diversity in the University community through working with diversity committees/groups, special projects, trainings, etc.

Social Equity Complaints
The responsibility for investigating complaints is vested in the Office of Social Equity under the direction of the Special Assistant to the President for EEO who is also the Title IX Coordinator. The Complaint Intake Form is available at: www.calu.edu/SEcomplaint.

Complete information regarding policies, procedures, and the informal and formal complaint processes can be found in both the Campus EEO Policy (Policy Statements and Compliance Procedures on Equal Education and Employment Opportunity and Social Equity) and the Gender-Based/Sexual Misconduct (Title IX) Policy, which are both available at: www.calu.edu/SEpolicies.

Social Equity Online Training Programs
Pennsylvania’s State System of Higher Education mandates that all universities conduct sexual harassment awareness training with new students. Additionally, the University is committed to providing an environment free from discrimination on the basis of sex. Title IX of the Education Amendments of 1972 protects persons from sex discrimination in educational programs and activities at institutions that receive federal financial assistance. California University of Pennsylvania provides many resources to administration, faculty and staff, as well as students, to address concerns relating to discrimination on the basis of sex, which includes sexual misconduct, stalking and dating/domestic violence. To this end, California University of Pennsylvania also offers through the Office of Social Equity an online training program(s) regarding Title IX legislation. In addition to the Title IX online training program, the Office of Social Equity is requiring that all personnel (administration, faculty and staff) and all students complete the Social Equity required online training courses annually. You can begin your free annual online training programs by following the instructions given on the Office of Social Equity’s training webpage at: www.calu.edu/SEtraining.

Location and Hours
The Office of Social Equity is located in South Hall, Room 112, 724-938-4014. Office hours are 8 am to 4 pm Monday through Friday. Evenings and weekends are by appointment only. For more information, View the Office of Social Equity’s webpage at: www.calu.edu/SocialEquity.

Policies
The Office of Social Equity’s policies are available at: www.calu.edu/SEpolicies and you can access the complaint form at: www.calu.edu/SEcomplaint.
Office of Social Equity

Equal Opportunity
Our equal opportunity statement is available at: www.calu.edu/socialequity.

Sexual Harassment
The Gender-Based / Sexual Misconduct (Title IX) Policy is available at: https://www.calu.edu/inside/policies/_files/social-equity/TitleIX.pdf.

ADA/504
Services for students with disabilities are provided through the Office for Students with Disabilities (OSD). For more information, visit the OSD at Carter Hall G-35, or call 724-938-5781, or view online at: https://www.calu.edu/inside/student-resources/disabilities/. This page includes information on ADA compliance.

Contact Information
Direct discrimination/sexual harassment, equal opportunity and Title IX inquiries or complaints to the Special Assistant to the President for Equal Employment and Educational Opportunity (EEEO) and Title IX Coordinator, Office of Social Equity, South Hall 112, 724-938-4014.

Direct student ADA inquiries regarding services or facilities accessibility to the ADA/504, Compliance Officer, Office of Student Affairs, Carter Hall G-52, 724-938-1603, or a message can be left at the Counseling Center, Carter Hall G-53, 724-938-4056.

Direct faculty and staff ADA inquiries regarding services or facilities accessibility to the Director of Human Resources, Office of Human Resources, Dixon Hall 408, 724-938-4427.
Pennsylvania Teaching Certification
Individuals who possess a Pennsylvania Instructional I teaching certification may be able to use the credits earned in a graduate program at California University toward the post-baccalaureate requirements for the Instructional II certification.

Instructional I Certification
Some of our graduate programs lead to specialized initial teaching certification. Review the program requirements in this catalog.

Act 48 Continuing Education
California University is a Pennsylvania Department of Education-approved provider for Act 48 continuing professional education. All of California University’s graduate education programs may be applied to Act 48 continuing education.

