

# B.S. in Criminal Justice to M.A. in Applied Criminology

## Program Description

The Bachelor of Science in Criminal Justice degree explores broad concepts related to the field of criminal justice. Concentrations under this degree also allow students to focus study on:

- Criminology
- Cyber Forensics
- Forensic Science
- Homeland and International Security
- Law and Justice

Qualified undergraduate students in the criminal justice program and its concentrations may be eligible to participate in the accelerated B.S.-to-M.A. program, which enables them to take graduate courses that apply to both their bachelor's degree in criminal justice and (thereafter) an M.A. in Criminal Justice Studies: Applied Criminology.

The Applied Criminology concentration of the Master of Arts in Criminal Justice Studies presents advanced criminological theories and examines behavioral manifestations of violent offenders. It provides students with sophisticated techniques needed to apply an analytical framework to real-world situations.
