Remote Desktop on Windows

Windows computers have Remote Desktop built in to them. To start remote desktop use the search box in the bottom left hand corner. When the remote desktop window opens up, put your computer name in the box.

The next step varies on whether you are using a University computer or a personal computer.

- If you are using a University computer, put your password in.
- If you are using a personal computer, when the box for credentials pops up, make sure to click on “More choices”.

Click on “Use a different account”
Your username should be calupa\username

Windows Security

Enter your credentials

These credentials will be used to connect to NOS207-02173.

calupa\lee_t

You will get a log in screen just like you were on campus. Click “Ok”

Your computer will log in. Everything appears just as it is on your office desktop.