For more information on Pennsylvania Instructional II certification teaching certifications and professional education requirements, please visit the Pennsylvania Department of Education website at www.education.state.pa.us/portal/server.pt/community/pennsylvania_department_of_education/7237.
State Authorization

Information about current legal authorization for California University of Pennsylvania to offer online education nationwide and the steps that Cal U is taking to achieve necessary authorizations in all 50 states, the District of Columbia and U.S. Territories is located at: https://www.calu.edu/online/state-authorization/index.aspx

Questions may be directed to Doug Hoover, Associate Provost, at 724-938-4096 or hoover@calu.edu.

Global Online Complaint Process

Global Online undergraduate and graduate students who have a grievance, complaint or concern related to Global Online courses (or who have other Global Online concerns unrelated to courses) can follow the steps outlined at: https://www.calu.edu/online/state-authorization/complaint-process.aspx

Questions may be directed to Doug Hoover, Associate Provost, at 724-938-4096 or hoover@calu.edu.
Student Affairs

Student Affairs
Student Affairs is a critical component of a student’s learning experience that goes beyond the classroom and provides a safe and healthy living and learning environment. Student Affairs oversees life on campus, including student organizations, activities, wellness, housing, dining, recreational sports and much more. The professionals who work in Student Affairs are committed to helping all students enrich and deepen their lifetime journey of growth and self-exploration.

Mission
Inherent in the University’s educational mission is a commitment to the total development of all students. The division of Student Affairs, under the direction of the vice president, is administratively responsible for the implementation of this commitment. The central focus of the Student Affairs division, therefore, is the personalization of the university experience, with concern for not only individual intellectual development, but for personal, social and physical development as well. The division is committed to recognizing and assisting in the realization of human potential, which includes promotion of the concepts of safety, freedom, justice, individual dignity and the right of the dissenter and openness of mind.

Student Affairs Committees
• Senior Staff Management Team sets the vision and priorities for strategic planning and assessment efforts across the Division of Student Affairs in alignment with University goals, trends and best practices.
• The Student Affairs Council serves as a recommending body for strategic plan development; coordination of division-wide assessment efforts; and committee oversight.
• The Student Affairs Diversity Committee serves as a catalyst for change through awareness and understanding of diversity and inclusion.
• The Student Affairs Retention Committee serves to identify opportunities to create and enhance engagement to support student retention and success.
• The Targeted Programming Committee identifies trends and hot topics to forecast division-wide programming opportunities.

Services
Student Affairs works to personalize your Cal U experience and develop your personal and professional skills by providing a full range of University support services and programs, including:

• Dining, Hospitality and Vending Services
• Cal Card Services
• Center for Volunteer Programs and Service Learning
• Commuter and Non-Traditional Student Services
• Conference Services and Convocation Center
• Fraternity and Sorority Life
• LGBTQA+ Support Services
• Military and Veteran Affairs
• Multicultural and Diversity Education Center
• Natali Student Center
• Office for Students with Disabilities
• Recreational Services
  • Herron Fitness Center
  • Indoor and Outdoor Recreation
  • Intramurals and Group Fitness
  • Sports Clubs
• Student Association, Inc./SAI Farm/Clubs and Organizations
• Student Activities, Programming and Leadership
• Student Media Services
  • Multimedia Access Center (Mac Lab)
  • CUTV
  • WCAL Radio
  • Cal Times Newspaper
Student Affairs

• University Housing/Residence Life
• Vice President's Office
  • Class Excuses
  • Administrative/Medical Withdrawals
  • Student Conduct
  • Student Liaison Services and more
• Wellness Center
  • Alcohol and Other Drug Education
  • Counseling Center
  • End Violence Center
  • Health & Wellness Education
  • Student Health Center
  • Student Wellness Support Services
  • The PARC (Alcohol and Drug Recovery Center)
  • Women's Center

Accommodations for Students with Disabilities

Office for Students with Disabilities
California University of Pennsylvania welcomes otherwise qualified students with disabilities. The University recognizes its responsibility to these students and is committed to providing reasonable accommodations to insure equal access and full participation as guided by Section 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act (ADA/AA).

Students with disabilities follow the same admission procedures and standards as required by California University of Pennsylvania's Admissions Office for all students.

Accommodations
Accommodations for students with disabilities are approved through the Office for Students with Disabilities (OSD). It is the responsibility of the student to adhere to OSD procedures for self-identifying, providing documentation to substantiate requests and requesting reasonable accommodations in a timely manner. Students must meet the academic/technical standards of the classes/programs for which they are applying and/or in which they are enrolled. In those instances where class/program requirements simulate responsibilities of in-service personnel, students must meet the essential functions of the job. Inquiries regarding disability access for students should be directed to:

Office for Students with Disabilities
Carter Hall, Room G35
Phone: 724-938-5781
Email: osdmail@calu.edu
OSD website: www.calu.edu/current-students/student-services/disability/index.htm

Parking
Parking spaces for persons with disabilities are marked as such on campus. These spaces are solely for the use of persons who have the required state DOT-issued ADA parking credentials displayed. Persons who wish to request a temporary disabled parking permit (six weeks or less) must submit appropriate documentation to the Department of Parking and Transportation (724-938-4677). Persons with disabilities needing to obtain required DOT-issued credentials can make application to the respective state Department of Transportation in which the vehicle is licensed. Additional information regarding parking on campus at www.calu.edu/parking.

Contact Us
Inquiries regarding disability access for students should be directed to:

Office for Students with Disabilities
Carter Hall, Room G35
Phone: 724-938-5781
Email: osdmail@calu.edu
Center for Volunteer Programs and Service Learning
The Center for Volunteer Programs and Service Learning, located in 119 Natali Student Center, serves as a catalyst for students to connect with, build and sustain meaningful service initiatives in partnership with communities surrounding Cal U. Students enhance their learning and leadership development by engaging in educationally purposeful and diverse co-curricular experiences through volunteer opportunities.

The Center also operates the Cal U Cupboard, a food pantry for students experiencing food insecurity.

Commuter and Nontraditional Student Services
Commuter and Nontraditional Student Services assist commuting and nontraditional students, with a student affairs staff member as a full time advocate for student needs. Assisting with alternate forms of transportation and parking issues, alerting students of available housing options and helping students connect to campus are just a few of the services offered to our commuting population. Student Affairs recognizes the needs of students seeking a degree after a hiatus from schooling, seeking a second degree, seeking career skills enhancement or taking non-degree or continuing education courses. The office is located in 123 Natali Student Center, near popular commuter lounge areas.

Counseling and Psychological Services
Counseling Center services are available for students seeking confidential help for personal as well as interpersonal difficulties. Services are free of charge to Cal U enrolled students. The Counseling Center, located in the Wellness Center, provides an array of short-term counseling and psychological services to University students with problems that interfere with their adjustment to campus life, personal development or effective educational performance. The Counseling Center provides the following services to students:

- Evaluation
- Consultation
- Brief therapy
- Emergency intervention

Students requiring intensive or specialized care will be referred to community mental health providers. All therapists working in the Counseling Center adhere to federal and state ethical and legal standards and laws concerning confidentiality. Enrolled students can make an appointment by calling 724-938-4056.

Dining Services
The goal of the University dining services is to provide a quality, cost-effective, innovative dining program for students living on and off campus. The University encourages student involvement and awareness to help provide quality, nutritious meals at a reasonable cost. Dining locations provide an important environment for student interaction and socialization. Students living in the residence halls, as well as commuters, may choose from a variety of meal plans. All students who live in lower-campus University residence halls must participate in the meal program. Detailed university dining services information is available on the university website.

End Violence Services
The End Violence Center works proactively to raise awareness and provide prevention education for the campus community on the issues of sexual violence, intimate partner violence and stalking. In addition, the Center works reactively to offer survivors and secondary victim’s advocacy, crisis intervention, supportive services and outreach.

The End Violence Center is located in Room 117 of Natali Student Center or call 724-938-5707.

Housing
Cal U has some of the best university housing in the nation. No cramped dorm rooms here--you will feel right at home in our modern housing that's convenient, safe and exceptionally comfortable. Whether you are an out-of-town or local student, you will find our housing fosters academic success and personal growth. Studies show that
students who live on campus during their first years outperform students who choose to live off campus. Dorms provide a living environment that complements classroom learning. Students are encouraged to participate in learning communities with study groups and computer labs readily accessible. Students tell us one of the best things about living in university housing is that you meet so many people and learn so much about yourself and others.

Check out our website for housing options:  https://www.calu.edu/student-life/living-at-calu/housing-options.aspx

Multicultural Affairs and Diversity Education
Multicultural Affairs and Diversity Education promotes and supports diversity on campus by organizing educational opportunities, fostering mentorship for minority students and helping students use campus resources effectively. A team of student ambassadors, interns and University staff work together to develop, plan and implement programs and activities that honor, advocate and celebrate diversity, in all forms. Additionally, the program provides the opportunity for peer-to-peer engagement in a safe, structured environment, to hold honest and intentional discussions on cultural diversity and other social justice issues. The Cal U Multicultural Center is located on the ground floor of Carter Hall.

Recreational Services
Herron Recreation and Fitness Center is located in Herron Hall and serves the university community. Students are admitted upon presentation of their valid CalCard. Students may purchase memberships for their spouse and/or children (age 16 or older) for a fee. The facility includes a lap pool, steam room, whirlpool, saunas, weight training equipment, fitness classes, cardiovascular equipment, two gymnasiums, climbing wall, indoor walking track and a variety of exercise machines. The facility also coordinates and manages University sports clubs as well as intramural and extramural sports.

For additional information, visit: https://www.calu.edu/student-life/living-at-calu/sports-recreation.aspx

Student Handbook
For additional information, the Student Handbook offers students a quick and easy guide to University programs, activities and services. While not always encyclopedic in its descriptions, it does tell you where to go for information: https://www.calu.edu/inside/policies/_files/general/Student-Handbook.pdf

Veterans Affairs
The Office of Military and Veterans Affairs offers comprehensive support for veterans, eligible dependents, service members of the National Guard and Reserve and active-duty service members.

We understand the unique demands of service members' and veterans' lives. Whether you are attending classes through Cal U's Global Online programs or are pursuing your education on campus, let us help you achieve your best. Connect with diverse and dynamic veterans who are attending Cal U and share many of the same struggles, excitement, concerns and points of pride. Cal U understands the complex challenges of transitioning from combat or the formal structure of the military to the world of higher education. This new journey requires a great deal of determination, dedication, responsibility, perseverance and support to get through. The Veterans Club is also here to give you that support with regular meetings that build a strong community that will assist you throughout your Cal U experience. Please visit the Office of Veterans Affairs website: calu.edu/veterans.

For more information, call California University's Office of Military and Veterans Affairs at 724-938-4076 or email veterans@calu.edu.

Vice President's Office / Dean of Students
Student Affairs can help you get answers, discover resources and explore student life, all of which will enhance your life while at Cal U. The primary goal of the division is to provide essential support services that assist students as they pursue their academic goals. The Office of Student Affairs is located on the third floor of the Natali Student Center and our main phone number is 724-938-4439.
Attendace Concerns
Except in cases of emergency, it is your responsibility to inform your professors in advance if you expect to be absent from class. If your absence is the result of hospitalization or an emergency family concern, contact the Dean of Students for an attendance memo as soon as possible at 724-938-4439.

The Dean of Students will verify documentation related to your absence, contact your instructors regarding the issue and provide support to you during the time of crisis. The Dean of Students may not be able to provide a memo if you do not make contact for support within a reasonable timeframe.

Remember, it is still your responsibility as a student to be in contact with your professors when you are able to return. Ultimately, it is up to you and your faculty member to negotiate any course adjustments.

Office of Student Conduct
The Student Code of Conduct is intended to provide guidance and structure for students in their relations with others, use of University and other's property and development of appropriate decision-making abilities. Students learn from each situation they are involved in to refine decision-making and problem-solving skills and reflect on actions and decisions. In addition, students come to understand how their actions affect others and future career goals. All students should review the Student Code of Conduct and the University's policies on reporting and handling alleged violations. Additional information is found on the university's website under Office of Student Conduct.

Wellness (Health) Center
The Wellness Center is available to students:

- 24 hours Monday-Friday
- 12 hours (7 p.m. - 7 a.m.) Saturday and Sunday

A full-time staff of registered nurses is on duty during hours of operation. A University physician conducts regular hours and a Nurse Practitioner is available Monday-Friday.

A University health form must be completed by your family doctor and returned. For a copy of the form, visit: https://www.calu.edu/inside/forms/_files/medical/medical-information-form.pdf

For additional information, call 724-938-4232.

Alcohol and Other Drug (AOD) Services
AOD programs are located on the ground floor of Carter Hall in Suite G-45. Intervention, education and prevention comprise the operational components of Cal U's AOD programs. The BASICS and CASICS programs provide intervention, while education and prevention are provided by the Health and Wellness Education Center and the AOD education specialist.

PARC
The Prevention Awareness Recovery Center (PARC) is on campus for students who are in recovery from drug and alcohol addiction as well as students who are allies and supporters of those in recovery. PARC is a safe, worry-free lounge area where students are welcome to hang out, meet other students in recovery and hold Cal Clean and Sober groups. The PARC is full of resources and referrals for students in needs of support or treatment services.

Student Wellness Support Services
Student Wellness Support Services offers support and guidance for all University:

- Students experiencing an acute crisis or who are in a situation that is greatly impacting their ability to successfully engage in daily activities.
- Students who require information or guidance to navigate University and/or community resources.
- Faculty and staff who are concerned about a student and would like some additional expertise or guidance.
Tuition and Fees
For the most up-to-date information on graduate tuition, fees, and room and board charges, visit:

- https://www.calu.edu/costs-aid/tuition/graduate-tuition.aspx
- https://www.calu.edu/costs-aid/tuition/

Payment of Tuition and Fees for Semester Registration
All fees will be assessed approximately four weeks prior to the beginning of the each term. Payment in full is expected for each term or enrollment in an online payment plan (with initial payment) by billing due date. Cal U accepts American Express, Discover, Mastercard and Visa along with electronic (ACH) check payment online at www.calu.edu/paymybill. Paper checks and money orders payable to California University of Pennsylvania payable in U.S. dollars should be mailed to:

California University of Pennsylvania
Student Accounts Office
Box 83
250 University Ave.
California, PA 15419
Please include the student's CWID (Campus Wide ID Number) on all correspondence.

Billing Information
California University of Pennsylvania utilizes online e-billing. Students who take advantage of early/rolling registration should receive a Cal U email announcing that the billing statement is available for viewing online through the VIP approximately four weeks prior to the start of the term. Students who enroll within four weeks of the first day of the term should be prepared to make payment at the time of registration. A paper bill will be sent for the initial term billing for each term and last term billing for past due balances only.

Payment Plans
Payment plans are available each term. Payment plans enable students to pay their costs on a monthly basis. Enrollment for the payment plan can be completed online via VIP. For the most up-to-date information on tuition, fees, and room and board charges, visit calu.edu/paymybill and calu.edu/current-students/housing/index.htm.

Third-Party Billing
Some companies and government agencies pay tuition directly to the University. If tuition is to be paid in this manner, authorizing forms or letters must be sent to the Student Accounts Office. This payment must be received by the Student Accounts Office during the semester in which charges originate and cannot be used in lieu of a personal payment for an authorized payment plan. This payment option does not apply to corporate tuition reimbursement policies or when the payment amount is based on grades and received after the term has ended.

Refund Policy
Tuition and fees are adjusted for class withdrawals during the first week of the fall and spring semesters. After the add/drop period ends, adjustments are made ONLY if a student withdraws from all enrolled classes. Refunds are made to the amount of the charge, not the amount that has been paid to date. The refund policy is available online and in the Student Accounts Office. Financial aid recipients should refer to "refund/repayment policies" on the Cal U website for the financial aid adjustment policy.

Housing Application Service Fee
An application is required in order to reserve a room for the following academic year. This fee is nonrefundable and is not deducted from room charges. Additional information regarding the housing application process is located on the housing website: www.calu.edu/current-students/housing/index.htm.

Late Payment Fee
A late payment fee of $50 per month will be assessed when a student fails to pay the required fees by the due date or when a student fails to pay according to an approved payment plan. (The structure of fees is subject to change without prior notice and such changes shall take precedence over existing charges set forth in this catalog.)
Return Check Charge
A $25 fee will be charged for any check (paper or ACH) that is made payable to California University of Pennsylvania and returned by the bank because funds are unavailable for any reason or incorrect bank account information (numbers) were entered by the student. (The structure of fees is subject to change without prior notice and such changes shall take precedence over existing charges set forth in this catalog.)

Proxy
A completed Proxy Access form is required by University offices to release account information via phone. Proxy Access Management is available through the Vulcan Information Portal - Academic/Banner Self Service/Proxy Access.
University Services

Institutional Review Board (IRB)
For information about California University of Pennsylvania's Institutional Review Board, please visit the IRB website (https://www.calu.edu/inside/faculty-staff/institutional-review/index.aspx).

Louis L. Manderino Library
LOUIS L. MANDERINO LIBRARY is committed to providing the resources needed to support the research needs of Cal U students. This includes a substantial collection of peer-reviewed journals, books (including e-books), online research databases and audiovisual materials. In addition to our collections, the library provides both individual and collaborative study areas, including private rooms for group use. To help reduce the stress of studying, the library has vending machines with drinks and snacks, a collection of popular DVDs, a graphic novel collection and a selection of popular reading books.

Electronic Resources: Online information retrieval has made library research more thorough and more efficient. Using the library's research databases and online catalog, students can quickly locate and access an impressive collection of scholarly journals, magazines, books, e-books, newspapers and audiovisual materials. All of the library's electronic resources are accessible from on- and off-campus locations, so students can research anywhere they have Internet access. Since the library is constantly working to provide the best resources for our students, please visit the library's website (https://library.calu.edu) for the current list of library resources.

Research Services and Library Instruction: Since there are so many research options, it can be daunting to know how to search effectively. Students can contact the friendly librarians (in the library or by telephone, email, chat or text) to get help with their research. Cal U librarians are faculty members and work with classroom professors to provide instruction to students regarding the effective use of library resources in their coursework. Students are encouraged to seek individualized help by scheduling appointments with a research librarian.

Shared Library Resources and Interlibrary Loan: Beyond our own collections, Cal U participates in several resource-sharing programs that offer students a wealth of additional resources. When Manderino Library does not have the book a student needs, the online E-ZBorrow system allows students to request books from scores of academic libraries in Pennsylvania, West Virginia, New Jersey and New York. This system is both fast and free. If the book cannot be obtained from an E-ZBorrow library, or if a student needs an article that is not available in the library's journal resources, these can be requested from other libraries through our Interlibrary Loan Office.

University Police
The California University Police Department is a fully recognized law enforcement agency as authorized by 71 P.S. 646, the Administrative Code of 1929 as amended and Title 18 of the Pennsylvania Consolidated Status (Crime and Offenses), and 24 P.S. 20-1006-A (14) 20-10A (5) of the State System of Higher Education Act.

The department consists of professionally trained individuals capable of responding to requests for assistance in routine and emergency situations. The department, a diverse group of police officers, communications officers and secretarial staff, provides continuous 24-hour assistance to the University community.

The staff includes a director/chief, assistant chief, four lieutenants (three patrol supervisors and one criminal investigator), one specialist/K-9 handler and 11 additional commissioned police officers that have received certification from a MPOETC- approved Act 120 police academy. Two security officers (dispatchers) and an administrative assistant contribute to the operation of the department.

Cal U's Police Department has also recently established a K-9 unit that will help track lost persons, recover evidence and engage in drug searches and public relations activities, in addition to day-to-day patrol of campus.
University Services

Additional services offered to University students, faculty and staff include parking and traffic management, criminal investigations, health, fire and safety surveys, special event planning, accident investigation and crime prevention information and presentations.

Pursuant to the Pennsylvania College and University Security Act and the Federal Crime Awareness and Campus Security Act of 1990, postsecondary institutions, including colleges and universities, must annually make available to all applicants, students and employees information with respect to campus crime statistics and the security policies of the institution.

The information is compiled by California University and made available through the Office of Admissions, Office of Student Affairs and University Police and on the University website.
